INNOVAZIONE

INNOVATION

3D tech

La tecnologia 3D Tech consente di applicare differenti materie ceramiche, anche a spessore, in perfetta corrispondenza con la grafica sottostante, realizzata in digitale ad altissima definizione. Un processo produttivo rivoluzionario, che combina la matericità con l'estetica del prodotto, fino ad ottenere superfici dallo straordinario valore sensoriale.

The new 3D Tech technology allows thick layers of various ceramic materials to be applied in perfect alignment with the underlying graphic designs, which are created digitally with extremely high definition. This revolutionary production process combines material and aesthetic effects to create surfaces with extraordinary sensorial appeal.

SOFT 3D

La tecnologia SOFT3D consente di realizzare lastre dalla finitura extra morbida arricchite da effetti di bassorilievo che ne esaltano la naturalezza. La differente densità delle materie utilizzate in superficie, nelle zone selezionate, ricrea chimicamente le profondità, che si sovrappongono in maniera esatta alla grafica digitale ad alta risoluzione.

The SOFT3D technology allows to create slabs with an extra smooth finish, enriched with bas-relief effects that enhance the naturalness of the surface. The different density of the raw materials applied in the selected areas, chemically recreates the depths that exactly match the high-resolution digital graphic.

P. tech

La tecnologia P.TECH migliora la resistenza allo scivolamento, pur mantenendo una piacevole sensazione al tatto. P.TECH è il risultato di un innovativo processo produttivo che coniuga la selezione delle materie prime con le fasi di pressatura, cottura e lavorazione a fine linea. I prodotti P.TECH, pur raggiungendo i più elevati coefficienti di attrito, si puliscono facilmente, per questo possono essere utilizzati nei progetti wellness e outdoor, anche in aree pubbliche o commerciali.

The unique P.TECH technology improves slip resistance while maintaining a pleasant tactile sensation. P.TECH is the result of an innovative production process that combines a meticulous selection of raw materials with the pressing, firing and end-of-line processing stages. Despite their high coefficient of friction, P.TECH products are easy to clean, making them ideal not only for use on indoor floors but also in wellness and outdoor spaces in public or commercial areas.

POSA SOPRAELEVATA DA ESTERNO

Il sistema di pavimentazione sopraelevata prevede l'utilizzo di supporti portanti di tipo autolivellante, regolabili oppure fissi che si adattano con semplicità e sicurezza ad ogni tipo di pavimento sottostante. Il sistema permette la realizzazione di piani di posa con altezze variabili, da terra, comprese fra 25 e 270 mm. L'indipendenza della pavimentazione dai supporti garantisce l'assorbimento di eventuali movimenti strutturali. Il sistema sopraelevato non necessita di massetto in cemento e consente una diminuzione del peso sulla struttura portante. Le fughe aperte tra una piastrella ed un'altra consentono un facile deflusso dell'acqua piovana evitando tutti i rischi di accumulo o di ristagno. La presenza dell'intercapedine fra il piano di calpestio e il piano di appoggio favorisce l'aerazione e l'isolamento termico. Questa soluzione permette inoltre il passaggio di impianti e tubazioni nell'intercapedine, e la facile ispezione degli stessi una volta installata la pavimentazione.

OUTDOOR RAISED LAYING SYSTEM

The raised floor system foresees the use of self-levelling, adjustable or fixed load bearing supports that easily adapt to the floor below in total safety. The system is suitable to create laying designs with variable heights from the ground, which range between 25 and 270 mm. The independence of the flooring from the supports guarantees the absorption of any structural movements. The raised system does not require a cement screed and reduces the load on the bearing structure. The open joints between the tiles allow rainwater to easily drain off, avoiding any risk of water accumulation or stagnation. The gap between the tread surface and the support surface favours ventilation and heat insulation. This solution allows for the installation of systems and piping in the gap, which can be easily inspected even once the floor has been installed.

LOGISTICA NUOVI SISTEMI DI IMBALLO LOGISTICS NEW PACKAGING SYSTEMS

L'innovazione della gamma GARDENIA SLABS si esprime anche attraverso la parte logistica del progetto. Gardenia rivoluziona il sistema di imballaggio delle lastre ed è oggi l'unica azienda che ha portato il sistema a cavalletto impilabile alla dimensione di cm 75x284x147,5 (lastre 120x280), 75x168x109 (lastre 80x160) e 75x26x200 (lastre 26x200).

Questi i principali vantaggi offerti:
- essendo impilabile permette di ottimizzare gli spazi all'interno dei magazzini.*
- la profondità di 75 cm consente di sfruttare a pieno il volume di carico dei container (3 pallets ne occupano perfettamente la larghezza).

- Il posizionamento verticale del prodotto garantisce una maggiore protezione delle lastre durante le fasi di trasporto.

- facilita le operazioni sul cantiere in quanto le lastre si trovano già posizionate in verticale, il materiale è facilmente ispezionabile e removibile per l'installazione.

- le dimensioni complessive del cavalletto consentono maggiori spazi di manovra all'interno dei locali di posa rispetto alle casse tradizionali e agevolano il sollevamento del materiale mediante mezzi meccanici (gru-montacarichi).

- è caratterizzato da un sistema di regatura che consente di liberare anche 1 solo collo alla volta, senza compromettere la stabilità del materiale che rimane sul pallet, evitando così il rischio di rotture. Le lastre dovranno essere liberate rispettando la sequenza opposta rispetto a quella con cui sono state confezionate, quindi iniziando dall'ultimo collo regettato.

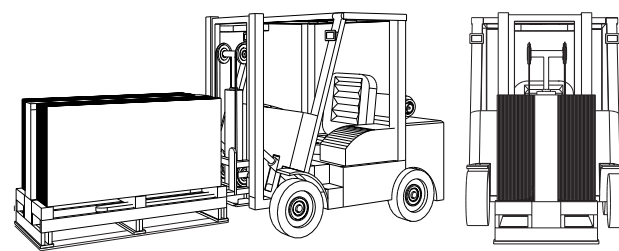

Innovation in the GARDENIA SLABS range is also reflected in the project's logistics. Gardenia has revolutionised the packaging of ceramic slabs and is the only company to have expanded the stacking rack pallet system to the 75x284x147,5 (slabs 120x280), 75x168x109 (slabs 80x160) and 75x26x200 (slabs 26x200) cm size.

This has the following advantages:
- stacking optimises the use of space in warehouses.*
- the 75 cm depth enables full use of container load space (3 pallets fit perfectly side by side).
The vertical positioning of the product better protects the slabs during shipping.

- it facilitates work on site, since the slabs are already positioned vertically, making the material easy to inspect and remove for installation.

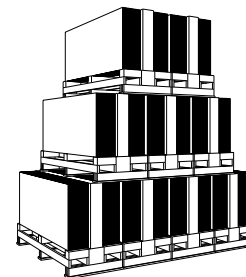

- the overall size of the rack pallet provides greater space for manoeuvring in the installation area in comparison with conventional crates, and also makes it easier to lift the slabs mechanically (with a crane or lift).

- the rack pallet system employs strapping which allows the user to remove a single package at a time without affecting the stability of the other packages on the pallet, thus minimising the risk of breakage. The slabs must be released from the packaging by reversing the packaging sequence, i.e. starting with the last package to have been strapped on.

about us

Il fulcro della visione di Gardenia è sempre stata la casa, intesa come spazio abitativo ma anche come ambiente, come territorio. Per questo la produzione del gruppo Gardenia è concentrata in Italia, dalla progettazione a ogni fase del processo produttivo. La storia dell'azienda è la storia di un paese, di un linguaggio. Da qui proviene l'innovazione e l'esclusività dei suoi prodotti. È qui che Gardenia ha la sua casa, ed è qui che nel 1997 inizia l'importante sodalizio con Versace, un marchio con il quale Gardenia ha grandi affinità: per l'importanza attribuita al design, per la sensibilità unica nella decorazione di interni, per la voglia di cambiare, sempre ai massimi livelli.

made in italy

The focal point of Gardenia's vision has always been the home, a living space yet also an environment, a territory. This is why the Gardenia group's production, from design to all phases of the production process, is concentrated in Italy. The company's history is the history of a country, a language. This is where the innovation and exclusivity of its products come from. And it is here that Gardenia has its home, it is here that in 1997 it began an important partnership with Versace, a brand that Gardenia shares many values with: the importance of design, the unique sensitivity in interior design, the design for change, always at the highest quality levels.

made in italy

Le cœur de la vision de Gardenia a toujours été la maison, considérée non seulement comme espace d'habitation mais aussi comme environnement et territoire. Pour cette raison, la production du groupe Gardenia est concentrée en Italie, depuis la conception jusqu'à chacune des phases du processus de production. L'histoire de l'entreprise est l'histoire d'un pays, d'un langage. De là proviennent l'innovation et l'exclusivité de ses produits. C'est en Italie que l'entreprise Gardenia a son siège et qu'elle débute son importante alliance avec Versace, une marque avec laquelle elle a de grandes affinités pour l'importance attribuée au design, pour la sensibilité unique dans la décoration d'intérieurs et pour l'envie de changer, toujours à des niveaux très élevés.

hecho en italia

El fulcro de la visión de Gardenia siempre ha sido el hogar, entendido como espacio habitacional y también como entorno y territorio. Por eso la producción del grupo Gardenia se ha concentrado en Italia, desde el diseño a cada fase del proceso productivo. La historia de la empresa es la historia de un país, de una lengua. De aquí procede la innovación y exclusividad de sus productos. Es aquí donde Gardenia tiene su casa y es aquí donde en 1997 comienza su importante colaboración con Versace, una marca con la que Gardenia posee una gran afinidad: por la importancia atribuida al diseño, por la sensibilidad única en la decoración de interiores, por las ganas de cambiar, siempre al nivel más alto.

made in italy

Der Kern der Vision von Gardenia war immer das Haus im Sinne eines Wohnraums, aber auch als Umgebung oder als Bereich. Deshalb ist die Produktion der Gruppe Gardenia in Italien konzentriert, von der Planung bis hin zu allen Phasen des Produktionsprozesses. Die Geschichte der Firma ist die Geschichte eines Landes, einer Sprache. Von hierher stammen die Innovation und Exklusivität ihrer Produkte. Hier ist Gardenia zuhause, und hier begann 1997 die bedeutende Partnerschaft mit Versace, einer Marke, mit der Gardenia Vieles verbindet: Aufgrund der Bedeutung, die dem Design beigemessen wird, der einzigartigen Sensibilität bei der Dekoration der Innenräume und der Lust auf Veränderung, immer auf höchstem Niveau.

made in italy

В центре концепции компании Gardenia был всегда дом, как жилое пространство, но в то же время воспринимаемый как среда, как территория. Именно поэтому все производство группы Gardenia сконцентрировано в Италии, от этапа проектирования до производственного процесса. История компании – это и история страны, национального языка. Она служит источником для инноваций и эксклюзивности ее продукции. Дом компании Gardenia находится именно в Италии, и именно здесь в 1997 году началось важное сотрудничество с Versace – брендом, с которым у группы Gardenia много общего: это особое внимание, уделяемое дизайну, уникальный тонкий вкус в отделке интерьера, стремление к постоянному обновлению, постоянный высочайший уровень.

意大利制造

Gardenia集团的视野核心一直是家居，它可以理解为生活空间，但也可以理解为环境、领域。因此，Gardenia集团的生产集中在意大利，从设计到生产过程的每一个阶段，全部在意大利完成。企业的历史是一个国家的历史，一门语言的历史。产品的创新和独特性正是由此而来。Gardenia集团的家正是由此建成，而集团正是由此于1997年开始与范思哲品牌的强强合作。Gardenia集团与该品牌具有众多共同点：对设计的高度重视，对室内装饰的独特感受，对改变的强烈渴望，总是在最高程度。

New technologies

La costante ricerca di Gardenia su materiali, finiture, decorazioni e tendenze ha portato l'azienda ad un costante rinnovamento.

Negli ultimi anni Gardenia ha subito una profonda ristrutturazione introducendo sistemi innovativi per la produzione di grandi formati e sistemi di stampa digitale ad alta risoluzione, sperimentati per la prima volta in Italia.

Ricerca e sviluppo 2020

DDG, decoratrice digitale a secco, è la denominazione della nuova tecnologia per deposizione di materie ceramiche sulla superficie di ogni materiale. Questo rivoluzionario processo produttivo consente di applicare differenti materie sincronizzandole e integrandole perfettamente con la grafica sottostante realizzata con tecnologia digitale ad alta definizione. Attraverso la combinazione di queste due tecnologie applicative, si ottengono soluzioni sino ad ora inedite combinando matericità ed estetica con ampia variabilità, conferendo ad ogni elemento un autentico valore sensoriale.

about us

new technologies

The constant research focused on materials, finishes, decorations and trends has driven the continual progress of Gardenia. Over recent years, Gardenia has undergone a profound refurbishment introducing innovative large-sized tile manufacturing processes and high-resolution digital printing systems, all of which are implemented for the first time in Italy.

Research and Development in 2020

Digital Dry Decorator (DDG) is the name of the new technology for depositing ceramic materials on the surface of all materials. This revolutionary production process is used to apply a variety of materials, synchronising and integrating them perfectly with the underlying graphics made using high-definition digital technology. New solutions are obtained by combining these two application technologies to achieve unique results in terms of textures and appearance, adding real sensory value to each element.

neue Technologien

Dank der ständigen Forschung von Gardenia bezüglich der Materialien, Oberflächenausführungen und Trends erlebt die Firma eine ständige Erneuerung. In den letzten Jahren hat Gardenia eine wichtige Restrukturierung in Gang geleitet, indem sie innovative Systeme für die Produktion der großen Formate und den hochauflösenden Digitaldruck - den sie in Italien als Erste verwendet hat - eingeführt hat.

Forschung und Entwicklung 2020

Mit der digitalen Trockendekormaschine (DDG) wird eine neue Technologie zur Ablagerung von keramischen Materialien auf der Oberfläche jedes Materials erschlossen. Dieser revolutionäre Produktionsprozess ermöglicht es, verschiedene Materialien zu verwenden, die perfekt mit den zugrundeliegenden Grafiken, die mit hochauflösender digitaler Technologie hergestellt wurden, synchronisiert und integriert werden. Durch die Kombination dieser beiden Anwendungstechnologien werden bisher unverfügbare Lösungen durch die Kombination von Stofflichkeit und Ästhetik mit großer Variabilität erzielt, die jedem Element einen echten sensorischen Wert verleihen.

новые технологии

Благодаря постоянным исследованиям новых материалов, отделок, декоров и тенденций компания Gardenia находится в непрерывном процессе обновления. В последние годы компания Gardenia провела существенную реструктуризацию предприятия и ввела новые инновационные системы по производству плитки большого формата и системы цифровой печати с высокой степенью разрешения, которую компания первой внедрила в Италии.

Исследования и разработки 2020

Система цифровой печати DDG - это новая технология для нанесения керамических веществ на поверхность любого материала. Этот инновационный процесс производства позволяет наносить разные вещества, синхронизируя их и безупречно интегрируя с базовой графикой, созданной с использованием цифровой технологии с высокой степенью разрешения. Комбинация этих двух технологий приводит к уникальным результатам, объединяющим характеристики материала с эстетикой и придающим аутентичную ценность каждому отдельному элементу.

nouvelles technologies

La recherche continue de Gardenia sur les matériaux, sur les finitions, sur les décorations et sur les tendances a conduit l'entreprise à vivre dans un renouvellement continu. Ces dernières années, Gardenia a entrepris une importante restructuration, à commencer par la production de grands formats et de systèmes d'impression numérique haute résolution, expérimentés par la première fois en Italie.

Recherche et développement 2020

DDG, machine d'impression numérique à sec : tel est le nom de la nouvelle technologie par dépôt de céramique sur la surface de n'importe quel matériau. Ce processus de production révolutionnaire permet d'appliquer différentes matières en les synchronisant et en les intégrant parfaitement au graphisme en dessous, réalisé avec des technologies numériques haute résolution. Une combinaison de ces deux technologies d'application permet d'obtenir des solutions inédites, en associant l'aspect matériel et esthétique à la variabilité, donnant ainsi à chaque élément une authentique valeur sensorielle.

* Il Crux è caratterizzato da forte stonizzazione, si consiglia di scegliere da più scatole contemporaneamente e di posare una porzione di materiale a secco per garantire la variabilità e casualità della superficie finita. • Crux has a strong graphic variation, we recommend to choose few pieces at the same time from different boxes and to lay them dry first in order to grant the correct variability and randomness as an end result. • Le Crux est un produit fort nuancé. Nous conseillons, au moment de la pose, de sortir les carreaux de plusieurs boîtes en même temps et de poser une portion de sol avant encollage pour garantir la variabilité et causalité de la surface posée. • Das Crux zeichnet sich durch ein starkes Farbspiel aus, es ist empfehlenswert, aus mehreren Kartons gleichzeitig zu wählen und einen Teil des Materials ohne Klebstoff zu verlegen, um die Variabilität und Zufälligkeit der fertigen Oberfläche zu gewährleisten. • El Crux es un producto muy destinalizado, nosotros recomendamos de elegir algunas piezas de diferentes cajas al mismo tiempo y de colocarle ante de pegar para asegurar la variabilidad y casualidad del resultado final. • Crux продукт с сильными цветовыми изменениями. Для оптимальной укладки необходимо смешивать плитки из разных коробок и сделать пробную укладку на сухую, чтобы гарантировать большую вариабильность поверхности. • 克拉克灰色具有很强的石材效果，为了突出铺贴后的多面性及随机性，建议同时从多个包装箱中取出材料并事先干铺一部分。

Once the slab is in position, excess air should be removed completely by tapping it either manually or mechanically using the appropriate trowel, starting from the centre and moving out towards the sides.
Après la pose, pour éliminer totalement l'air emprisonné sous le carreau, le frapper, manuellement ou mécaniquement, avec une taloche anti-rebond prévue à cet effet, en procédant du centre vers les bords.
Sobald die Platte abgelegt wurde muss, um überschüssige Luft austreten zu lassen, ein Anklopfen erfolgen. Dies kann entweder von Hand oder mechanisch mit einem Putzbrettchen mit Rückprallschutz erfolgen, dabei muss von der Mitte nach Außen vorgegangen werden.
Una vez acomodada la placa, para eliminar por completo el exceso de aire, hay que golpear la superficie, de forma manual mecánica, con una llana antirrebote, procediendo del centro hacia los lados.
После того как плитка будет уложена на основу, для удаления лишнего воздуха необходимо постучать по плитке специальной киянкой без отскока, ручной или механической, в направлении от центра к внешним краям.
当大板就位，为了消除空气，无论手工还是机械都需要使用合适工具轻敲，从中心向四周移动

- Ogni applicazione di detergenti, acidi o solventi deve essere seguita da abbondante risciacquo e accurata asciugatura.
- Non usare mai sostanze contenenti Acido Fluoridrico. Vi ricordiamo che smacchiatori spray e antiruggine spesso contengono Acido Fluoridrico.
- Prima dell'utilizzo di prodotti per la pulizia, in particolare di quelli a base acida, effettuare una prova su una piccola porzione nascosta della superficie da trattare.

IMPORTANT.

- Use chemical products with extreme caution. Follow carefully the specific instructions for each product.
- Always rinse and wipe dry thoroughly after using any detergent, acid or solvent.
- Never use products containing fluorhydric acid. Stain remover and rust remover sprays often contain fluorhydric acid.
- Before using any cleaning product, especially acidic products, test on a small concealed areas of the surface to be treated beforehand.

WICHTIG.

- Üben Sie höchste Vorsicht bei dem Gebrauch von chemischen Produkten und befolgen Sie die für jedes Produkt vorgesehenen Gebrauchsanweisungen.
- Nach jeder Anwendung von Reinigungsmitteln, Säuren oder Lösungsmitteln muss die Oberfläche mit reichlich Klarwasser nachgespült und sorgfältig getrocknet werden.
- Verwenden Sie niemals fluorwasserstoffsäurehaltige Substanzen. Wir erinnern daran, dass Fleckentfernerspray und Rostentferner häufig Fluorwasserstoffsäure enthalten.
- Vor dem Gebrauch der Reinigungsprodukte, insbesondere säurehaltige Mittel, sollten Sie eine kleine, versteckte Stelle auf der zu behandelnden Oberfläche vortesten.

ВАЖНО.

- Рекомендуется максимальная осторожность в использовании химических продуктов, внимательно следовать инструкциям по применению для каждого продукта.
- Каждое применение чистящих средств, кислот или растворителей должно сопровождаться обильным споласкиванием и тщательной сушкой.
- Никогда не использовать вещества, содержащие фтористоводородную кислоту. Напоминаем вам, что пятновыводители в виде спрея и антижавчина часто содержат фтористоводородную кислоту.
- Перед использованием продуктов для очистки, в особенности на кислотной основе, провести испытание на небольшой скрытой части поверхности, которую необходимо обработать.

IMPORTANT.

- Nous vous conseillons d'être extrêmement vigilant lors de la manipulation de produits chimiques. Respectez à la lettre le mode d'emploi de chaque produit.
- Après l'utilisation de nettoyeurs, d'acides ou de solvants, vous devez obligatoirement rincer à grande eau et bien sécher.

- Toda aplicación de detergentes, ácidos o disolventes ha de ir seguida de un aclarado abundante y un secado esmerado.
- No usar nunca sustancias que contengan Ácido Fluorhídrico. Les recordamos que los quitamanchas en spray y antióxidos contienen a menudo Ácido Fluorhídrico.
- Antes de utilizar productos para la limpieza, especialmente los de base ácida, efectuar una prueba sobre una pequeña porción oculta de la superficie a tratar.

重要事項.

- 建议使用化学产品时高度小心，应仔细遵循每一产品的使用说明。
- 每次使用酸性或稀释清洁剂后，必须用大量的水冲洗并仔细抹干。
- 千万不能使用含氢氟酸的物质。我们提醒您喷雾去污剂和防锈剂通常含有氢氟酸。
- 使用清洁产品前，特别是酸性产品时，必须在待施工表面的一小块隐蔽之处尝试使用。
