# Contemporary colors and surfaces.

Considered a peer of the finest marbles, travertine is actually a stone. This dual marble-stone identity is expressed in Marvel Travertine in the two variants of Vein Cut and Cross Cut. The Vein Cut reproduces the striped appearance typical of travertine, while the Cross Cut shows off its rich colors with a stone-look surface characterized by extensive shading.

Ricordato al pari dei marmi più pregiati, il travertino è in realtà una pietra. Questa duplice identità marmo-pietra si esprime in Marvel Travertine nelle due varianti Vein Cut e Cross Cut. Il taglio Vein Cut riproduce il tipico aspetto striato del travertino, mentre il taglio Cross Cut ne valorizza la ricchezza cromatica con una superficie dall'aspetto pietra caratterizzata da sfumature estese.

Reconnu au même titre que les plus beaux marbres, le travertin est en fait une pierre. Cette double identité de la pierre marbrière est exprimée dans le Marvel Travertine dans les deux variantes Vein Cut et Cross Cut. La coupe Vein Cut reproduit l'aspect strié typique du travertin, tandis que la coupe Cross Cut renforce sa richesse chromatique avec une surface d'aspect pierreuse caractérisée par des ombres étendues.

Travertin ist ein Stein, der den feinsten Marmorsorten in nichts nachsteht. Diese doppelte Identität Marmor/Stein kommt in Marvel Travertine in den beiden Varianten Vein Cut und Cross Cut zum Ausdruck. Der Schliff Vein Cut bringt das typische gestreifte Erscheinungsbild von Travertin hervor, während der Schliff Cross Cut den Farbreichtum mit einer steinähnlichen Oberfläche, die sich durch starke Schattierungen auszeichnet, hervorhebt.

El travertino goza del mismo reconocimiento que los mármoles más finos, pero en realidad es una piedra. Esta piedra de mármol de doble identidad se expresa en Marvel Travertine en las dos variantes Vein Cut y Cross Cut. El corte Vein Cut reproduce el típico aspecto estriado del travertino, mientras que el corte Cross Cut realza su riqueza cromática con una superficie de aspecto piedra caracterizada por un amplio sombreado.

Травертин напоминает мрамор, но на самом деле является камнем. Эта двойная натура, мрамора и камня, отражается в Marvel Travertine в двух вариантах рисунка распила: Vein Cut и Cross Cut. Распил Vein Cut передает характерный полосатый облик травертина, а Cross Cut имеет богатую пятнистую окраску с обширными оттенками.

Inspired by the ancient Japanese art of folding paper, the mosaic creates the optical illusion of diamonds emerging from a flat surface.

Inspirato all'antica arte giapponese di piegare la carta, il mosaico crea l'illusione ottica di rombi che emergono dalla superficie piana.

Inspirée de l'ancien art japonais du pliage du papier, la mosaïque crée l'illusion optique de formes en diamant émergeant de la surface plane.

Inspiziert von der alten japanischen Kunst des Papierfaltens, erzeugt das Mosaik die optische Täuschung von Diamantformen, die aus der flachen Oberfläche hervortreten.

# Chiselled Urban Grid

Designed by **HBA**

Inspired by the geometric urban pattern of metropolitan cities, the decor features a succession of linear incisions.

Inspiré par les schémas urbains géométriques des métropoles, le décor est défini par une succession d'incisions linéaires.

Inspirada en los esquemas urbanos geométricos de las ciudades metropolitanas, la decoración se define por una sucesión de incisiones lineales.

Inspirato agli schemi urbanistici geometrici delle città metropolitane, il decoro è definito dal susseguirsi di incisioni lineari.

Inspiriert von den geometrischen Grundrissen der Großstädte, wird das Dekor durch eine Abfolge von linearen Einschnitten bestimmt.

Декор, напоминающий геометрический облик мегаполисов, предлагает последовательность линейных насечек.

Traditional anti-slip surface

The innovative Sensitech Surface

The profile of standard anti-slip surfaces has an accentuated alternation of peaks and hollows, which generates friction and increases slip resistance, but also results in very rough surfaces. In Sensitech, special micro-particles fill hollows, leaving the anti-slip performance intact, while the surface is levelled and smoothed. These qualities make cleaning easier because it is less likely to retain dust and dirt.

El número del gráfico, indicado como G1, G2, G3, etc., está impreso en el borde del lado 278 y se indica mediante un adhesivo en la losa. Para reconstruir la superficie con continuidad de vetas, basta con colocar las losas en progresión numérica: G1, G2, G3, etc. - Kit Endless - это комплект, который содержит все плиты, необходимые для составления композиции с непрерывным рисунком прожилок. Все плиты пронумерованы и находятся в одном ящике. Номер плиты, обозначенный как G1, G2, G3 и т.д., напечатан на торце грани 278 и указан также на наклейке в углу плиты. Чтобы при облицовке создать рисунок с непрерывающимися прожилками, необходимо просто уложить плиты в последовательности: G1, G2, G3 и т.д.

**(5) A polished finish is recommended for low-stress residential or commercial floors where anti-slip performance is not required. The surface's shine and superior ease of cleaning are the result of in-depth studies and extensive technical research aimed at ensuring its durability over time. If the product is in direct contact with the outside, use moisture and dirt absorption devices to prevent scratches. Small irregularities on the surface are an intrinsic feature of the product, intended to imitate the surfaces of natural stone.** La finitura lappata è indicata per pavimenti residenziali o commerciali poco sollecitati, laddove non siano richieste prestazioni antiscivolo. La lucentezza e l'elevata facilità di pulizia della superficie sono frutto di studi approfonditi e accurate ricerche tecniche volte a garantirne la persistenza nel tempo. Se il prodotto è a diretto contatto con l'esterno, prevedere dei dispositivi di assorbimento dell'umidità e dello sporco per prevenire la formazione di graffi. Piccole irregolarità superficiali sono una caratteristica intrinseca del prodotto, volte ad imitare le superfici delle pietre naturali. - La finition semi-polie est indiquée pour les sols résidentiels ou commerciaux à faibles contraintes, où la caractéristique antidérapante n'est pas nécessaire. La brillance et la grande facilité de nettoyage de la surface sont le résultat d'études approfondies et de recherches techniques précises visant à assurer sa pérennité dans le temps. Si le produit est en contact direct avec l'extérieur, prévoir des dispositifs d'absorption de l'humidité et des poussières pour prévenir la formation de rayures. Les petites irrégularités superficielles sont une caractéristique intrinsèque du produit et visent à imiter la surface de la pierre naturelle. - Die Oberflächenversion Geläppt eignet sich für Bodenbeläge in Wohnbereichen bzw. in gering beanspruchten Gewerberäumen, wenn keine Rutschfestigkeit erforderlich ist. Der Glanz und die einfache Reinigung der Oberfläche sind das Resultat eingehender technischer Studien, mit denen die langfristige Beständigkeit sichergestellt wurde. Kommt das Produkt direkt mit der externen Umgebung in Kontakt, so sind Feuchtigkeit und Schmutz mit geeigneten Mitteln aufzunehmen, um Kratzer zu vermeiden. Kleine Unregelmäßigkeiten der Oberflächen sind typisch für das Produkt, das die Oberflächen von Natursteinen nachempfunden. - El acabado laseado es adecuado para pavimentos residenciales o comerciales con poco tráfico, donde no se requiere un efecto antideslizante. El brillo y la gran facilidad de limpieza de la superficie son el resultado de profundos estudios e investigaciones técnicas precisas para asegurar su persistencia en el tiempo. Si el producto está en contacto directo con el exterior, proporcionar dispositivos de absorción de humedad y suciedad para evitar arañazos. Pequeñas irregularidades superficiales son una característica intrínseca del producto, diseñadas para imitar las superficies de las piedras naturales. - Лапатированная поверхность рекомендована для полов жилых и коммерческих помещений с невысокой интенсивностью эксплуатации, в которых от покрытий не требуется характеристик сопротивления скольжению. Блеск и легкая очищаемость являются результатом глубоких исследований, направленных на создание долговечного материала. Если плитка находится в непосредственном контакте с наружной средой, необходимо предусмотреть устройства поглощения влаги и грязи во избежание образования царапин. Небольшие неровности поверхности являются характеристикой данного изделия и призваны имитировать поверхность природного камня.
