# Marazzi, Human Design

**IT** Le case, gli edifici, le città, sono spazi vuoti senza le persone che li abitano. Con questa consapevolezza, da più di ottanta anni Marazzi progetta e produce superfici in ceramica in cui il pragmatismo incontra la bellezza, la novità corona la tradizione e la tecnologia si mette al servizio delle persone. Alle tecnologie esclusive, alla solidità e all'affidabilità di Marazzi, si affiancano lo stile, il gusto, la passione per la ceramica e l'amore per la bellezza. Perché dove finisce il design, cominciano sempre le emozioni.

**EN** Without the people who live in, homes, buildings and towns are nothing but empty spaces. Aware of this, for more than eighty years Marazzi has designed and produced ceramic surfaces where pragmatism meets beauty, innovation completes tradition, and technology is shaped to human needs. Marazzi's exclusive technologies, high standards and reliability are matched with style, taste, a passion for ceramics and a love of beauty. Because when design ends emotion always begins.

**FR** Sans les personnes qui les habitent, les maisons, les édifices et les villes ne sont que des espaces vides. C'est précisément dans cette optique que s'inscrit Marazzi : depuis plus de quatre-vingts ans, nous concevons et produisons des surfaces en céramique où le fonctionnel rencontre la beauté, la nouveauté parachève la tradition et la technologie se met au service de l'homme. Les technologies exclusives, la solidité et la fiabilité de Marazzi reposent sur le style, sur le goût, sur la passion de la céramique et l'amour du beau. Car là où finit le design commencent toujours les émotions.

**DE** Ohne Menschen, die sie bewohnen, sind Häuser, Gebäude, Städte nichts als leerer Raum. Mit diesem Bewusstsein gestaltet und produziert Marazzi seit über achtzig Jahren keramische Beläge, in denen Funktionalität auf Schönheit trifft, Neues die Tradition auf den Punkt bringt und Technologie in den Dienst des Menschen tritt. Marazzi vereint exklusive Verfahrenstechniken, Kompetenz und Zuverlässigkeit mit Stil und Geschmack, Leidenschaft für Keramik und Liebe zur Schönheit. Denn wo das Design endet, beginnt die Emotion.

**ES** Las casas, los edificios, las ciudades... son espacios vacíos, en ausencia de las personas que los habitan. Consciente de ello, desde hace más de ochenta años Marazzi diseña y fabrica superficies de cerámica en las que el pragmatismo se une a la belleza, la novedad corona la tradición y la tecnología se pone al servicio de las personas. A las tecnologías exclusivas, la solidez y la fiabilidad de Marazzi, se añaden el estilo, el gusto, la pasión por la cerámica y el amor por la belleza. Porque, donde termina el diseño, siempre empiezan las emociones.

**RU** Дома, здания, города - все они являются пустыми пространствами, без проживающих в них людей. Исходя из этого, вот уже более восьмидесяти лет Marazzi создает и производит керамические материалы, в которых прагматизм сочетается с красотой, новизна совершенствует традиции, а технология идет на службу людям. Рядом с эксклюзивными технологиями, прочностью и надежностью Marazzi стоят стиль, вкус, увлечение керамикой и любовь к красоте. Потому что там, где кончается дизайн, всегда начинаются эмоции.

Ph. Dean Kaufman

# History

**IT** 1935. Nasce, struttura provvisoria, montata su file parallele di pioppi, la prima fabbrica Marazzi. Produce ceramiche da rivestimento decorate a mano. La ricerca di soluzioni inedite, già negli anni 50, conduce Marazzi alla prima collaborazione tra ceramica e design: Gio' Ponti e Alberto Rosselli firmano, nel 1960, la piastrella 4 volte curva 'Triennale'. È l'inizio di un dialogo che fa incontrare nel Centro Stile e nei laboratori Marazzi, per la prima volta, ricerca ceramica e grandi firme della moda, dell'arte, del design, dell'architettura, con cui nascono, nel tempo, nuovi prodotti e nuove modalità espressive della ceramica, interpretate da grandi maestri della fotografia internazionale. Oggi, Marazzi continua ad avvalersi di collaborazioni eccellenti e a tradurre le tendenze dell'abitare in ceramiche uniche ed esclusive apprezzate in tutto il mondo.

**EN** 1935. The first Marazzi factory is born, a temporary structure supported by parallel lines of poplar trees. It produces hand-decorated wall tiles. As early as the 1950s, Marazzi's focus on new, original solutions is already generating the first partnership between ceramic coverings and fine design: in 1960, Gio Ponti and Alberto Rosselli shape the 4 curves "Triennale" tile. It is the start of a dialogue which brings together cutting-edge ceramic coverings and top names from fashion, art, design and architecture in the Marazzi Style Centre and laboratories, gradually creating new products and new expressive languages for ceramics, interpreted by leading international photographers. Today, Marazzi is still working with outstanding names and translating the latest home design trends into unique, exclusive ceramic coverings, known all over the world.

**FR** 1935. Construction de la première usine Marazzi, une structure provisoire sur des rangées parallèles de peupliers. Elle produit des carreaux de mur décorés à la main. En quête de solutions

inédites dès les années cinquante, Marazzi instaure la première collaboration entre céramique et design: Gio Ponti et Alberto Rosselli signent, en 1960, le carreau quatre fois courbe « Triennale ». Dans le Centre de style et les laboratoires Marazzi, c'est le début d'un dialogue entre recherche céramique et grands noms de la mode, de l'art, du design et de l'architecture: il se traduira par la création de nouveaux produits et de nouveaux modes d'expression de la céramique, interprétés par de grands maîtres de la photographie internationale. Aujourd'hui, Marazzi continue à nouer de collaborations d'excellence et à traduire les tendances de l'habitat par des céramiques uniques et exclusives, appréciées dans le monde entier.

**DE** 1935. Die erste Marazzi Fabrik entsteht. Sie ist noch eine provisorische Konstruktion auf parallel verlaufenden Pappelreihen, in der handdekorierte, keramische Wandfliesen produziert werden. Auf der Suche nach neuen Wegen begründet Marazzi bereits in den 50er Jahren die erste Kooperation zwischen Keramik und Design. So entsteht 1960 die viermal gebogene Fliese „Triennale“ von Gio Ponti und Alberto Rosselli. Diese Kooperation gibt den Anstoß für einen Dialog, der in den Design- und Entwicklungsabteilungen von Marazzi erstmals Keramikforschung mit großen Namen aus Mode, Kunst, Design und Architektur vereint und neue keramische Produkte und Ausdrucksformen - kunstvoll abgeleitet von weltweit berühmten Fotografen - hervorbringt. Marazzi setzt heute die Zusammenarbeit mit erstklassigen Partnern fort und gestaltet, unter Umsetzung aktueller Wohn- und Stiltrends, exklusive keramische Produkte, die weltweit begehrt sind.

**ES** 1935. Nace, como estructura provisional, montada sobre líneas paralelas de álamos, la primera fábrica de Marazzi. Produce cerámicas para revestimiento decoradas a mano.

La búsqueda de soluciones inéditas, ya desde los años 50, lleva a Marazzi a la primera colaboración entre la cerámica y el diseño: en 1960 Gio Ponti y Alberto Rosselli conciben el azulejo «Triennale», cuatro veces curvo. Es el comienzo de un diálogo que en el Centro de Diseño y en los laboratorios de Marazzi se involucran por vez primera a la investigación, a las grandes firmas de la moda, el arte, el diseño y la arquitectura, con las que van naciendo, a lo largo de los años, nuevos productos y nuevas formas expresivas de la cerámica, interpretadas por grandes maestros de la fotografía internacional. Hoy, Marazzi sigue sirviéndose de colaboraciones excelentes e interpretando las tendencias del habitat para darles formas cerámicas únicas y exclusivas, apreciadas en el mundo entero.

**RU** 1935. Появляется на свет первый завод Marazzi, представляющий собой временное строение, опирающееся о параллельные ряды тополей. Он производит облицовочную керамику, украшенную вручную. Уже в 50 годах поиск оригинальных решений впервые подталкивает Marazzi к налаживанию сотрудничества керамики с дизайном: в 1960 году Джо Понти и Альберто Росселли создают плитку 'Triennale' с закруглениями по 4 сторонам. В дизайнерском центре и в лабораториях Marazzi это стало началом общения керамических исследователей с великими именами из мира моды, искусства, дизайна и архитектуры. С течением времени это сотрудничество привело к созданию новой продукции и новой выразительности керамики, над которыми работали великие мастера мира высокой международной фотографии. Сегодня Marazzi продолжает работать с выдающимися мастерами, превращая новые тенденции в сфере жилья в уникальную, эксклюзивную керамическую продукцию, снискавшую высокую оценку во всем мире.

# Berengo Gardin per Marazzi

**IT** Nato a Santa Margherita Ligure nel 1930, Gianni Berengo Gardin ha iniziato a occuparsi di fotografia nel 1954. Dopo aver vissuto a Roma, Venezia, Lugano e Parigi, nel 1965 si è stabilito a Milano dedicandosi alla fotografia di reportage, di architettura, di descrizione ambientale e sociale. Ha collaborato con le principali testate italiane ed estere, ma si è dedicato soprattutto alla realizzazione di libri, con oltre 250 volumi fotografici all'attivo e 350 mostre personali in Italia e all'estero. Ha collaborato con l'industria realizzando reportage e monografie aziendali. Nel 1977, Marazzi chiama Berengo Gardin a documentare le nuove linee produttive veloci, risultato di un vero salto tecnologico attraverso il processo della monocottura rapida.

**EN** Born at Santa Margherita Ligure in 1930, Gianni Berengo Gardin started his career as a photographer in 1954. After living in Rome, Venice, Lugano and Paris, in 1965 he settled in Milan, working in photographic reportage and also focusing on architecture and environmental and social description. He has worked for the leading Italian and foreign newspapers, but has concentrated above all on book production, with over 250 volumes of photographs and 350 oneman exhibitions in Italy and abroad to his credit. He has undertaken various industrial assignments to produce corporate photographic records and commemorative volumes. In 1977, Marazzi invited Berengo Gardin to document its new highspeed production lines, the result of a genuine technological leap forward achieved through the fast single-firing process.

**FR** Né à Santa Margherita Ligure en 1930, Gianni Berengo Gardin fait ses débuts dans la photographie en 1954. Après avoir vécu à

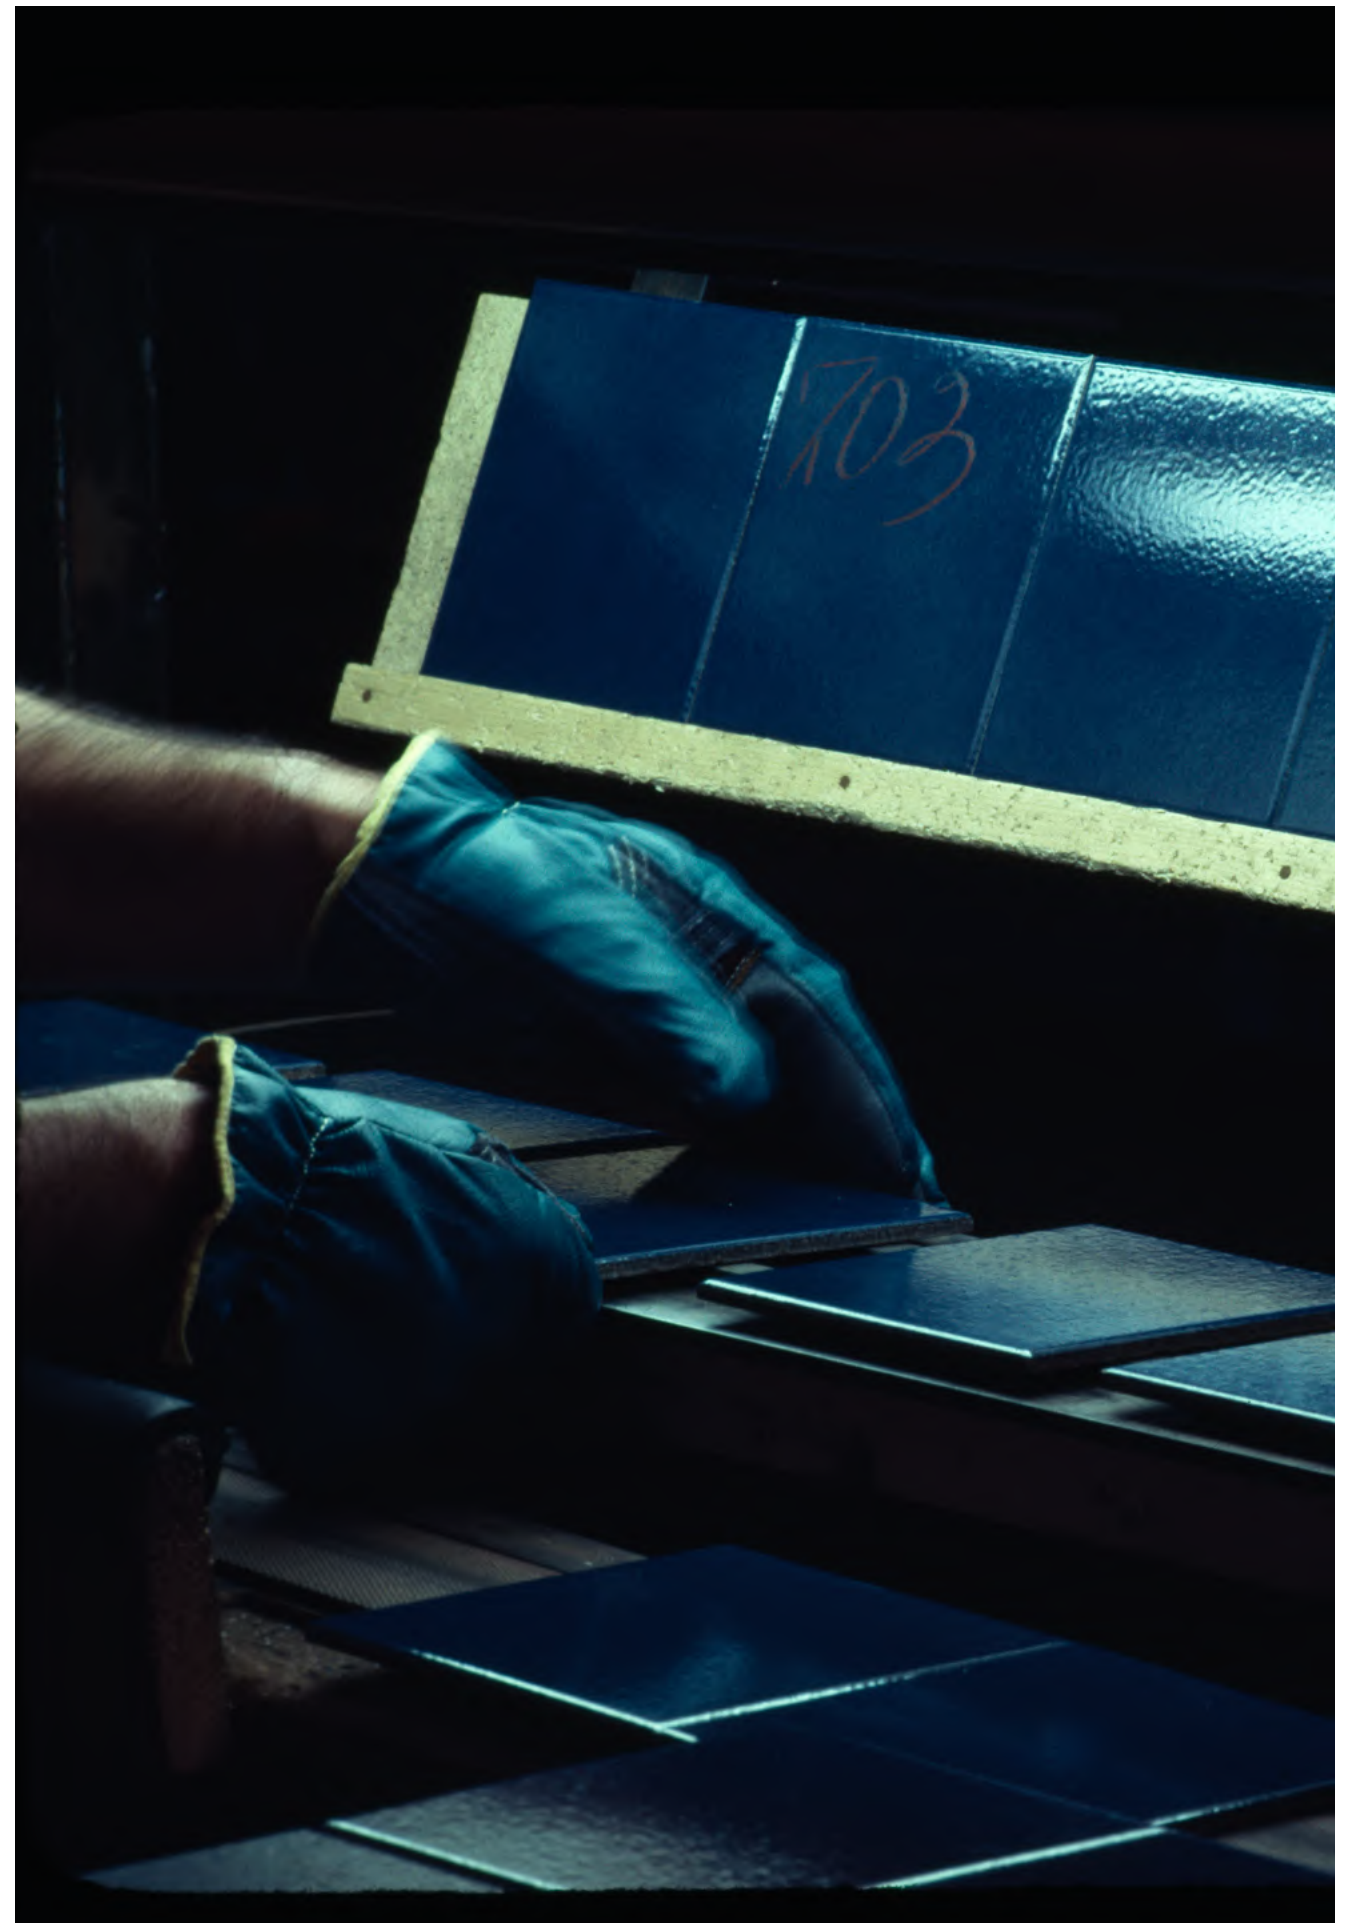

Rome, Venise, Lugano et Paris, en 1965, il s'installe à Milan et se consacre à la photographie de reportage, d'architecture ainsi qu'à la représentation de la réalité environnementale et sociale. Il collabore avec les plus grands journaux italiens et étrangers, mais se consacre principalement à la réalisation de livres, avec plus de 250 ouvrages photographiques à son actif et 350 expositions personnelles en Italie et à l'étranger. Il collabore avec l'industrie, pour laquelle il a réalisé des reportages et des monographies d'entreprise. En 1977, Marazzi fait appel à Berengo Gardin pour documenter les nouvelles lignes de production rapides, véritable bond technologique à travers le procédé de la monocuisson rapide.

**DE** Gianni Berengo Gardin wurde 1930 in Santa Margherita Ligure geboren und begann 1954, sich mit Fotografie zu beschäftigen. Nach Aufenthalt in Rom, Venedig, Lugano und Paris ließ er sich 1965 in Mailand nieder und widmete sein fotografisches Wirken den Themen Reportage, Architektur, Umwelt und Gesellschaft. Er arbeitete mit bedeutenden italienischen und ausländischen Zeitungen zusammen, sein Schwerpunkt lag jedoch auf der Produktion von Büchern, mit über 250 Fotobänden. Seine Werke wurden in 350 Einzelausstellungen in- und außerhalb Italiens gezeigt. Für die Industrie fertigte er Reportagen und Unternehmensmonografien an. Marazzi beauftragte Berengo Gardin im Jahr 1977 mit einer Dokumentation über die neuen schnellen Produktionslinien, die im schnellen Einbrandverfahren einen wahren Technologiesprung zeitigten.

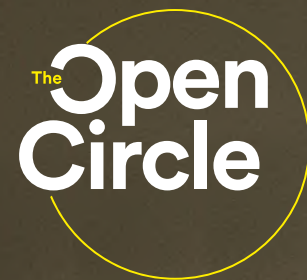

**ES** Nacido en Santa Margherita Ligure en 1930, Gianni Berengo Gardin comenzó a dedicarse

a la fotografía en 1954. Tras vivir en Roma, Venecia, Lugano y París, en 1965 se afincó en Milán para dedicarse a la fotografía de reportaje, de arquitectura y de descripción ambiental y social. Colaboró con las principales publicaciones italianas y extranjeras, pero sobre todo se ocupó de la realización de libros, con más de doscientos cincuenta volúmenes fotográficos en su haber y trescientas cincuenta exposiciones personales en Italia y el extranjero. Colaboró con la industria efectuando reportajes y monografías de empresas. En 1977, Marazzi le encomienda a Berengo Gardin que documente las nuevas y ágiles líneas de fabricación, resultado de un auténtico salto tecnológico a través del proceso de la monococción rápida.

**RU** Джанни Беренго Гардин родился в 1930 году в Санта-Маргерита-Лигуре, и в 1954 году начал увлекаться фотографией. Пожив в Риме, Венеции, Лугано и Париже, в 1965 году он обосновался в Милане и посвятил себя репортажной съемке, фотографии архитектуры, фотоописаниям природы и социальной сферы. Он сотрудничал с основными итальянскими и зарубежными изданиями, но посвятил себя в особенности книгам, имея на сегодня в своем активе более 250 фотоальбомов и 350 проведенных персональных выставок в Италии и за рубежом. Он сотрудничал с промышленными предприятиями, готовя репортажи и монографии о компаниях. В 1977 году Marazzi пригласила Беренго Гардин, чтобы он запечатлел новые скоростные производственные линии, которые представляли собой настоящий технологический прорыв, используя процесс быстрого однократного обжига.

# Sustainability

**IT** Il Gruppo Marazzi, da ormai molto tempo, è portavoce di un'industria ecosostenibile con sistemi, processi e prodotti certificati secondo i più severi standard internazionali. A partire dal brevetto della monocottura negli anni '70, ha contribuito in modo determinante a diminuire l'utilizzo di risorse necessarie per la produzione e a fare dell'industria ceramica una produzione a ciclo chiuso, in cui tutto viene recuperato e reimmesso in circolo. Nel 2022, Marazzi ha ottenuto la Certificazione ISO 17889-1, prima norma ISO in materia di sostenibilità nel settore delle costruzioni a livello mondiale che ha definito per la prima volta un sistema di valutazione utilizzando 38 criteri qualitativi e quantitativi, identificati e suddivisi secondo i tre pilastri della sostenibilità: ambientale, sociale ed economica.

**EN** The Marazzi Group is a long-established proponent of eco-sustainable industry, with systems, processes and products certified under the strictest international standards. Ever since it patented the single-firing process in the '70s, it has made a vital contribution to reducing the use of resources needed for production and evolving the ceramics industry towards closed-cycle manufacturing, in which everything is recovered and put back into circulation. In 2022 Marazzi was awarded Certification under ISO 17889-1, the world's first ISO sustainability standard for the construction industry, which introduced a ground-breaking assessment system using 38 qualitative and quantitative criteria, identified and categorised according to the three pillars of sustainability: environmental, social and economic.

**FR** Le Groupe Marazzi est le porte-parole de longue date d'une industrie écologiquement durable, qui s'est dotée de systèmes, processus et produits certifiés selon les normes internationales les plus strictes. Depuis son brevet de la monocuisson des années 1970, il a contribué de manière décisive à

réduire l'utilisation des ressources nécessaires à la production et à faire de l'industrie une production à cycle fermé, où tout est récupéré et remis en circulation. En 2022, Marazzi obtient la certification ISO 17889-1, la première norme ISO en matière de durabilité dans le secteur de la construction au niveau mondial. Elle définit pour la première fois un système d'évaluation selon 38 critères qualitatifs et quantitatifs, identifiés et classés d'après les trois piliers de la durabilité : environnemental, social et économique.

**DE** Die Marazzi Gruppe ist seit langem ein Verfechter einer umweltverträglichen Industrie mit Systemen, Prozessen und Produkten, die nach strengsten internationalen Standards zertifiziert sind. Beginnend mit der Patentierung des Einbrandverfahrens in den 1970er Jahren, hat sie entscheidend dazu beigetragen, den Einsatz der für die Produktion nötigen Ressourcen zu reduzieren und die Keramikherstellung mit geschlossenem Zyklus, bei der alles wiederverwertet und in den Kreislauf zurückgeführt wird, in der Keramikindustrie zu etablieren. Marazzi erlangte 2022 als eines der ersten Unternehmen weltweit die Zertifizierung nach ISO 17889-1, der ersten ISO-Norm für Nachhaltigkeit in der internationalen Baubranche. In dieser wurde erstmals ein Bewertungssystem mit 38 qualitativen und quantitativen Kriterien festgelegt, die nach den drei Säulen der Nachhaltigkeit – Umwelt, Soziales und Wirtschaft – gegliedert sind.

**ES** El Grupo Marazzi, desde hace ya mucho tiempo, es portavoz de una industria ecosostenible con sistemas, procesos y productos certificados de conformidad con los más rigurosos estándares internacionales y ha contribuido de modo determinante, a partir de la

patente de la monococción en los años setenta, a disminuir la utilización de los recursos necesarios para la producción y a hacer de la industria cerámica una producción de ciclo cerrado, en la que todo se recupera y se reintroduce en el ciclo de fabricación. En 2022, Marazzi obtuvo la Certificación ISO 17889-1, primera norma ISO en materia de sostenibilidad dentro del ramo de la construcción en el ámbito internacional que estableció por primera vez un sistema de evaluación aplicando treinta y ocho criterios cualitativos y cuantitativos, identificados y subdivididos de acuerdo con las tres columnas de la sostenibilidad: medioambiental, social y económica.

**RU** Группа Marazzi давно продвигает принципы экологически устойчивого производства, внедряя системы, процессы и продукцию, которые были сертифицированы на соответствие самым суровым международным стандартам и, начиная еще с патента на плитку однократного обжига 70-х годов, внесла определяющий вклад в снижение использования необходимых ресурсов для производства и в превращение керамической промышленности в замкнутый цикл, в котором все материалы собираются и повторно запускаются в производство. В 2022 году Marazzi получила сертификат соответствия ISO 17889-1 - первому стандарту ISO в сфере экологической устойчивости в строительной отрасли мирового уровня, впервые определившему систему оценки, использующую 38 качественных и количественных критериев, которые были установлены и разделены по трем основополагающим принципам экологической устойчивости: окружающая среда, социальная сфера и экономика.

# Planet

**IT** L'eccellenza dei prodotti Marazzi e dell'intero ciclo produttivo è frutto di una politica di sostenibilità ambientale costruita nel tempo. Marazzi ha contribuito a fare della ceramica una produzione a ciclo chiuso utilizzando in maniera più consapevole le fonti energetiche e le materie prime, favorendo la circolarità dei materiali, riciclando gli imballaggi e recuperando gli scarti ed è portavoce di un'industria in grado di limitare il consumo delle risorse naturali e ridurre l'impatto ambientale grazie al ripristino morfologico e vegetazionale delle cave, alla gestione controllata dei rifiuti e al riutilizzo delle acque industriali. Il nostro impegno per l'ambiente è racchiuso in un numero solo che rappresenta il nostro obiettivo sostenibile per eccellenza: 100%: 100% scarti di processo recuperati; 100% imballi di cartone riciclati; 100% imballi riciclabili; 120% recupero delle acque di processo.

**EN** The excellence of Marazzi's products and its entire production cycle is due to an environmental sustainability policy built up over time. Marazzi has helped to make ceramics a closed-cycle product through the more intelligent use of energy sources and raw materials, promoting the circularity of materials, the reuse of packaging and the recovery of waste. We are the proponents of an industry that limits use of natural resources and reduces environmental impact by restoring quarries' landscape and vegetation, adopting good waste management practices and recycling industrial wastewater. Our commitment to the environment is summed up in a single number that encapsulates our ultimate sustainability goal: 100%: 100% process waste recovery; 100% cardboard packaging recycling; 100% packaging recycling; 120% process waste recovery.

**FR** L'excellence des produits Marazzi et de l'ensemble du cycle de production est le fruit d'une politique de durabilité environnementale forgée au fil du temps. Marazzi est l'un des acteurs majeurs de la production céramique à cycle fermé : elle utilise les sources d'énergie et les matières premières de façon plus responsable, en

favorisant la circularité des matériaux, en recyclant les emballages et en valorisant les déchets. Le groupe est le porte-parole d'une industrie qui sait limiter la consommation des ressources naturelles et réduire l'impact environnemental grâce au rétablissement morphologique et à la récupération de la végétation des carrières, à la gestion contrôlée des déchets et à la réutilisation des eaux industrielles. Notre engagement en faveur de l'environnement se mesure en un seul chiffre qui représente notre objectif de durabilité par excellence: 100 %: 100 % de déchets de processus récupérés, 100 % d'emballages en carton recyclé, 100 % d'emballages recyclables, 120 % des eaux de traitement récupérées.

**DE** Die hervorragende Qualität der Marazzi-Produkte und unseres gesamten Produktionszyklus ist das Ergebnis einer im Laufe der Jahre entwickelten Nachhaltigkeitspolitik. Marazzi hat maßgeblich dazu beigetragen, die Keramikproduktion in einen Prozess mit geschlossenem Stoffkreislauf zu verwandeln. Dies geschieht durch den bewussteren Einsatz von Energiequellen und Rohstoffen, die Förderung der Kreislaufwirtschaft von Materialien, das Recycling der Verpackungen und die Wiederverwertung von Abfällen. Das Unternehmen steht für eine Industrie, die in der Lage ist, den Verbrauch von natürlichen Ressourcen zu begrenzen und die Umweltbelastung durch die Wiederherstellung der Morphologie und Vegetation der Gruben, das kontrollierte Abfallmanagement, die Optimierung des Energieverbrauchs und die Wiederverwendung von Brauchwasser zu reduzieren. Unser Engagement für die Umwelt kommt in einer einzigen Zahl zum Ausdruck, die unser Nachhaltigkeitsziel par excellence darstellt: 100%: 100% wiederverwertete Prozessabfälle, 100 % Verpackungen aus Recycling-Pappe, 100 % wiederverwertbare Verpackungen und 120 % Wiederverwertung des Brauchwassers.

**ES** La excelencia de los productos de Marazzi y de todo el ciclo productivo es resultado de una política

de sostenibilidad ambiental desarrollada en el tiempo. Marazzi ha contribuido a hacer de la cerámica una producción de ciclo cerrado utilizando de manera más responsable las fuentes de energía y las materias primas, favoreciendo la circularidad de los materiales, reciclando los embalajes y recuperando los restos de fabricación y es portavoz de una industria capaz de limitar el consumo de recursos naturales y de reducir el impacto medioambiental gracias a la recuperación morfológica y de la vegetación de las canteras, la gestión controlada de los residuos y la reutilización de las aguas industriales. Nuestro compromiso con el ambiente se expresa en un solo número que representa nuestro objetivo de sostenibilidad por excelencia: 100%: 100% de los restos del proceso productivo recuperados; 100% de embalajes de cartón reciclado; 100% de embalajes reciclables; 120% de recuperación de las aguas del proceso de fabricación.

**RU** Совершенство продукции Marazzi и всего производственного процесса - это результат созданной с течением времени политики экологической рациональности. Marazzi внесла свой вклад в превращение керамики в производство с замкнутым циклом, более осознанно используя источники энергии и сырье, стимулируя обращаемость материалов, перерабатывая упаковку и повторно используя отходы. Она также продвигает такие производственные принципы, которые способны снизить расход природных ресурсов и воздействие на окружающую среду благодаря восстановлению рельефа местности и растительности в карьерах, контролируемому использованию отходов и повторному использованию воды для технологических нужд. Наши усилия по защите окружающей среды выражаются лишь одной цифрой, которая является нашей целью в экологической устойчивости: 100%. 100% повторно используемых производственных отходов, 100% повторно использованных картонных упаковок, 100% повторно используемых упаковок, 120% повторно используемой технологической воды.

# People

**IT** L'impegno di Marazzi per creare un ambiente di lavoro sicuro, inclusivo e aperto al contributo di tutti si conta in ore di formazione, costanti verifiche sulla sicurezza dei sistemi di produzione e dei prodotti, controllo della salute e del benessere dei dipendenti e nel sostegno attivo delle comunità e del territorio. Marazzi Group ha ricevuto per la 7<sup>a</sup> volta consecutiva il riconoscimento Top Employer per le oltre 8000 ore di formazione per i dipendenti, di cui quasi la metà dedicate ad ambiente e sicurezza; le 40 convenzioni per dipendenti e famiglie in ambito salute, benessere, servizi, formazione e scuola; gli oltre 70 eventi ospitati al Crogiolo legati al programma culturale del Comune di Sassuolo gratuito e aperto a tutti i cittadini. Nel 2023 Marazzi Group ha ricevuto il Premio Cultura + Impresa insieme al Comune di Reggio Emilia per l'opera Curiosa Meravigliosa per il Palazzo dei Musei di Reggio Emilia.

**EN** Marazzi's commitment to creating a safe, inclusive working environment where everyone's contribution is valued is demonstrated by hours of training, constant safety assessments on production systems and products, monitoring of employees' health and wellbeing, and active support for the community and local area. For the 7th consecutive year, Marazzi Group was named a Top Employer for its over 8000 hours of employee training, almost half of this on the environment and safety, its 40 benefits schemes for employees and families in the fields of health, wellness, services, training and education, and the more than 70 free, open-access events hosted at the Crogiolo in association with the Municipality of Sassuolo cultural programme. In 2023 Marazzi Group received the "Premio CULTURA + IMPRESA" (CULTURE + ENTERPRISE Award) together with the City of Reggio Emilia for the Curiosa Meravigliosa artwork for the Palazzo dei Musei in Reggio Emilia.

**FR** L'engagement de Marazzi à mettre en place un environnement de travail sûr, inclusif et ouvert à la contribution de chacune et chacun se traduit par des mesures concrètes : heures de formation, audits de sécurité permanents des systèmes de production et des produits, suivi de la santé et du

bien-être du personnel et investissement auprès des populations et sur le territoire. Pour la 7<sup>e</sup> fois consécutive, le prix Top Employer est venu récompenser les réalisations de : plus de 8 000 heures de formation du personnel, dont près de la moitié consacrées à l'environnement et à la sécurité, 40 conventions actives pour les membres du personnel et leurs familles dans les domaines de la santé, du bien-être, des services, de la formation et de la scolarité, 70 événements qui se sont déroulés au Crogiolo dans le cadre du programme culturel de la municipalité de Sassuolo, gratuit et ouvert à tous les habitants. En 2023, Marazzi Group a été lauréat, aux côtés de la municipalité de Reggio Emilia, du Premio CULTURA + IMPRESA (Prix CULTURE + ENTREPRISE), pour l'œuvre Curiosa Meravigliosa réalisée pour le Palazzo dei Musei de Reggio Emilia.

**DE** Das Engagement von Marazzi für die Schaffung eines sicheren, inklusiven und für den Beitrag aller offenen Arbeitsumfelds zeigt sich an Weiterbildungsstunden, ständigen Sicherheitskontrollen der Produktionssysteme und Produkte, Gesundheitskontrollen und Kontrollen zum Wohlbefinden unserer Beschäftigten sowie an der aktiven Unterstützung der Gemeinden und der Region. Die Marazzi Group hat zum siebten Mal in Folge die Auszeichnung als Top Employer erhalten, und zwar für über 8000 Weiterbildungsstunden für die Mitarbeitenden, von denen fast die Hälfte den Themen Umwelt und Sicherheit gewidmet waren, 40 Vereinbarungen für die Mitarbeitende und ihre Familien im Bereich Gesundheit, Wohlbefinden, Dienstleistungen, Ausbildung und Schule sowie über 70 Events im Designzentrum Crogiolo im Rahmen des Kulturprogramms der Gemeinde Sassuolo, das allen Bürgern kostenlos offen steht. Im Jahr 2023 erhielt die Marazzi Group zusammen mit der Gemeinde Reggio Emilia den „Premio CULTURA + IMPRESA“ (Preis für KULTUR + UNTERNEHMEN) für das keramische Wandbild Curiosa Meravigliosa für den Palazzo dei Musei in Reggio Emilia.

**ES** El compromiso de Marazzi para crear un ambiente de trabajo seguro, inclusivo y abierto a

la contribución de todas las personas se traduce en horas de formación, verificaciones constantes de la seguridad de los sistemas de producción y de los productos, cuidado de la salud y del bienestar de los empleados y en el apoyo activo de las comunidades y del territorio. Marazzi Group ha recibido por séptima vez consecutiva el galardón Top Employer por las más de ocho mil horas de formación de los empleados, casi la mitad de ellas dedicadas al medio ambiente y la seguridad; las cuarenta convenciones para los empleados y las familias en los ámbitos de la salud, el bienestar, los servicios, la formación y la escolarización; los más de setenta eventos celebrados en el Crogiolo ligados al programa cultural del Ayuntamiento de Sassuolo, abierto a todos los ciudadanos. En 2023 Marazzi Group ha recibido el Premio CULTURA + IMPRESA (premio CULTURA + EMPRESA) junto con el Ayuntamiento de Reggio Emilia por la obra Curiosa Meravigliosa para el Palazzo dei Musei de Reggio Emilia.

**RU** Усилия Marazzi по созданию безопасной, инклюзивной и открытой для вклада любого человека рабочей среды определяются часами подготовки, непрерывными проверками безопасности производственных систем и продукции, проверкой здоровья и хорошего самочувствия сотрудников и активной поддержкой сообщества и окружающих территорий. Marazzi Group в 7-й раз подряд получила приз Top Employer за 8000 часов обучения сотрудников, из которых почти половина посвящена окружающей среде и безопасности, за 40 договоров в пользу сотрудников и их семей в области охраны и поддержания здоровья, услуг, профессиональной подготовки и образования, за более 70 проведенных в центре Crogiolo мероприятий, связанных с бесплатной и открытой для всех желающих культурной программой мэрии Сассуоло. В 2023 году Marazzi Group вместе с мэрией Реджо-Эмилии получила Premio CULTURA + IMPRESA (приз КУЛЬТУРА + ПРЕДПРИНИМАТЕЛЬСТВО) за работу Curiosa Meravigliosa для Palazzo dei Musei в Реджо-Эмилии.

# Performance

**IT** L'impegno di Marazzi Group per la sostenibilità va oltre i prodotti e i processi: far crescere l'affidabilità e la capacità competitiva dell'azienda in tutti i paesi in cui opera, migliorare la redditività e garantire la soddisfazione di tutti gli stakeholders sono obiettivi trasparenti e misurabili condivisi con il Gruppo Mohawk Industries che ogni tre mesi pubblica il Bilancio finanziario e ogni anno il Report di sostenibilità, a cui Marazzi contribuisce con i propri risultati e le proprie attività. Impegni concreti, misurabili e sostenibili nel tempo regolati da standard internazionali come le normative ISO, regolamenti di gruppo come il Codice etico, il Codice di condotta dei fornitori, la Policy sui Diritti Umani fino alla rendicontazione finanziaria di gruppo e al Report di Sostenibilità che Mohawk pubblica dal 2009.

**EN** Marazzi Group's commitment to sustainability extends beyond products and processes: growing the company's reliability and ability to compete in all the countries where it operates, improving profitability and guaranteeing the satisfaction of all stakeholders are transparent, measurable objectives shared with Mohawk Industries, the group to which Marazzi Group belongs. Listed on the New York Stock Exchange, Mohawk publishes quarterly Financial Statements and an annual Group Sustainability Report, also embracing the results and operations of Marazzi itself. Measurable commitments, sustainable in the long term and regulated by international standards like the ISO norms and group regulations including the Business Ethics Policy, Supplier Code of Conduct and the Human Rights Policy, right down to the group financial reporting and the Sustainability Report that Mohawk has published since 2009.

**FR** L'engagement de Marazzi Group en faveur de la durabilité va au-delà des produits et des processus: accroître la fiabilité et la capacité concurrentielle de l'entreprise dans tous les pays où elle est implantée, améliorer la rentabilité et garantir la satisfaction de toutes les parties prenantes sont

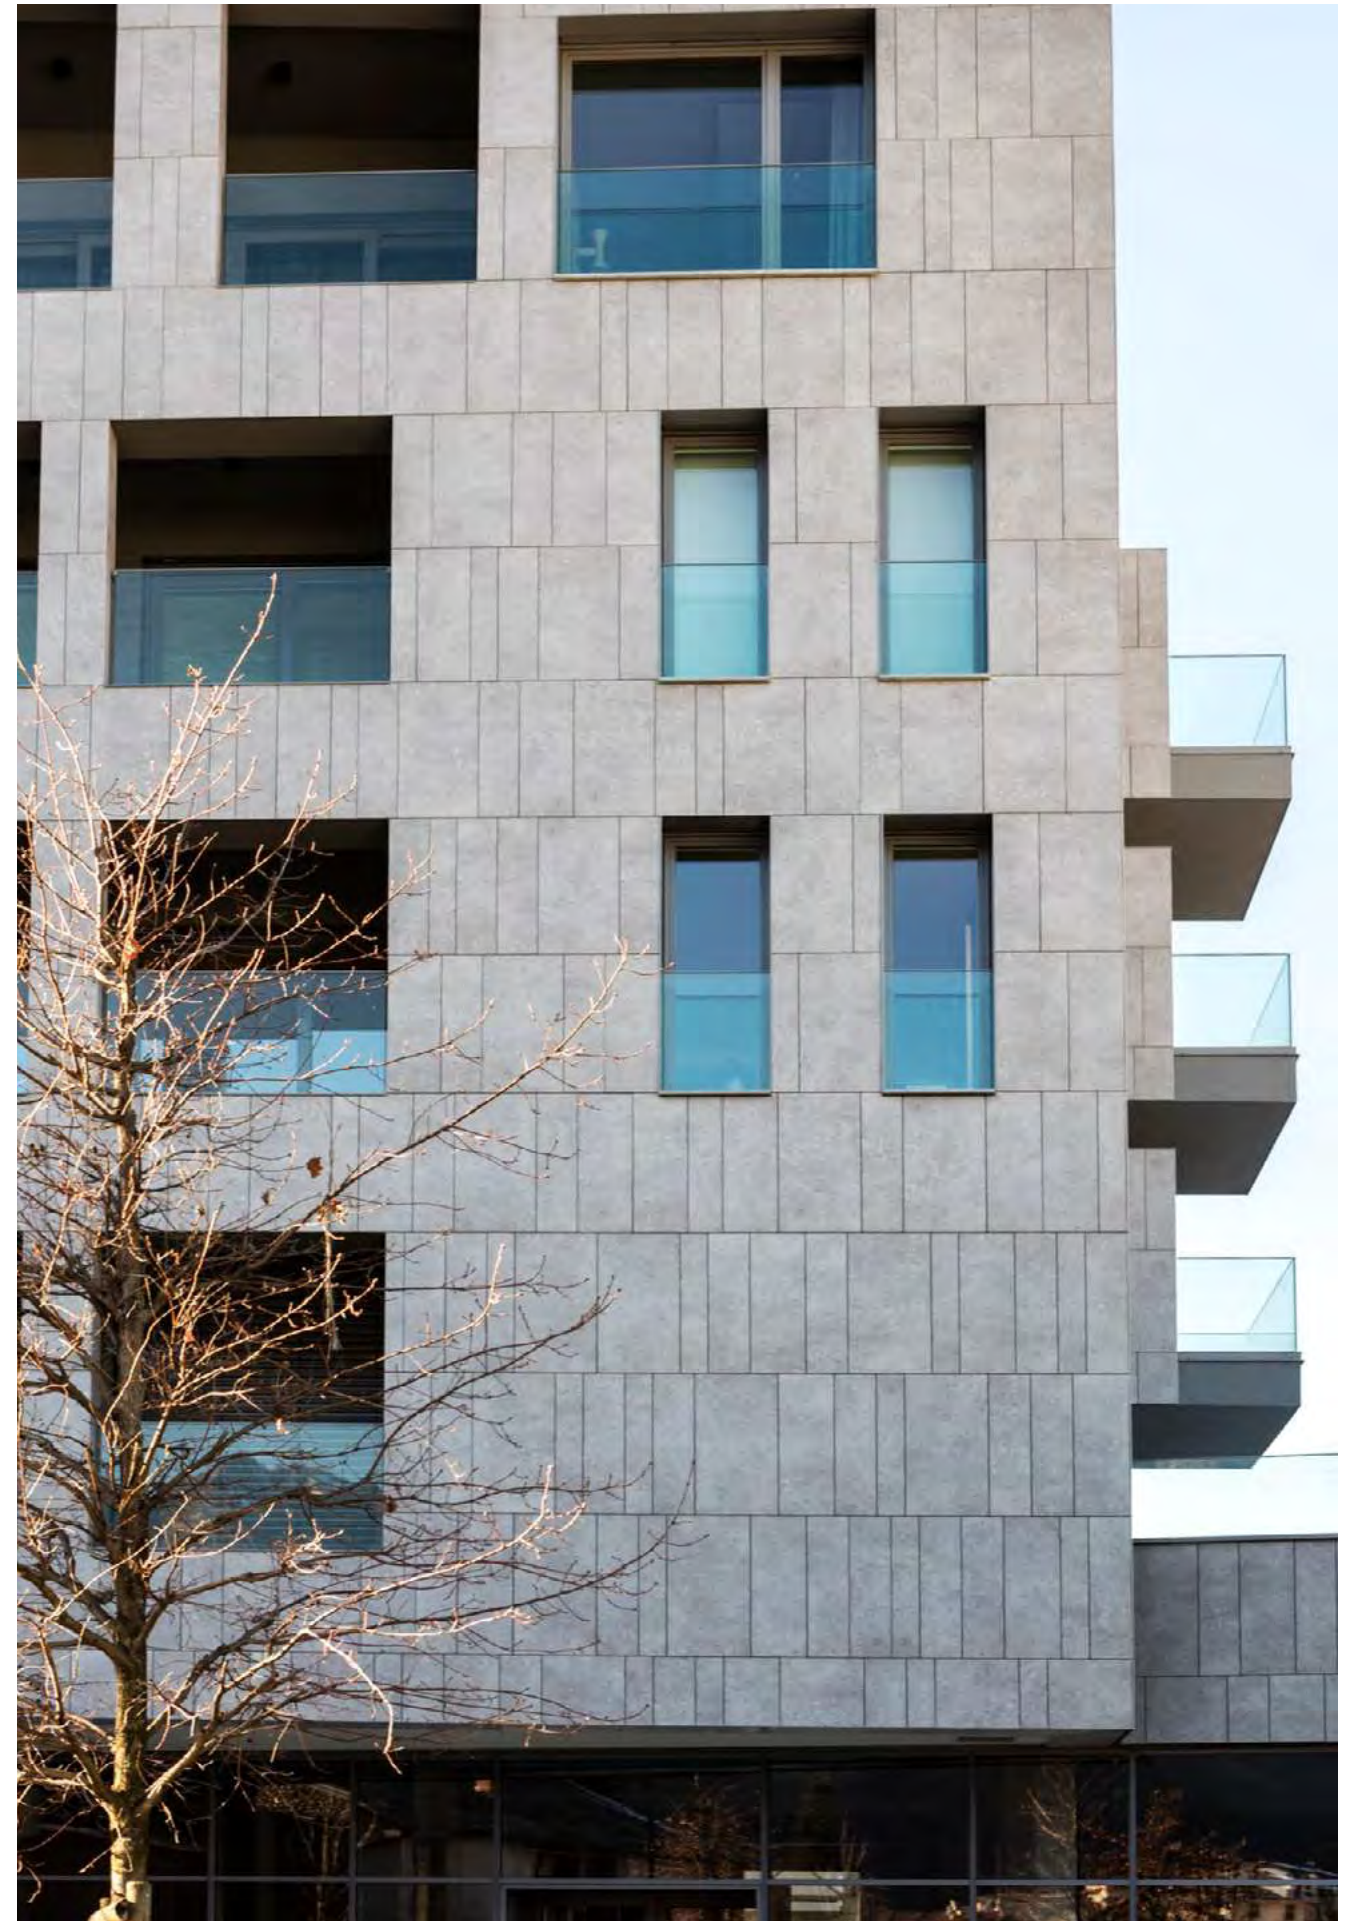

des objectifs transparents et mesurables qu'il a en commun avec Mohawk Industries, le groupe auquel appartient Marazzi Group : coté à la Bourse de New York, il publie un rapport financier trimestriel et un Rapport annuel sur la durabilité du Groupe, auquel Marazzi contribue au titre de ses résultats et de ses activités. Engagements concrets, mesurables et durables, régis par des normes internationales comme les réglementations ISO, les réglementations du groupe comme le Code d'éthique, le Code de conduite des fournisseurs, la Politique en matière de droits humains, sans oublier les rapports financiers du groupe et le Rapport sur la durabilité que Mohawk publie depuis 2009.

**DE** Das Engagement der Marazzi Group für die Nachhaltigkeit geht über Produkte und Prozesse hinaus: Die Erhöhung der Zuverlässigkeit und Wettbewerbsfähigkeit des Unternehmens in allen Ländern, in denen es tätig ist, die Verbesserung der Rentabilität und die Gewährleistung der Zufriedenheit aller Stakeholder sind transparente und messbare Ziele, die mit Mohawk Industries geteilt werden. Der an der New Yorker Börse notierte Konzern, zu dem die Marazzi Group gehört, veröffentlicht alle drei Monate die Vermögensübersicht und jedes Jahr den Nachhaltigkeitsbericht der Gruppe, in den Marazzi seine Ergebnisse und Aktivitäten einbringt. Sondern konkrete, messbare und langfristig nachhaltige Verpflichtungen. Diese sind die durch internationale Standards wie die ISO-Normen, Konzernvorschriften wie den Ethikkodex, den Verhaltenskodex für die Lieferanten, die Menschenrechtsrichtlinie bis hin zur Finanzberichterstattung des Konzerns und den Nachhaltigkeitsbericht, den Mohawk seit 2009 veröffentlicht, geregelt.

**ES** El compromiso de Marazzi Group en pro de la sostenibilidad va más allá de los productos y los procesos: incrementar la fiabilidad y la capacidad competitiva de la empresa en todos los países en los que opera, mejorar la rentabilidad y garantizar

la satisfacción de las partes interesadas en nuestra actividad son objetivos transparentes y medibles compartidos con Mohawk Industries, el grupo del que forma parte Marazzi Group, que cotiza en la Bolsa de Nueva York, que cada tres meses publica el Informe financiero y cada año el Informe de sostenibilidad del Grupo, a la que Marazzi contribuye con sus resultados y acciones. Compromisos concretos, medibles y sostenibles en el tiempo, regulados por estándares internacionales como las normas ISO, reglamentos del grupo, como el Código ético, el Código de conducta de los proveedores, la Política de derechos humanos, la información financiera del grupo y el Informe de sostenibilidad que Mohawk Industries viene publicando desde 2009.

**RU** Усилия Marazzi Group в области экологической устойчивости выходят за рамки продукции и производственных процессов. Повышение надежности и конкурентоспособности компании во всех странах, в которых она работает, повышение доходности и гарантия удовлетворенности всех вовлеченных лиц - это прозрачные и конкретные цели, разделяемые с Mohawk Industries - группой компаний, в которую входит Marazzi Group, - котируемой на нью-йоркской бирже. Каждые три месяца она публикует свой финансовый баланс и каждый год Отчет об экологической устойчивости группы, в который Marazzi вносит свой вклад достигнутыми результатами и выполняемой деятельностью. конкретные действия, которые ощущаются и поддерживаются с течением времени, регулируются международными стандартами, такими как ISO, регламентами группы, как, например, Этический кодекс, Кодекс поведения поставщиков и Политика прав человека, вплоть до финансовых отчетов группы и до Отчета об экологической устойчивости, который Mohawk публикует с 2009 года.

# Premium Technology

Technology • Technologie • Technologie  
Tecnología • Технология

**IT** Da sempre Marazzi si dedica all'innovazione e sviluppa le tecnologie necessarie per realizzare i suoi prodotti in collaborazione con partner specializzati del territorio. I forni a tunnel negli anni '50, la monocottura negli anni '70 e la smaltatura su supporto incandescente negli anni '80 sono solo alcune delle rivoluzioni che hanno segnato una storia fondata sull'attività continua di ricerca e sviluppo. Il know-how, il basso impatto ambientale e la tutela delle persone e dei territori fanno di Marazzi un punto di riferimento sul panorama internazionale. Oggi, nuovi brevetti tecnologici e impianti altamente sofisticati permettono all'azienda di rispondere in modo rapido alle tendenze dei vari mercati, garantendo produttività, qualità e flessibilità.

**EN** Marazzi has always been dedicated to innovation and the company develops the technologies necessary to manufacture its products in collaboration with specialized partners in the area. Tunnel kilns in the '50s, single-firing in the '70s and glazing on an incandescent substrate in the '80s are just some of the revolutions that have shaped a success story based on continuous research and development. The company's expertise, low environmental impact and protection of people and the local area make Marazzi an international point of reference. Today, new technological patents and highly sophisticated plants allow the company to rapidly respond to the trends of the various markets, guaranteeing productivity, quality and flexibility.

**FR** Avec l'innovation à cœur depuis toujours, Marazzi collabore avec des partenaires spécialisés du territoire pour mettre au point les technologies nécessaires à la fabrication de ses

produits. Les fours à tunnel dans les années 50, la monocuisson dans les années 70 et l'émaillage sur support incandescent dans les années 80 ne sont que quelques-unes des révolutions qui ont marqué une histoire fondée sur une sensibilité à la recherche et au développement. Le savoir-faire, le faible impact sur l'environnement, la protection des personnes et des territoires font de Marazzi une référence à l'international. Aujourd'hui, avec ses nouveaux brevets technologiques et ses équipements des plus sophistiqués, l'entreprise fournit une réponse rapide aux tendances des marchés, en assurant productivité, qualité et flexibilité.

**DE** Als innovationsfreudiges Unternehmen entwickelt Marazzi in Partnerschaft mit erstklassigen Spezialisten aus der Region die erforderlichen Technologien für die Herstellung der eigenen Produkte. Die Tunnelöfen in den 50er Jahren, das Einbrandverfahren in den 70er Jahren und das Glasieren auf glühendem Scherben in den 80er Jahren sind nur einige Meilensteine, die eine lange Tradition in Forschung und Entwicklung geprägt haben. Know-how, Umweltverträglichkeit, Schutz der Menschen und der Region machen Marazzi zu einem Maßstab auf nationaler wie internationaler Ebene. Heute ermöglichen neue Verfahrenspatente und hochspezialisierte Anlagen dem Unternehmen, unter Gewährleistung von Produktivität, Qualität und Flexibilität zeitnah auf Nachfrageveränderungen in den einzelnen Marktregionen zu reagieren.

**ES** Desde siempre Marazzi viene dedicándose a la innovación y desarrolla las tecnologías necesarias para fabricar sus productos en colaboración con socios especializados del

territorio. Los hornos de túnel en los años 50, la monococción en los 70 y el esmaltado sobre bizcocho incandescente en los 80 son solo algunas de las revoluciones que han marcado una historia basada en una constante labor de investigación y desarrollo. La experiencia y los conocimientos prácticos, el bajo impacto medioambiental y la salvaguardia de las personas y los territorios hacen de Marazzi un auténtico punto de referencia en el panorama internacional. Hoy día nuevas patentes tecnológicas e instalaciones altamente sofisticadas permiten a la empresa responder de forma rápida a las tendencias de los varios mercados, garantizando productividad, calidad y flexibilidad.

**RU** С самого начала Marazzi внедряет инновации и разрабатывает технологии, необходимые для создания своей продукции, сотрудничая со специализированными партнерами, располагающимися рядом с ней. Туннельные печи в 50-х годах, плитка однократного обжига в 70-х годах и нанесение глазури по раскаленной основе в 80-х – это лишь краткий перечень революционных достижений, ставших рубежами в корпоративной истории, основанной на постоянных исследованиях и развитии. Ноу-хау, низкое воздействие на окружающую среду и охрану людей и территории превращают Marazzi в ориентир на международной арене. Сегодня новые технологические патенты и сверхсовременные установки позволяют компании оперативно реагировать на тенденции, сложившиеся на различных рынках, гарантируя производительность, качество и гибкость.

## Puro Marazzi Antibacterial

### Tecnologia antibatterica per un'igiene di lunga durata

Antibacterial technology for long-lasting hygiene  
 • Technologie antibactérienne pour une hygiène de longue durée • Antibakterielle Technologie für langanhaltende Hygiene • Tecnología antibacteriana que garantiza una higiene de larga duración • Антибактериальная технология обеспечивает долгосрочную гигиеничность

## StepWise

### Performance tecniche per superfici antiscivolo morbide al tatto

Technical performance for anti-slip, soft-touch surfaces • Performances techniques pour des surfaces antidérapantes et douces au toucher • Rutschhemmende Oberfläche mit weicher Haptik • Prestaciones técnicas de superficies antideslizantes y suaves al tacto • Нескользящие, мягкие на ощупь поверхности с высокими техническими показателями

## High Performance

### Resistenza e versatilità per superfici interne ed esterne

Resistance and versatility for indoor and outdoor spaces • Résistance et polyvalence pour surfaces intérieures et extérieures • Resistente und vielseitige Oberflächen für den Innen- und Außenbereich • Superficies interiores y exteriores resistentes y versátiles • Прочность и универсальность материалов для применения в помещениях и на улице

## Body Plus

### Inclusioni materiche in massa per un aspetto naturale

Through-body tactile inclusions for a natural look  
 • Inclusions de matière dans la masse pour un aspect naturel • Materialeinschlüsse im Scherben mit naturnaher Optik • Inclusiones matéricas en toda la masa que confieren un aspecto natural • Вкрапления различных материалов в керамическую массу являются залогом натурального вида

## Sublime Sync

### Tecnologia digitale e struttura materica ad alta definizione

Digital technology and high-definition tactile structure  
 • Technologie numérique et effet de matière en haute définition • High-Definition-Digitaldruck und -Materialtextur • Tecnología digital y estructura matérica de alta definición • Цифровая технология и фактурная структура высокого разрешения

## Zero Glossy

### Nuove superfici super-opache

New super-matt surfaces • Nouvelles surfaces super mates • Neue supermatte Oberflächen • Nuevas superficies supermates • Новые, сверх матовые поверхности

## 3D Ink

### Match unico tra materia, colore e texture 3D

Unique match of materials, colours and 3D textures  
 • Assortiment unique entre matière, couleur et texture 3D • Einzigartige Mixtur aus Material, Farbe und 3D-Oberfläche • Armonización única entre materia, color y textura tridimensional • Уникальное соответствие материала, цвета и фактуры 3D

## Touch

### Tecnologia digitale e graniglie per superfici preziose a rilievo

Digital technology and grits for exquisite relief surfaces • Technologie digitale et granulats pour des surfaces précieuses en relief • Digitale Drucktechnik und Granulatbeschichtung für wertige Reliefflächen • Tecnología digital y gravas para crear preciosas superficies en relieve • Цифровые технологии и зернистость для благородных рельефных поверхностей

Il disegno è liberamente componibile. Il livello di stonalizzazione del disegno è variabile su ciascuna delle 6 lastre che compongono il disegno finale • The pattern can be built up exactly as preferred. The level of shade variation in the pattern can be modified in each of the 6 slabs which make up the final design • Le dessin peut être modulé selon les envies. La variation de nuance du dessin est différente sur chacune des 6 dalles composant le dessin final • Das Design ist modular und endlos wiederholbar. Die Muster auf den 6 Platten, die das Gesamtmotiv bilden, besitzen unterschiedliche Farbschattierungen • El diseño es libremente componible. El nivel de degradación tonal del dibujo de cada una de las seis placas que configuran la composición final es variable • Рисунок может свободно составляться. Отличия тона рисунка являются разными на каждой из 6 плит, из которых состоит конечный рисунок

**\*Taglio delle lastre**  
Le lastre devono essere tagliate sul retro, utilizzando una taglierina in gres per l'incisione. Durante l'intero taglio, la lama deve sempre aderire alle lastre. Per consigli di posa e manutenzione vedi pag. 666

**Cutting slabs**  
Slabs must be cut from the back, scoring them with a cutter for stoneware. The blade must adhere to the slab throughout the cut. For advice for installation and maintenance see page 666

**Découpe des dalles**  
Les dalles doivent être découpées sur l'arrière avec un coupe-carrelage pour grès. La lame doit toujours adhérer à la dalle pendant toute l'opération de découpe. Pour conseils de pose et entretien voir page 666

**Schneiden**  
Die Platten sind auf der Rückseite unter Verwendung einer Tischkreissäge für Feinsteinzeug zu schneiden. Während des gesamten Schneidvorgangs muss die Trennscheibe stets an die Platte angestellt sein. Für Tipps zur Verlegung und Pflege siehe Seite 666.

**Резка плит**  
Плиты следует резать с тыльной стороны, используя керамогранитный резак для надреза. На протяжении всей резки полотно должно всегда прижиматься к плитам. Для Рекомендации по укладке и уходу см. страницу 666

La struttura Stamp si compone di 4 rilievi alla base e di 5 rilievi in altezza. La posa consigliata prevede di mantenere sulla parete il medesimo verso di posa per tutte le piastrelle.

The Stamp structure consists of 4 relief details at the base and 5 at the height. We recommend that all tiles be installed in the same direction on the wall.

La structure Stamp comprend 4 reliefs à la base et 5 en hauteur. Sur le mur, il est conseillé de garder le même sens de pose pour tous les carreaux.

Das Relief Stamp besteht aus 4 Reliefs im unteren und 5 Reliefs im oberen Bereich. Für die Verlegung wird empfohlen, an der gesamten Wand dieselbe Verlegerichtung für alle Fliesen beizubehalten.

La estructura Stamp consta de cuatro relieves en la base y cinco relieves en altura. Se recomienda mantener el mismo sentido de colocación para todos los azulejos de la pared.

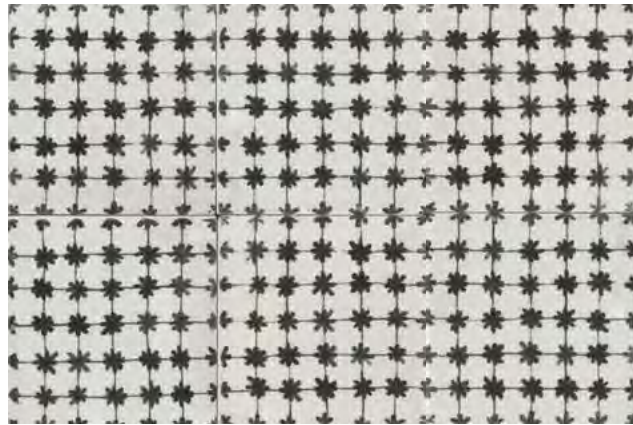

Структура Stamp предлагает 4 рельефных элемента по ширине и 5 по высоте. Рекомендуемая схема укладки предусматривает соблюдение одного и того же направления при укладке всех плиток.

**La produzione di Triennale è su richiesta. I codici fanno riferimento al taglio ad idrogetto realizzabile su tutti i prodotti Marazzi a catalogo.**

Triennale is produced to order. The codes refer to water-jet cutting, which can be carried out on all Marazzi products in the catalogue.

La production de Triennale se fait à la demande. Les codes se rapportent à la découpe par jet d'eau réalisable sur tous les produits figurant dans le catalogue.

Die Codes beziehen sich auf das Wasserstrahlschneiden; Verfahren geeignet für alle im Programm geführten Produkte von Marazzi.

La producción de Triennale se realiza bajo pedido. Los códigos se refieren al corte con chorro de agua a presión que pueden ser realizados en todos los productos Marazzi presentes en el catálogo.

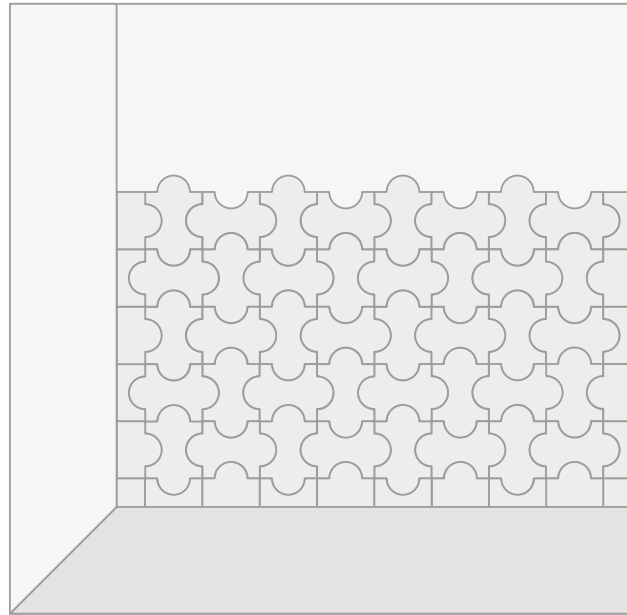

Производство Triennale осуществляется по заказу. Коды относятся к гидрорезке, которая может выполняться на всей продукции Marazzi, представленной в каталоге.

Triennale

**Marazzi interpreta oggi il design originale di Ponti e Rosselli declinandolo in un progetto aperto a tutte le superfici verticali e orizzontali: con le sue caratteristiche “quattro curve”, Triennale si presta a infinite combinazioni cromatiche e di posa, a pavimento e rivestimento, a boiserie o composizione artistica.**

Today Marazzi interprets Ponti and Rosselli's original design with a project applicable to all vertical and horizontal surfaces: with its distinctive “four curves”, Triennale offers the potential for infinite colour schemes and installation layouts, on floors and walls, as a boiserie or in artistic compositions.

Marazzi interprète aujourd'hui le design original de Ponti et Rosselli en le déclinant dans un projet ouvert à toutes les surfaces verticales et horizontales : grâce à ses caractéristiques « quatre courbes », Triennale se prête, au sol et au mur, en boiserie ou en composition artistique, à des combinaisons infinies de couleurs et de pose.

Marazzi interpretiert heute das originelle Design von Ponti und Rosselli als offenes Konzept, das für alle vertikalen und horizontalen Flächen verwendet werden kann: die charakteristische, „viermal gebogene“ Fliese Triennale eignet sich für eine Vielzahl an Farb- und Verlegekombinationen für Wand- und Bodenbeläge, Boiserien oder künstlerische Gestaltungselemente.

Marazzi interpreta hoy el diseño original de Ponti y Rosselli, articulándolo en un proyecto abierto a todas las superficies verticales y horizontales: con sus características “cuatro curvas”, Triennale se presta a un sinfín de combinaciones cromáticas y de colocación, revistiendo paredes o suelos, conformando boiserías o composiciones artísticas.

Компания Marazzi предлагает современную интерпретацию оригинального дизайна Понти и Росселли, преобразуя его в открытый проект для всех вертикальных и горизонтальных поверхностей: благодаря ее характерным “четырем искривлениям” плитка Triennale позволяет получить неограниченные варианты цвета и укладки, как на полу, так и на стенах, для создания однородных панно или художественных композиций.

Tutti i pezzi speciali sono su richiesta e sono coordinabili ai fondi rettificati. Gli imballi vengono calcolati sulla base del quantitativo ordinato. • All special pieces are supplied to order and can be matched with the rectified plain tiles. Packaging is calculated on the basis of the quantity ordered. • Alle Formteile sind auf Anfrage erhältlich und mit den rektifizierten Grundfliesen kombinierbar. Die Verpackung wird auf der Grundlage der Bestellmenge berechnet. • Toutes les pièces spéciales sont fabriquées sur demande et coordonnables aux fonds rectifiés. Les emballages sont calculés en fonction de la quantité commandée. • Todas las piezas especiales se entregan bajo pedido y se pueden coordinar con los fondos rectificados. Los embalajes se calculan según las cantidades encargadas en los pedidos. • Все специальные изделия производятся на заказ и сочетаются с обрезной фоновой плиткой. Упаковки рассчитываются на основе заказанного количества.

Tutti i pezzi speciali sono su richiesta e sono coordinabili ai fondi rettificati. Gli imballi vengono calcolati sulla base del quantitativo ordinato. • All special pieces are supplied to order and can be matched with the rectified plain tiles. Packaging is calculated on the basis of the quantity ordered. • Alle Formteile sind auf Anfrage erhältlich und mit den rektifizierten Grundfliesen kombinierbar. Die Verpackung wird auf der Grundlage der Bestellmenge berechnet. Toutes les pièces spéciales sont fabriquées sur demande et coordonnables aux fonds rectifiés. Les emballages sont calculés en fonction de la quantité commandée. • Todas las piezas especiales se entregan bajo pedido y se pueden coordinar con los fondos rectificados. Los embalajes se calculan según las cantidades encargadas en los pedidos. • Все специальные изделия производятся на заказ и сочетаются с обрезной фоновой плиткой. Упаковки рассчитываются на основе заказанного количества.

- Gres Fine Porcellanato • Fine Porcelain Stoneware • Grès Cérame Fin • Feinsteinzeug • Gres Fino Porcelánico • Керамогранит

**Piastrelle in formato quadrato 20x20 cm, con due tipologie di forme geometriche a rilievo corrispondenti alle due segnaletiche di base promosse a livello europeo (il codice di percorso rettilineo e quello di arresto). Per il codice di percorso rettilineo è disponibile anche il formato 30x30 cm. Utilizzando l'uno o l'altro formato è possibile realizzare percorsi tattili di larghezza pari a 40, 60 o 80 cm. I colori sono Panna per il percorso rettilineo e Giallo per il codice di arresto. La differenziazione del colore di arresto costituisce un ausilio supplementare per gli ipovedenti.**

Square tiles measuring 20 x 20 cm, featuring four different types of geometric shapes and textures, corresponding to the two base codes accepted at European level (the straight ahead and the danger codes). These are coupled with two extra codes, the crossing and the attention codes, for those who believe in the necessity of a system with more information and codes. The colours are Panna for the straight path and Giallo for the stop code. The color difference for the stop code is a further help for the visually impaired.

Carreaux carrés 20x20 cm, avec quatre différentes formes géométriques en relief correspondant aux deux signalétiques de base reconnues au niveau européen (le code de ligne droite et le code de danger), et à deux codes supplémentaires - celui de croisement et celui d'attention, pour ceux qui affirment la nécessité d'un système plus riche en codes et informations. Les couleurs sont Panna pour la ligne droite et Giallo pour le code d'arrêt. La couleur différente de stop constitue une aide supplémentaire pour les malvoyants.

Fliesen in quadratischem Format 20 x 20 cm mit verschiedenen Typologien in geometrischen Reliefformen, die den beiden Grundcodes, die auf europäischer Ebene vertreten werden, entsprechen (Code für die geradlinige Strecke und Haltecode/Gefahr), erweitert durch zwei zusätzliche Codes (Kreuzung und Achtung) für Einsatzbereiche, die ein umfassenderes System von Codes und Informationen erforderlich machen. Die Farben sind Panna für den Straight-Direction-Code und Giallo für den Haltecode. Die farbliche Differenzierung des Haltecodes stellt eine zusätzliche Hilfe für Sehbehinderte dar.

Baldosas de formato cuadrado de 20 x 20 cm. con cuatro tipos distintos de formas geométricas en relieve, correspondientes a las dos señales básicas promovidas en el ámbito europeo (el código de itinerario rectilíneo y el de peligro) más dos códigos adicionales (e de cruce y el de atención) para los que defienden la necesidad de un sistema con mayor riqueza de códigos e informaciones. Los colores son Panna para el recorrido rectilíneo y Giallo para el código de parada. La diferenciación del color de parada constituye una ayuda adicional para las personas con visibilidad reducida.

Плитка квадратного формата 20x20 см с двумя разными геометрическими формами рельефа, которые соответствуют двум базовым обозначениям, принятым на европейском уровне (код 'движение по прямой' и код 'стоп'). Для кода 'движение по прямой' имеется также формат 30x30 см. Используя один или другой формат, можно создавать тактильные маршруты шириной 40, 60 или 80 см. Предлагаются цвета Рання для движения по прямой и Giallo для кода "стоп". Отличительный цвет кода 'стоп' является дополнительным вспомогательным элементом для слабовидящих.

Per una corretta installazione lo STOP CODE è contrassegnato sul retro da un triangolo e si consiglia la posa indicata nel disegno. • In order to ensure tiling is done correctly, the STOP CODE tile is marked with a triangle on the reverse. We recommend tiling as shown in the diagram. • Pour qu'il soit installé correctement, le STOP CODE est marqué d'un triangle au dos. Il est conseillé de reproduire la pose indiquée sur le dessin. • Für eine korrekte Verlegung ist der STOP-CODE auf der Rückseite durch ein Dreieck gekennzeichnet. Wir empfehlen, die Verlegung durchzuführen, wie sie in der Zeichnung dargestellt ist. • La parte posterior del STOP CODE está marcada con un triángulo, para una correcta instalación; se aconseja efectuar la colocación indicada en el dibujo. • Для правильной установки STOP CODE помечена на задней стороне треугольником. Рекомендуется указанная рисунком укладка.

**Piastrelle in formato quadrato 20 x 20 cm, con due tipologie diverse di forme geometriche a rilievo che corrispondono alle segnaletiche di base del codice di percorso rettilineo e del codice di pericolo, appositamente studiate per rispondere alle esigenze di sicurezza e di indipendenza dei non vedenti e degli ipovedenti, previste per il mercato austriaco. Entrambe le segnaletiche sono disponibili in due finiture della serie Graniti: Graniti Grigio Scuro\_GR e Graniti Grigio Chiaro\_GR, da utilizzare in contrasto con il colore della pavimentazione adiacente.**

Square tiles measuring 20 x 20 cm, featuring two different types of geometric shapes and textures, corresponding to the straight ahead code and the danger code, specifically designed to respond to the safety and independence requirements of blind and visually impaired people, for the Austrian market. Both codes are available in two finishes of the Graniti series: Graniti Grigio Scuro\_GR and Graniti Grigio Chiaro\_GR, to be used in a colour which contrasts with that of the nearby floor.

Carreaux carrés 20x20 cm, avec deux différentes formes géométriques en relief correspondant aux signalétiques de base - le code de ligne droite et le code de danger, spécialement mises au point pour répondre aux exigences de sécurité et d'autonomie des aveugles et malvoyants prévues sur le marché autrichien. Les deux signalétiques sont disponibles en deux finitions de la série Graniti : Graniti Grigio Scuro\_GR et Graniti Grigio Chiaro\_GR, à utiliser en contraste avec la couleur du sol adjacent.

Fliesen in quadratischem Format 20 x 20 cm mit verschiedenen Typologien in geometrischen Reliefformen, die den beiden Grundcodes entsprechen, dem Code für die geradlinige Strecke und dem Haltecode/Gefahr, die eigens konzipiert wurden, um die spezifischen Anforderungen in Bezug auf Sicherheit und Selbstständigkeit Blinder und Sehbehinderter in Österreich zu erfüllen. Beide Signalsysteme sind in zwei Ausführungen der Serie Graniti erhältlich: Graniti Grigio Scuro\_GR und Graniti Grigio Chiaro\_GR, die im Kontrast mit der Farbe des angrenzenden Bodenbelags zu verwenden sind.

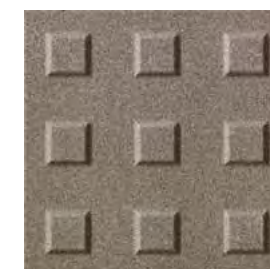

Baldosas de formato cuadrado de 20 x 20 cm. con dos tipos distintos de formas geométricas en relieve, correspondientes a las señales básicas del código de itinerario rectilíneo y del código de peligro, especialmente estudiadas para responder a las exigencias de seguridad y de independencia de las personas invidentes y con visibilidad reducida, previstas para el mercado austriaco. Ambas señales están disponibles en dos acabados de la serie Graniti: Graniti Grigio Scuro\_GR y Graniti Grigio Chiaro\_GR, a utilizar en contraste con el color de la pavimentación contigua.

Квадратная плитка 20 x 20 см с двумя разными геометрическими формами рельефа, соответствующими базовым обозначениям кода движения по прямой и кода опасности, специально разработана для удовлетворения потребностей по безопасности и независимому передвижению незрячих и слабовзрячих людей для австрийского рынка. Обе системы обозначений выполнены в двух отделках серии Graniti: Graniti Grigio Scuro\_GR и Graniti Grigio Chiaro\_GR, и используются в качестве контраста с основным напольным покрытием.

M6JW Turn Code 60x60\*

Danger Code \*\*

\* Questo pezzo è da utilizzare insieme allo Straight Direction Code solo nel formato 30x30 • This item should be used with the Straight Direction Code in the 30x30 cm size only. • Cette pièce ne doit être utilisée avec le Straight Direction Code que dans le format 30x30. • Diese Fliese wird zusammen mit dem Straight Direction Code nur im Format 30x30 cm verwendet. • Esta pieza ha de utilizarse junto al Straight Direction Code sólo en el formato de 30x30. • Этот элемент должен использоваться вместе с кодом Straight Direction Code только в формате 30x30.

\*\* Si tratta di un codice composto da due codici distinti: una fila di Stop Code e una di Attention-Service Code. • This is a code made up of two different codes: one string is the Stop Code and the other is the Attention-Service Code. • Il s'agit d'un code composé de deux codes distincts : une rangée de Stop Code et une de Attention-Service Code. • Dies ist ein Code, der sich aus zwei separaten Codes zusammensetzt: eine Reihe Stop-Codes und eine Reihe Attention-Service-Codes. • Se trata de un código compuesto por dos códigos distintos: una fila de Stop Codes y otra de Attention-Service Codes. • Этот элемент должен использоваться вместе с кодом Straight Direction Code только в формате 30x30.

**Serie di piastrelle quadrate con forme geometriche a rilievo costituita dai codici base di Autonomy 01 (percorso rettilineo e arresto) e da quattro codici aggiuntivi che permettono di ampliare la gamma di informazioni:**

- codice di servizio 20x20 cm.
- codice di incrocio 20x20 cm.
- codice di svolta a L (composto da 4 piastrelle in formato 30x30 cm)
- codice di pericolo, che segnala una zona da affrontare con cautela, composto da file accostate di codici di arresto e di attenzione in formato 20x20 cm.

**Colori: Giallo per il codice di arresto, Panna per tutti gli altri codici.**

A series of squared tiles with tactile geometric shapes including the base codes of Autonomy 01 (straight forward and stop signs) and four additional codes that increase the amount of information:

- service code 20x20.
  - crossing code 20x20.
  - L-shaped turning code (composed by 4 tiles with a 30x30 format).
  - danger code that marks a dangerous area, composed by lines of stop and careful codes put side by side in a 20x20 format.
- Colours: Giallo (Yellow) for the stop code, Panna (Cream/Ivory) for all the other codes.

Série de carreaux de forme carrée avec des motifs géométriques en relief, comprenant des codes base d'Autonomy 01 (parcours rectiligne et arrêt) et quatre codes supplémentaires qui permettent d'élargir la gamme d'informations :

- code de service 20x20 cm.
- code de croisement 20x20 cm.
- code de tournant en "L" (composé de 4 carreaux de 30x30 cm)
- code de danger signalant un endroit à affronter avec précaution, composé de rangées juxtaposées de codes d'arrêt et d'attention, de 20x20 cm.

Couleurs: Giallo (Jaune) pour le code d'arrêt, Panna (Crème) pour tous les autres codes.

Eine Serie quadratischer Fliesen mit geometrischen Formen, die als Relief gestaltet sind, bestehend aus den Basiscodes von Autonomy 01 (gerader Weg und Haltepunkt) und vier weiteren Codes, die das Informationsspektrum erweitern

- Servicecode 20x20 cm.
- Kreuzungscode 20x20 cm.
- Code für L-förmige Wendung (aus 4 Fliesen im Format 30 x 30 cm)
- Gefahrcode, der einen Bereich kennzeichnet, der mit Vorsicht begangen werden muss, bestehend aus nebeneinander angeordneten Reihen von Haltecodes und Warncodes im Format 20x20.

Farben: Giallo (Gelb) für Haltecode, Panna (Creme) für alle anderen Codes.

Serie de baldosas cuadradas con formas geométricas en relieve constituida por los códigos básicos de Autonomy 01 (itinerario rectilíneo y parada) y por cuatro códigos adicionales que permiten ampliar la gama de información:

- código de servicio de 20x20 cm.
- código de cruce de 20x20 cm.
- código de giro en L (compuesto por 4 baldosas en el formato de 30x30 cm)
- código de peligro, que señala una zona a afrontar con cautela, compuesto por filas arrimadas de códigos de parada y de atención en el formato de 20x20 cm.

Colores: Giallo (Amarillo) para el código de parada, Panna (Nata) para los demás códigos

Речь идет о сложном коде, состоящем из двух различных кодов: один ряд Stop Code и один Attention-Service Code. Серия квадратных плиток с рельефами геометрических форм, состоящая из базовых кодов Автономии 01 (движение по прямой и стоп) и четырех дополнительных кодов, которые позволяют расширить информационную гамму:

- служебный код 20x20 см.
- код перекрестка 20x20 см.
- код поворота L-образный (состоящий из 4 плиток форматом 30x30 см)
- код опасности, обозначающий зону, в которой нужна особая осторожность, состоящий из смежных рядов кода "стоп" и кода "внимание" форматом 20x20 см

Цвета: Giallo (желтый цвет) для кода "стоп", Panna (кремовый цвет) для всех остальных кодов.

Per una corretta composizione del disegno seguire la numerazione progressiva. Oltre alle pose suggerite (Posa A - B), la composizione Dégradé può essere realizzata in orizzontale (Posa C). • For the correct composition of the pattern, follow the numbered sequence. In addition to the suggested laying patterns (Laying pattern A - B), the Dégradé composition can be also laid horizontally (Laying pattern B). • Pour la bonne composition du dessin, suivre la numérotation séquentielle. Au-delà des poses suggérées (Pose A - B), la composition Dégradé peut être réalisée à l'horizontale (Pose C). • Für die richtige Zusammensetzung des Musters ist die laufende Nummerierung zu beachten. Neben den empfohlenen Verlegungen (Verlegung A - B) kann Dégradé auch waagrecht verlegt werden (Verlegung C). • Para configurar correctamente el dibujo, seguir la numeración progresiva. Además de las colocaciones sugeridas (Colocación A - B), la composición Dégradé se puede realizar en horizontal (Colocación C). • Для правильного составления рисунка придерживайтесь возрастающей нумерации. Помимо рекомендуемых укладок (укладка A - B), композиция Dégradé может быть выполнена по горизонтали (укладка C).

# Simbologia

– Symbols • Symboles • Symbole • Symbole • Символы

**Variazioni cromatiche** • Colour variations • Variations chromatiques • Farbvariationen • Variaciones cromáticas • Изменения цвета

**Monocromatica - V0:** piastrelle dello stesso tono sono molto uniformi, un solo colore • **Monochromatic - V0:** tiles of the same shade are very uniform, in just one colour • **Monochrome - V0 :** carreaux présentant une même tonalité et un aspect très uniforme, une seule couleur • **Monochrom - V0:** Fliesen im gleichen Farbton sind sehr einheitlich; nur eine Farbe. • **Monocromática - V0:** los azulejos del mismo tono son muy uniformes, de un solo color • **Одноцветность - V0:** плитки одного тона, очень однородные, лишь одного цвета.

**Aspetto uniforme - V1:** colore uniforme, le differenze tra piastrelle della stessa produzione sono minime • **Uniform appearance - V1:** uniform colour with only minimal differences between tiles in the same production run • **Aspect uniforme - V1 :** couleur uniforme, différences minimes entre les carreaux du même lot de production • **Einheitliches Aussehen - V1:** Einheitliche Farbe; die Unterschiede zwischen den Fliesen der gleichen Produktionscharge sind minimal • **Aspecto uniforme - V1:** color uniforme, las diferencias entre los azulejos de un mismo lote de producción son mínimas • **Однородный вид - V1:** однородный цвет, разница между плитками одной партии минимальна.

**Lieve variazione - V2:** apprezzabili differenze nell'aspetto di superficie e grafica all'interno della stessa produzione • **Slight variation - V2:** clearly distinguishable differences in texture and pattern within the same production run • **Variation légère - V2 :** différences visibles au niveau de l'aspect et de la fantaisie entre les carreaux du même lot de production • **Geringe Variation - V2:** Auffällige Unterschiede in Aussehen und Struktur innerhalb der gleichen Produktionscharge • **Variación leve - V2:** diferencias visibles en el aspecto de la superficie y los motivos dentro de un mismo lote de producción • **Легкие отличия - V2:** заметные отличия вида поверхности и графики в одной и той же партии.

**Moderata variazione - V3:** Significativa variazione di aspetto superficiale, grafica e colore da piastrella a piastrella e all'interno della stessa piastrella • **Si consiglia di visionare la gamma cromatica prima della selezione del materiale** • **Moderate variation - V3:** significant variation in texture, pattern and colour from tile to tile within the same production run. The colour range should be viewed before selecting the material • **Variation modérée - V3 :** variation significative au niveau de l'aspect, de la fantaisie et de la couleur entre les carreaux et au sein d'un même carreau. Il est recommandé de consulter la gamme des couleurs avant de sélectionner le matériel • **Mäßige Variation - V3:** Bedeutende Variation in Aussehen, Struktur und Farbe von Fliese zu Fliese und in ein und derselben Fliese. Es wird empfohlen, das Farbsortiment vor der Auswahl des Materials zu prüfen • **Variación moderada - V3:** variación considerable en el aspecto superficial, los motivos y el color entre un azulejo y otro y dentro del propio azulejo. Es aconsejable visualizar la gama cromática antes de seleccionar el material • **Средние отличия - V3:** значительные отличия вида поверхности, графики и цвета у разных плиток и на одной и той же плитке. Перед отбором материала рекомендуется посмотреть цветовую гамму.

**Sostanziale/random - V4:** Variazioni irregolari da piastrella a piastrella. Una piastrella può differire totalmente nell'aspetto superficiale e colore da un'altra. Si consiglia di visionare la gamma cromatica prima della selezione del materiale • **Substantial/random variation - V4:** random differences from tile to tile. One tile may have totally different texture and colour from another. The colour range should be viewed before selecting the material • **Variation importante/random - V4 :** variations irrégulières entre les carreaux. L'aspect et la couleur peuvent être complètement différents d'un carreau à l'autre. Il est recommandé de consulter la gamme des couleurs avant de sélectionner le matériel • **Stark/Zufällig - V4:** Wesentliche Variationen von Fliese zu Fliese. Eine Fliese kann sich in Aussehen und Farbe komplett von einer anderen unterscheiden. Es wird empfohlen, das Farbsortiment vor der Auswahl des Materials zu prüfen • **Sustancial/aleatoria - V4:** variaciones irregulares entre un azulejo y otro. Un azulejo puede ser completamente diferente de otro en el aspecto superficial y el color. Es aconsejable visualizar la gama cromática antes de seleccionar el material • **Существенные отличия/произвольный цвет - V4:** неоднородные изменения на разных плитках. Каждая плитка может полностью отличаться по виду поверхности и цвету от другой. Перед отбором материала рекомендуется посмотреть цветовую гамму.

Per le collezioni con grado di stonizzazione V2, V3 e V4 si raccomanda di scegliere le piastrelle da più scatole, in modo da garantire una maggiore varietà ed alternanza cromatica e grafica, ottenendo così un maggior effetto naturale • **For collections with V2, V3 and V4 shade variation, tiles should be taken from more than one box at a time to guarantee a greater variety and alternation of colouring and patterns, for a more natural effect** • **Pour les collections présentant un degré de variation de nuance V2, V3 et V4, il est recommandé de choisir des carreaux provenant de différentes boîtes, afin de garantir plus de variété et une meilleure alternance des motifs et des couleurs, ce qui permet ainsi d'obtenir un effet naturel plus prononcé** • **Für die Kollektionen mit den Schattierungen V2, V3 und V4 wird empfohlen, die Fliesen aus verschiedenen Kartons zu mischen, um eine größere Farben- und Strukturvielfalt zu erzielen und die natürliche Wirkung zu verstärken** • **En las colecciones que presenten grados de destonificación V2, V3 y V4, se recomienda tomar azulejos de varias cajas para garantizar una mayor variedad y alternancia cromática y gráfica y así conseguir un mayor efecto natural** • **Для коллекций с отличием тона V2, V3 и V4 рекомендуется выбирать плитку из нескольких коробок, чтобы обеспечить наибольшее разнообразие и чередование цветов и графики, получая тем самым наиболее выраженный натуральный эффект.**

Ogni simbolo, essendo puramente indicativo, deve essere rapportato alla relativa e specifica normativa • **Each symbol is merely indicative and must be referred to the specific relevant standard** • **Chaque symbole est purement indicatif et il renvoie toujours à la norme spécifique correspondante** • **Die Symbole dienen nur als Richtangabe. Es wird auf die entsprechende einschlägige Norm verwiesen** • **Cada símbolo, meramente indicativo, se debe relacionar con la normativa específica correspondiente** • **Каждый символ несет лишь только приблизительное значение и должен соотноситься с соответствующим специфическим стандартом.**

# Destinazioni d'uso

– Intended use • Destinations d'emploi • Anwendungsbereich • Uso previsto • Области применения

**D** Materiali consigliati solo per bagni e camere da letto di abitazioni; ogni abrasione deve essere evitata • Tiles suitable only for residential bathrooms and bedrooms; any type of abrasion must be avoided • Matériaux conseillés uniquement pour salles de bains et chambres ; éviter tout type d'abrasion • Nur für Bäder und Schlafzimmer von Wohnungen empfohlen; jeder Abrieb muss vermieden werden • Materiales aconsejados solamente para baños y dormitorios de viviendas; se debe evitar toda abrasión • Материалы рекомендованы только для ванных комнат и спален жилых помещений. Следует избегать какого бы то ни было абразивного воздействия.

**E** Materiali consigliati per tutti i locali di un'abitazione, con esclusione dell'ingresso e della cucina; deboli sollecitazioni all'abrasione • Tiles suitable for any room of a house except for entrance areas and kitchens. Low stress abrasive wear • Matériaux conseillés pour toutes les pièces de la maison, à l'exception de l'entrée et de la cuisine ; abrasion sous contraintes faibles • Für alle Wohnräume geeignet, mit Ausnahme des Eingangsbereichs und der Küche; leichte Abriebbeanspruchung • Materiales aconsejados para todas las habitaciones de una vivienda, excluyendo el vestíbulo y la cocina; esfuerzos de débil intensidad por abrasión • Материалы рекомендованы для любых жилых помещений, кроме прихожей и кухни. Допускается слабое абразивное воздействие.

**F** Materiali consigliati per qualsiasi locale di un'abitazione che non abbia collegamenti diretti con l'esterno o accessi non protetti da zerbini. Medie sollecitazioni all'abrasione • Tiles suitable for any room of a house without direct access from the outside or access not protected by doormats. Average stress abrasive wear • Matériaux conseillés pour toutes les pièces de la maison sans accès direct de l'extérieur ou dont l'accès de l'extérieur est protégé par des paillasons. Abrasion sous contraintes moyennes • Für alle Wohnräume ohne direkten Zugang von außen geeignet, welche nicht durch Fußmatten geschützt sind. Mittlere Abriebbeanspruchung • Materiales aconsejados para cualquier habitación de una vivienda sin accesos directos desde el exterior o accesos no protegidos por felpudos; esfuerzos de mediana intensidad por abrasión • Материалы рекомендованы для любых жилых помещений, не имеющих прямого выхода на улицу или же доступа без входных ковриков. Среднее абразивное воздействие.

**G** Materiali consigliati per locali sottoposti a sollecitazioni all'abrasione medio pesanti come: case individuali, commerciale leggero • Materials suitable for rooms subject to medium-heavy abrasion, such as detached houses and light-traffic commercial buildings • Matériaux recommandés pour des locaux soumis à des contraintes d'abrasion moyennes et fortes : pavillons, espaces commerciaux soumis à un trafic léger, etc • Empfohlene Materialien für Räume mit mittlerer Abriebbeanspruchung wie Einfamilienhäuser, Gewerbebereiche mit leichter Beanspruchung • Materiales aconsejados para locales sometidos a una abrasión de mediana y fuerte intensidad como: casas unifamiliares, actividades comerciales con tránsito limitado • Материалы рекомендованы для помещений, подверженных средне-тяжелому абразивному воздействию, как-то: частные дома, коммерческие объекты с небольшой интенсивностью хождения.

**H** Materiali consigliati per sollecitazioni all'abrasione relativamente forti in ambienti anche non protetti da agenti graffianti, sia pubblici che privati • Materials suitable for situations of relatively hard abrasion in environments without protection against scratching, both public and private • Matériaux recommandés pour des locaux soumis à des fortes contraintes d'abrasion, même non protégés contre les agents abrasifs, aussi bien dans le secteur public que dans le secteur privé • Empfohlene Materialien für Bodenbeläge im Objekt- und Wohnbereich mit stärkerer Abriebbeanspruchung und ohne Schutz gegen kratzende Verschmutzung • Materiales aconsejados para ambientes, tanto públicos como privados, sometidos a una abrasión relativamente fuerte y no protegidos de agentes que rayan • Материалы рекомендованы для относительно сильного абразивного воздействия в помещениях, даже не защищенных от царапающих агентов, как общественного, так и частного использования.

Alcuni battiscopa non sono resistenti al gelo, si consiglia la posa nei soli ambienti interni • Some skirting tiles are not frost-proof, we recommend indoor applications only • Quelques plinthes ne résistent pas au gel et leur pose n'est donc conseillée que dans des locaux internes • Einige Sockelleisten sind nicht frostbeständig; wir empfehlen die Verlegung ausschließlich in Innenräumen • Algunos rodapiés no son resistentes al hielo, se aconseja usarlos sólo en interiores • Некоторые плинтусы не морозостойкие, поэтому их укладка рекомендуется лишь только во внутренних помещениях.

Per la posa dei prodotti ingelivi si consiglia la realizzazione di "fughe", o giunti di posa, di dimensione adeguata alle tolleranze dimensionali delle piastrelle ed al tipo di impiego richiesto. L'esecuzione di fori e tagli di precisione sulle piastrelle in gres porcellanato deve essere effettuata con attrezzature specifiche • For the installation of frost-resistant products we recommend the creation of "joints", or laying joints, of a suitable dimension for the dimensional tolerance of the tiles and for the type of use required. The execution of holes and precision cuts on tiles in porcelain stoneware must be made using specific equipment • Pour la pose des produits ingélifs, nous conseillons la réalisation de "joints", ou de joints de pose, de dimension adaptée aux tolérances dimensionnelles des carreaux et au type d'emploi voulu. Les trous et les coupes de précision sur les carreaux en grès cérame doivent être effectués au moyen d'outils spécifiques • Für das Verlegen von frostbeständigen Produkten empfiehlt sich die Ausführung von "Fugen", bzw. Verlegefugen, deren Größe den Maßtoleranzen der Fliesen und dem Verwendungszweck angepasst sind. Bohrungen und Präzisionsschnitte in Feinsteinzeugfliesen dürfen nur mit speziellen Werkzeugen ausgeführt werden • En la colocación de los productos resistentes a la helada, se aconseja realizar "juntas" o juntas de colocación con una dimensión adecuada a las tolerancias dimensionales de las baldosas y al tipo de empleo requerido. La ejecución de orificios y cortes de precisión en los azulejos y baldosas de gres porcelánico debe ser llevada a cabo con herramientas específicas • Некоторые плитусы не морозостойкие, поэтому их укладка рекомендуется лишь только во внутренних помещениях.

# Slabs Variations

– Variazioni Grafiche • Variations des Textures Graphiques • Plattentypen • Variaciones de los Diseños Gráficos • Вариации Графики

Le immagini riportate rappresentano una delle diverse grafiche del prodotto che vengono realizzate in successione sulla linea di produzione per ogni codice. Il codice prodotto è univoco e non è quindi possibile garantire la presenza di tutte le facce nella preparazione del materiale.

È possibile visualizzare e scaricare tutte le grafiche disponibili nell'area download del sito [www.marazzi.it](http://www.marazzi.it).

The images shown illustrate one of the product patterns manufactured in succession on the production line for each article. Every product code is unique and so it is not possible to guarantee that every tile surface will be included when the material is prepared.

The entire range of slab patterning variations can be downloaded from the download area of the [www.marazzi.it](http://www.marazzi.it) website.

Les images reproduisent l'une des différentes textures graphiques du produit, réalisées l'une à la suite de l'autre sur la ligne de production pour chaque code. Le code produit est univoque et il est impossible de garantir la présence de toutes les variantes lors de la préparation du matériau.

Toutes les textures graphiques disponibles peuvent être visualisées et téléchargées dans la section téléchargement du site à l'adresse [www.marazzi.it](http://www.marazzi.it).

Die Bilder zeigen eine der unterschiedlichen Materialzeichnungen des Produktes, die in der Produktionslinie für jeden Code nacheinander hergestellt werden. Es handelt sich um einen einheitlichen Produktcode; aus diesem Grund ist es nicht möglich, bei der Vorbereitung des Materials zu gewährleisten, dass alle Oberflächen vorhanden sind.

Es ist möglich, alle verfügbaren Materialzeichnungen im Download-Bereich der Website [www.marazzi.it](http://www.marazzi.it) herunterzuladen.

Las imágenes presentadas muestran uno de los diseños gráficos del producto que se fabrican en serie en la línea de producción en referencia a cada código. El código del producto es unívoco: esto significa que no se puede garantizar la presencia de todas las caras en la preparación del material.

Puedes visualizar y bajarte todos los diseños gráficos disponibles en el área de descargas del sitio web [www.marazzi.it](http://www.marazzi.it).

На изображениях приводится один из нескольких вариантов графики изделий, которые выпускаются на производственной линии в последовательности для каждого кода. Код изделия является единым, следовательно, нельзя гарантировать наличие всех вариантов при подготовке материала.

Все варианты графики можно отобразить и скачать в разделе загрузок на сайте [www.marazzi.it](http://www.marazzi.it).

La Certificazione CCC, introdotta nel 2002, interessa sia i prodotti di importazione che quelli di produzione Cinese destinati a quel mercato. Le informazioni sulla Certificazione CCC riguardano in generale la sicurezza e la salute, con particolare riferimento, nel caso delle piastrelle di ceramica, alle sole piastrelle in Gres Porcellanato, con un assorbimento minore o uguale allo 0,5%. La Certificazione si ottiene attraverso l'intervento di istituti appositamente accreditati dalle Autorità Cinesi, tutti con sede in Cina • CCC certification, introduced in 2002, is applicable to all products imported into and manufactured in china for sale on the chinese market. The information specified by CCC certification generally concerns health and safety and, regarding ceramic tiles in particular, specifically refers only to tiles in porcelain stoneware with absorption equal to or lower than 0.5%. The certification is issued by bodies specially accredited by the chinese authorities, which are all based in China • Instaurée en 2002, la certification CCC concerne aussi bien les produits d'importation que ceux fabriqués en Chine et destinés à ce marché. En general, les informations de la certification CCC portent sur la sécurité et la santé. En ce qui concerne les carrelages ceramiques, seuls les carreaux en gres cerame, dont l'absorption est inférieure ou égale à 0,5%, font l'objet d'une attention particulière. La certification est délivrée par des organismes accrédités expressément par les autorités chinoises. Les sièges de ces organismes sont tous en Chine • Die im Jahr 2002 eingeführte CCC-Zertifizierung betrifft sowohl importierte Produkte als auch solche aus chinesischer Herstellung, die für diesen Markt bestimmt sind. Die CCC-Zertifizierung betrifft im allgemeinen Sicherheit und Gesundheit, mit besonderem Bezug bei Keramikfliesen auf Feinsteinzeugfliesen mit einer Wasseraufnahme von weniger als oder gleich 0,5%. Die Zertifizierung erfolgt durch von den chinesischen Behörden zugelassene Stellen, die ihren Sitz in China haben • La certificación CCC, introducida en 2002, concierne tanto a los productos de importación como a los de fabricación china destinados a ese mercado. La información sobre la certificación CCC se refiere en general a la seguridad y a la salud, con especial referencia, en el caso de los azulejos y baldosas de cerámica, a los azulejos y las baldosas de gres porcelánico, con una absorción inferior o igual al 0,5%. Dicha certificación se obtiene a través de la intervención de organismos acreditados por las autoridades chinas, todos ellos con sede en China • Сертификация CCC, введенная в 2002 году, касается как импортруемой продукции, так и китайской, предназначенной для внутреннего рынка. Сведения, предусмотренные сертификацией CCC, касаются в основном безопасности и охраны здоровья и, в частности, относятся к плитке из керамического гранита с водопоглощением равным или ниже 0,5%. Данный сертификат выдается учреждениями, специально аккредитованными Китайскими властями, и расположенными на территории Китая.

La certificazione francese QB UPEC offre all'utente una garanzia: assicura che i prodotti consegnati, recanti i loghi QB UPEC, siano conformi a quanto previsto dalla norma NF EN 14411 secondo le presenti regole di certificazione e che tali prodotti possiedono le caratteristiche d'uso definite nel disciplinare CSTB «Specifiche tecniche per la classificazione UPEC dei rivestimenti ceramici per pavimenti». Le quattro lettere indicano rispettivamente:

U: resistenza all'usura da calpestio  
P: resistenza meccanica agli spostamenti di oggetti mobili e fissi  
E: comportamento in presenza di acqua  
C: resistenza agli agenti chimici correnti  
Idoneità delle piastrelle ceramiche alla posa su piedini.  
La lista completa e aggiornata dei prodotti certificati è visionabile sul sito [www.cstb.fr](http://www.cstb.fr). Per qualsiasi ulteriore informazione contattare Marazzi Group.

French QB UPEC certification provides the user with a quality guarantee: it confirms that the products delivered, marked with the QB UPEC logos, comply with the prerequisites of the NF EN 14411 standard in accordance with the current certification rules and that they have the performance characteristics specified in the CSTB (Centre Scientifique et Technique du Bâtiment - Scientific and Technical Centre for Building) "Technical Specifications for the UPEC Classification of Ceramic Floor Coverings". The four letters refer to:  
U: resistance to foot traffic wear  
P: mechanical resistance to the shifting of movable and fixed objects  
E: resistance to water  
C: resistance to commonly used chemicals  
Suitability of ceramic tiles for installation on pedestals.  
The full, up-to-date list of certified products can be viewed at [www.cstb.fr](http://www.cstb.fr). Please contact the Marazzi Group for any further information

La certification française QB UPEC représente une garantie pour l'utilisateur. En effet, elle atteste la conformité des produits marqués QB UPEC aux spécifications de la norme NF EN 14411 selon les présentes règles de certification. Elle garantit également que ces produits possèdent les caractéristiques d'usage établies dans le cahier du CSTB « Revêtements de sol céramiques - Spécifications techniques pour le classement UPEC ». Les quatre lettres indiquent respectivement :  
U - Usure à la marche  
P - Résistance mécanique au déplacement d'objets mobiles et fixes  
E - Comportement à l'eau  
C - Tenue aux agents chimiques ordinaires  
Aptitude des carreaux céramiques à une mise en œuvre sur plots.  
La liste complète et à jour des produits certifiés peut être consultée sur le site [www.cstb.fr](http://www.cstb.fr). Pour tout renseignement complémentaire, veuillez contacter Marazzi Group.

Die französische QB UPEC Zertifizierung garantiert dem Endkunden, dass die mit dem Logo QB UPEC gekennzeichneten Artikel den Bestimmungen der Norm NF EN 14411 gemäß den Zertifizierungsregelungen entsprechen und die Gebrauchseigenschaften besitzen, die vom Merkblatt des CSTB (Centre Scientifique et Technique du Bâtiment - Wissenschaftliches und technisches Zentrum für Bauwesen) „Technische Vorschriften für die QB UPEC Klassifizierung von keramischen Bodenbelägen“ festgelegt sind. Die vier Buchstaben bezeichnen jeweils:  
U: Trittbetridge Abnutzung  
P: Eindrucksuren durch Mobiliar und sonstige fest installierte oder mobile Einrichtungen (Objekte)  
E: Verhalten gegenüber Wasser  
C: Verhalten gegenüber Chemikalien  
Eignung der keramischen Fliesen zur Verlegung auf Stelzlagern.  
Die komplette und aktualisierte Liste der zertifizierten Produkte ist im Internet auf [www.cstb.fr](http://www.cstb.fr) einsehbar. Für ausführliche Informationen kontaktieren Sie bitte die Marazzi Group.

La certificación francesa QB UPEC le ofrece al usuario la garantía de que los productos entregados que lleven los logotipos QB UPEC resultan conformes con lo previsto por la norma NF EN 14411 de acuerdo con las presentes reglas de certificación y que tales productos poseen las características de uso referidas en el reglamento del CSTB (Centro Científico y Técnico de la Construcción de Francia) denominado «Especificaciones técnicas para la clasificación UPEC de revestimientos cerámicos para pavimentos». Respectivamente, las cuatro letras indican:  
U: resistencia a la abrasión provocada por el tránsito peatonal  
E: resistencia mecánica al desplazamiento de objetos móviles y fijos  
E: comportamiento en presencia de agua  
C: resistencia a los productos químicos de uso común.  
Idoneidad de las baldosas cerámicas para la colocación sobre soportes.  
La lista completa y actualizada de los productos certificados se puede consultar accediendo al sitio web [www.cstb.fr](http://www.cstb.fr). Para más información pueden ponerse en contacto con Marazzi Group.

Французский сертификат QB UPEC предлагает клиенту следующую гарантию: подтверждает, что поставленная продукция, имеющая логотип QB UPEC, соответствует нормам NF EN 14411 по существующим правилам сертификации, и что данная продукция обладает характеристиками по эксплуатации, определенными в правилах CSTB "Технические спецификации для классификации QB UPEC керамических материалов для настила полов". Четыре буквы сокращения обозначают:  
U: износостойкость при хождении  
P: механическая стойкость к передвижению передвижных и неподвижных предметов  
E: поведение при наличии воды  
C: стойкость к воздействию химических веществ  
Пригодность керамической плитки для укладки на опоры.  
Полный обновленный перечень сертифицированных продуктов приводится на сайте [www.cstb.fr](http://www.cstb.fr). За любой другой информацией обращайтесь в Marazzi Group.

## Qualità e Ambiente • Quality and Environment • La Qualité et L'environnement • Qualität und Umwelt • Calidad y Ambiente • Качество и Окружающая Среда

Marazzi Group ha ottenuto nel 2022, tra le prime aziende al mondo, la Certificazione ISO 17889-1, prima norma ISO in materia di sostenibilità nel settore delle costruzioni a livello mondiale. La norma, nata nel 2021, ha definito per la prima volta un sistema per la valutazione della sostenibilità dei prodotti utilizzando 38 criteri, qualitativi e quantitativi, identificati e suddivisi secondo i tre pilastri della sostenibilità: ambientale, sociale ed economica, in cui ad essere analizzato è l'intero ciclo di vita delle piastrelle di ceramica, dalla selezione delle materie prime, alla produzione, distribuzione e installazione, fino all'uso e alla gestione del fine vita del prodotto, valutando anche parametri di sicurezza dei lavoratori e dei consumatori. Il prestigioso riconoscimento, rilasciato da Certiquality, dimostra l'impegno dell'azienda nella tutela del patrimonio naturale e delle persone, in linea con l'obiettivo 12 dell'agenda Onu.

In 2022 Marazzi Group became one of the first companies worldwide to achieve Certification under ISO 17889-1, the world's first ISO sustainability standard for the construction industry. The standard, launched in 2021, established the first system for assessing products' sustainability using 38 quality and quantity criteria, identified and subdivided in accordance with the three fundamental areas of sustainability: environmental, social and economic. It analyses ceramic tiles' entire lifecycle, from raw material selection to production, distribution and installation, through to use and end-of-life management, also assessing worker and consumer safety criteria. This coveted accolade, issued by Certiquality, reflects the company's commitment to safeguarding the natural heritage and people, in line with goal 12 of the UN Agenda.

Marazzi Group a été l'une des premières entreprises au monde à obtenir en 2022 la certification ISO 17889-1, la première norme ISO en matière de durabilité dans le secteur de la construction au niveau mondial. Publiée en 2021, la norme définit pour la première fois un système d'évaluation de la durabilité des produits à l'aide de 38 critères, tant qualitatifs que quantitatifs, identifiés et classés en fonction des trois piliers de la durabilité : environnemental, social et économique. Elle analyse l'ensemble du cycle de vie des carreaux céramiques, de la sélection des matières premières à la production, la distribution et l'installation, en passant par l'utilisation et la gestion de la fin de vie du produit, en évaluant également les paramètres de sécurité des travailleurs et des consommateurs. Ce label prestigieux, décerné par Certiquality, témoigne de l'engagement de l'entreprise à protéger le patrimoine naturel et humain, conformément à l'objectif 12 de l'agenda des Nations unies.

Marazzi Group erlangte 2022 als eines der ersten Unternehmen weltweit die

Zertifizierung nach ISO 17889-1, der ersten ISO-Norm für Nachhaltigkeit in der internationalen Baubranche. Die 2021 entstandene Norm legt erstmals ein System für die Nachhaltigkeitsbewertung von Produkten anhand von 38 qualitativen und quantitativen Kriterien fest, die nach den drei Grundpfeilern für Nachhaltigkeit – Umwelt, Gesellschaft und Wirtschaft – gegliedert sind und den gesamten Lebenszyklus der keramischen Fliese, von der Auswahl der Rohstoffe über die Produktion, den Vertrieb und den Einbau bis hin zum End-of-Life-Management des Produkts einschließlich der Sicherheitsparameter für Mitarbeiter und Verbraucher beurteilt. Die hochwertige Anerkennung, ausgestellt von Certiquality, belegt das Engagement des Unternehmens zum Schutz der Natur und des Menschen im Einklang mit SDG 12 der UNO-Agenda.

En 2022 Marazzi Group ha sido una de las primeras empresas del mundo entero en obtener la Certificación ISO 17889-1, primera norma ISO en materia de sostenibilidad dentro del ramo de la construcción en el ámbito internacional. La norma, promulgada en 2021, definió por primera vez un sistema de evaluación de la sostenibilidad de los productos aplicando treinta y ocho criterios, cualitativos y cuantitativos, identificados y subdivididos basándose en las tres columnas de la sostenibilidad, la ambiental, la social y la económica, de acuerdo con la cual lo que se analiza es el ciclo de vida de los azulejos de cerámica en su conjunto, desde la selección de las materias primas, hasta la fabricación, distribución e instalación, y hasta el uso y la gestión del final de la vida del producto, evaluando asimismo parámetros de seguridad de los trabajadores y los consumidores. El prestigioso reconocimiento, emitido por Certiquality, da prueba del compromiso de la empresa en pro de la salvaguardia del patrimonio natural y de las personas, en cumplimiento del objetivo número doce de la agenda de la ONU.

V 2022 году Marazzi Group, одна из первых компаний в мире, получила сертификат соответствия стандарту ISO 17889-1 - первому стандарту ISO мирового уровня в области экологической устойчивости в строительстве. Этот стандарт, разработанный в 2021 году, впервые определил систему оценки экологической рациональности продукции с использованием 38 качественных и количественных критериев, которые определяются и подразделяются по трем столпам экологической устойчивости: окружающая среда, социальная сфера и экономика. В анализе рассматривается весь жизненный цикл керамической плитки: выбор сырья, производство, дистрибуция, установка, а также использование и конец жизненного цикла изделия, оценивая также параметры безопасности сотрудников и потребителей. Это престижное признание, выданное сертифицирующим органом Certiquality, свидетельствует об усилиях компании в области защиты природного наследия и людей, что соответствует цели 12 Повестки ООН в области устойчивого развития.

## Qualità e Ambiente • Quality and Environment • La Qualité et L'environnement • Qualität und Umwelt • Calidad y Ambiente • Качество и Окружающая Среда

La filosofia di Marazzi è da sempre improntata al conseguimento di un prodotto tecnicamente all'avanguardia e dagli elevati standard qualitativi ed estetici. Marazzi è stata una delle prime aziende operanti nel settore ad aver ottenuto nel 1994 la certificazione ISO 9001 del proprio sistema di gestione della Qualità aziendale, dalla progettazione e sviluppo del prodotto, ai processi produttivi e alle attività di servizio. Marazzi dedica una grandissima attenzione all'ambiente, con la consapevolezza di dover gestire, con un approccio attivo, le problematiche derivanti dalla presenza produttiva sul territorio. Nel 2003 ha certificato il proprio sistema di gestione Ambientale secondo la norma ISO 14001. La sicurezza del personale è di fondamentale importanza per l'azienda, che cerca il miglioramento continuo attraverso costanti verifiche e controlli, investimenti e formazione, con il coinvolgimento diretto dei lavoratori. L'impegno di Marazzi è dimostrato dalla certificazione ISO 45001 del sistema di gestione della Salute e Sicurezza sul Lavoro.

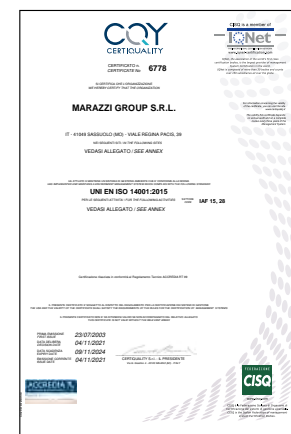

Marazzi's philosophy has always been geared towards achieving a technically advanced product with high quality and aesthetic standards. Marazzi was one of the first firms in the industry to obtain ISO 9001 certification, in 1994, for its quality management system, from product design and development to production processes and service activities. Marazzi pays considerable attention to the environment, conscious of its duty to take an active approach to managing the problems that derive from manufacturing in the area. In 2003, its environmental management system was certified according to the ISO 14001 standard. Employee safety is of fundamental importance for the company, which strives towards continuous improvement through constant tests and checks, investments and training, directly involving workers. Marazzi's commitment is demonstrated by the ISO 45001 certification for the occupational health and safety management system.

Fidèle à sa philosophie, Marazzi a pour objectif de fabriquer un produit technique d'avant-garde et d'atteindre une qualité et une esthétique maximales. Marazzi a été l'une des premières entreprises du secteur à obtenir en 1994 la certification ISO 9001 pour son système de management de la qualité : des activités de conception et développement du produit aux processus de production, en passant par les services. Marazzi fait preuve d'un vif intérêt pour l'environnement, consciente qu'une démarche active est nécessaire pour gérer les problèmes occasionnés par sa présence sur le territoire. En 2003, l'entreprise a certifié son système de management environnemental selon la norme ISO 14001. Elle accorde une importance fondamentale à la sécurité du personnel et, pour cette raison, vise à une optimisation continue en mettant en œuvre des contrôles et audits fréquents, des investissements et des initiatives de formation avec la participation directe des travailleurs. Marazzi prouve son engagement par la certification ISO 45001 de son système de management de la santé et de la sécurité au travail. Im Vordergrund der Philosophie von Marazzi steht von jeher das Streben nach einem technisch wegweisenden Produkt und hohen qualitativen wie ästhetischen Standards.

Marazzi ist als eines der ersten Unternehmen der Branche bereits seit 1994 nach ISO 9001 zertifiziert. Die Zertifizierung umfasst die Produktplanung und -entwicklung, die Fertigungsprozesse und die technologieintensiven Produkte und Services. Umweltschutz wird bei Marazzi groß geschrieben. Deshalb geht das Unternehmen proaktiv mit den Problemen um, die sich aus der Produktionstätigkeit für den Standort und seine Einwohnergemeinschaft ergeben. Im Jahr 2003 erlangte es die Zertifizierung für das Umweltmanagementsystem nach der Norm ISO 14001. Die Mitarbeitersicherheit ist von grundlegender Bedeutung für Marazzi. Das belegt ein kontinuierlicher Verbesserungsprozess mit konstanten Prüfungen und Kontrollen, Investitionen und Schulungsmaßnahmen unter direkter Einbeziehung der Mitarbeiter. Marazzi erlangte in Anerkennung dieser Anstrengungen die Zertifizierung des Arbeits- und Gesundheitsschutzmanagements nach ISO 45001.

La filosofia di Marazzi siempre se ha orientado hacia la consecución de un producto de vanguardia en lo técnico y de elevados estándares en lo cualitativo y lo estético. Marazzi fue una de las primeras empresas del sector en obtener, en 1994, la certificación ISO 9001 de su sistema de gestión de la calidad empresarial, desde el diseño y el desarrollo de los productos hasta los procesos de producción y las actividades de prestación de servicios. Marazzi dedica una extraordinaria atención al medio ambiente, consciente de que ha de gestionar con una actitud proactiva los problemas derivados de la presencia productiva en el territorio. En 2003 certificó su sistema de gestión medioambiental con arreglo a la norma ISO 14001. La seguridad del personal es de fundamental importancia para la empresa, que trata de mejorar continuamente por medio de controles y comprobaciones constantes, inversiones y formación, e involucrando de manera directa a los trabajadores. El compromiso de Marazzi en este sentido queda demostrado con la obtención de la certificación ISO 45001 de su sistema de gestión de la salud y la seguridad en el trabajo.

Principi di lavoro di Marazzi sono sempre mirati alla produzione di prodotti tecnicamente all'avanguardia, con alti standard qualitativi ed estetici. Marazzi è stata una delle prime aziende del settore a ottenere nel 1994 la certificazione ISO 9001 per il proprio sistema di gestione della Qualità aziendale, dalla progettazione e sviluppo del prodotto, ai processi produttivi e alle attività di servizio. ## Green Building Council Italia

Marazzi Group S.r.l. è socio del Green Building Council Italia, associazione che promuove la cultura dell'edilizia sostenibile, energeticamente efficiente, rispettosa dell'ambiente, contribuendo a migliorare la qualità della vita dei cittadini attraverso lo standard di certificazione LEED®. Marazzi Group S.r.l. is a member of the Green Building Council Italia, an association that promotes sustainable, energy efficient and environmentally friendly building, helping to improve people's quality of life with the LEED® standards and certification. Marazzi Group S.r.l. est membre du GBC Italia (Green Building Council Italia) qui est une association dont l'objectif est de favoriser la diffusion d'une culture du bâtiment durable énergétiquement efficace, respectueuse de l'environnement en sensibilisant l'opinion publique sur son impact sur la qualité de la vie des citoyens, au travers du système de certification LEED®. Marazzi Group S.r.l. ist Mitglied des Green Building Council Italien, ein Verband, der die Kultur des nachhaltigen und energieeffizienten, umweltverträglichen Bauens fördert, indem zur Lebensqualität der Mitmenschen durch die LEED®-Zertifizierungsstandards beigetragen wird. Marazzi Group S.r.l. es socio del Green Building Council Italia, asociación que promueve la cultura de la construcción sostenible, energicamente eficiente y respetuosa con el medio ambiente, contribuyendo a mejorar la calidad de vida de los ciudadanos a través del estándar de certificación LEED®. Marazzi Group S.r.l. является членом ассоциации Green Building Council Italia, которая продвигает культуру экоустойчивого энергоберегающего строительства, щадящего окружающую среду, и способствует улучшению качества жизни граждан посредством сертификационного стандарта LEED®.

zertifiziert durch die international anerkannte Prüfstelle „Certiquality“, und tragen zur Erlangung von LEED® Punkten im Themenbereich Materialien und Ressourcen bei. • La certificación voluntaria LEED® (Leadership in Energy and Environmental Design) es el protocolo más difundido a nivel internacional para la construcción ecológica y el diseño sostenible promovido por el U.S Green Building Council. El sistema de calificación LEED® está estructurado en 9 categorías, cada una de las cuales está organizada en requisitos obligatorios y créditos determinados por las características del proyecto. Todos los productos de cerámica y gres porcelánico Marazzi, gracias a la calidad ecológica de todo el ciclo industrial de producción, contribuyen a la obtención de los créditos LEED® de los edificios, en particular, para las áreas temáticas relativas a Materiales y Recursos (MR), Sitio Sostenible (SS) y Calidad Ambiental Interior (EQ). Diversas colecciones de productos Marazzi (ver tabla abajo) están realizadas con el 40% de material reciclado, certificado por el instituto de certificación internacional «Certiquality», y participan en la obtención de créditos LEED® en la categoría Materiales y Recursos. • Добровольная сертификация LEED® (Leadership in Energy and Environmental Design) - это самый распространенный на международном уровне протокол для биостроительства и экологически рационального проектирования, продвигаемый U.S Green Building Council. Система рейтинга LEED® подразделяется на 9 категорий, каждая из которых предусматривает обязательные предварительные требования и кредиты, определяемые характеристиками проекта. Благодаря экологичности полного промышленного производственного цикла вся керамическая и керамогранитная продукция Marazzi способствует получению кредитов LEED® для зданий, в частности, для таких тематических разделов, как: Материалы и ресурсы (MR), Место экологического строительства (SS) и Качество среды в помещениях (EQ). Многочисленные линии продукции Marazzi (см. таблицу ниже) производятся с использованием 40% повторно переработанного материала, что сертифицируется международным сертификационным институтом Certiquality, и способствуют получению кредитов LEED® в категории Материалы и ресурсы.

## Greenguard

La Certificazione GREENGUARD GOLD garantisce che un prodotto soddisfi alcuni degli standard internazionali più rigorosi ed esaustivi in relazione alle basse emissioni di composti organici volatili (COV) in ambienti interni. Maggiori informazioni sono disponibili sul sito <http://spot.ulprospector.com>. GREENGUARD GOLD Certification ensures that a product has met some of the world's most rigorous and comprehensive standards for low emissions of volatile organic compounds (VOCs) into indoor air. For further information: <http://spot.ulprospector.com>. La certification GREENGUARD GOLD atteste qu'un produit est conforme à quelques-unes des normes les plus sévères et les plus complètes au monde en matière d'émissions dans l'air intérieur de composés organiques volatils (COV). Pour de plus amples informations, visitez le site: <http://spot.ulprospector.com>. Die GREENGUARD GOLD-Zertifizierung bescheinigt, dass ein Produkt die weltweit strengsten und umfassendsten Obergrenzen für die Emission von flüchtigen organischen Verbindungen (VOCs) in die Innenraumluft einhält. Weitere Informationen sind auf der Website des Umweltsiegels zu finden: <http://spot.ulprospector.com>. La certificación GREENGUARD GOLD garantiza que un producto cumple con algunas de las normas más estrictas y exhaustivas del mundo en materia de bajas emisiones de compuestos orgánicos volátiles (COV) al aire en espacios cerrados. Más información disponible en el sitio de la marca: <http://spot.ulprospector.com>. то сертификат GREENGUARD GOLD гарантирует, что продукция удовлетворяет один из наиболее строгих и всеохватывающих стандартов в мире по низкому выделению летучих органических соединений в воздухе помещений. Более подробную информацию можно получить на сайте знака Эколейбл: <http://spot.ulprospector.com>.

## SASO

SASO-ISO 13006 è lo standard implementato da SASO (Saudi Arabian Standards Organization), l'Organizzazione degli Standard Sauditi, per l'esportazione di piastrelle in Arabia Saudita. Saudi Quality Mark (SQM) è il marchio concesso ai prodotti che rispondono agli standard sauditi. • SASO-ISO 13006 is the standard implemented by SASO (Saudi Arabian Standards Organization) for the export of tiles to Saudi Arabia. The Saudi Quality Mark (SQM) is the mark granted to products which meet Saudi quality standards. • SASO-ISO 13006 es el estándar implementado por la SASO (Saudi Arabian Standards Organization), la Organización de Normas Saudíes, para la exportación de azulejos a Arabia Saudí. Saudi Quality Mark (SQM) es la marca concedida a los productos que cumplen con este estándar. • SASO-ISO 13006 ist die von SASO (Saudi Arabian Standards Organization), der Saudiarabischen Normenbehörde für den Export von Fliesen nach Saudiarabien eingeführte Norm. Saudi Quality Mark (SQM) ist das Siegel für Produkte, welche die saudiarabischen Normen erfüllen. • SASO-ISO 13006 est la norme mise en œuvre par la SASO (Saudi Arabian Standards Organisation, l'organisme de normalisation saoudien) pour l'exportation de carreaux vers l'Arabie saoudite. La marque de qualité saoudienne (Saudi Quality Mark, SQM) est la marque accordée aux produits qui répondent aux normes saoudiennes. • SASO-ISO 13006 — это стандарт, введенный SASO (Организацией по стандартизации Саудовской Аравии), Саудовской организацией по стандартизации, для экспорта плитки в Саудовскую Аравию. Знак качества Саудовской Аравии (SQM) — это знак, присваиваемый продукции, соответствующей саудовским стандартам.

# Certificazioni

- Certifications • Certifications • Zertifizierungen • Certificaciones • Сертификации

## EPD (Environmental Product Declaration)

Marazzi Group ha valutato gli impatti ambientali legati ai propri prodotti lungo tutto il loro ciclo di vita, a partire dall'estrazione e lavorazione delle materie prime fino al recupero dei rifiuti di demolizione. I risultati di questa analisi LCA (life cycle assessment), condotta secondo le norme internazionali della serie ISO 14040, sono pubblicati nella dichiarazione ambientale di prodotto EPD (ISO 14025 e EN 15804) che contribuisce al raggiungimento di crediti per la certificazione LEED. • Marazzi Group has assessed its products' environmental impact throughout their life cycle, from extraction and processing of the raw materials through to the recycling of demolition spoil. The findings of this LCA (Life Cycle Assessment), performed in accordance with the ISO 14040 series international standards, have been published in the Environmental Product Declaration (ISO 14025 and EN 15804), contributing to the attainment of LEED certification credits. • Marazzi Group a évalué les impacts de ses produits sur l'environnement pendant tout leur cycle de vie, depuis l'extraction et la transformation des matières premières jusqu'à la récupération des déchets de démolition. Les résultats de cette analyse du cycle de vie (ACV), menée selon les normes internationales ISO 14040, sont publiés dans la Déclaration environnementale de produit (DEP) (selon les normes ISO 14025 et EN 15804) qui contribue à l'obtention des crédits pour la certification LEED. • Die Marazzi Group hat die Umweltwirkung der eigenen Produkte im Verlauf ihres gesamten Lebenszyklus beurteilt, beginnend bei der Rohstoffgewinnung und -verarbeitung bis hin zur Wiederverwertung von Bauschutt. Die Ergebnisse dieser Ökobilanz (Life Cycle Assessment, LCA) nach der internationalen Normenreihe ISO 14040 wurden in der Umwelt-Produktdeklaration EPD gemäß ISO 14025 und EN 15804 veröffentlicht, die zur Zuerkennung von Punkten für die Zertifizierung nach dem Zertifizierungssystem LEED beiträgt. • Marazzi Group ha evaluado el impacto ambiental relacionado con sus productos a lo largo de todo su ciclo de vida, desde la extracción y la transformación de las materias primas hasta la valorización de los residuos de la construcción y demolición. Los resultados de este análisis de ciclos de vida LCA (life cycle assessment), realizado de acuerdo con las normas internacionales de la serie ISO 14040, han sido publicados en la declaración ambiental de producto EPD (ISO 14025 y EN 15804) que contribuye a la obtención de los créditos para la certificación de sostenibilidad en la construcción LEED. • Marazzi Group оценила воздействие на окружающую среду своей продукции в течение всего ее жизненного цикла, начиная с добычи и переработки сырья и вплоть до повторной переработки строительного мусора. Результаты этого анализа LCA (оценка жизненного цикла), проведенного в соответствии с международными нормами из серии ISO 14040, опубликованы в Экологической декларации продукции EPD (ISO 14025 и EN 15804), которая способствует получению кредитов для выдачи сертификата LEED.

### Declare label

Declare è un programma volontario di autodichiarazione che ha l'obiettivo di portare l'industria dei materiali da costruzione verso prodotti più sani e più ecologici, grazie alla comunicazione trasparente degli ingredienti. I prodotti autodichiarati di Marazzi Group sono classificati "Red List Free", ovvero non contengono ingredienti presenti nella "Red List" del Living Building Challenge: • nessuna sostanza chimica che inquina l'ambiente • nessuna sostanza chimica bioaccumulabile lungo la catena alimentare che possa raggiungere concentrazioni tossiche • nessuna sostanza chimica dannosa per i lavoratori nella produzione e nell'edilizia Contribuisce al raggiungimento dei crediti LEED

### Declare label

Declare is a voluntary self-declaration programme that aims to steer the building materials industry towards healthier, more eco-friendly products through transparent ingredient disclosure. Marazzi Group's self-declared products are classified as "Red List Free", i.e. they do not contain any ingredients on the Living Building Challenge "Red List": • no chemicals that pollute the environment • no chemicals that bio-accumulate up the food chain until they reach toxic concentrations • no chemicals that harm construction and factory workers The declare label program contributes to achieving LEED credits

### Label Declare

Declare est un programme d'autodéclaration volontaire dont l'objectif est de faire évoluer l'industrie des matériaux de construction vers des produits plus sains et plus écologiques grâce à une déclaration transparente des ingrédients. Les produits autodéclarés de Marazzi Group sont classés « Red List Free », ce qui signifie qu'ils ne contiennent aucun ingrédient figurant sur la liste rouge du Living Building Challenge, le programme international de certification des bâtiments durables: • pas de produits chimiques qui polluent l'environnement • pas de substance chimique bioaccumulable le long de la chaîne alimentaire

## HPD (Healt Product Declaration)

Marazzi Group realizza i propri prodotti utilizzando materie prime di origine naturale, come argille, feldspati, sabbie e pigmenti inorganici. Per garantire la trasparenza delle informazioni, l'Azienda pubblica l'HPD (Health Product Declaration), un'autodichiarazione sulla composizione chimica del prodotto, che permette all'utilizzatore di verificare il grado e la tipologia di pericolosità associata ai singoli componenti dei prodotti da costruzione. L'HPD viene riconosciuta all'interno dei crediti LEED. • Marazzi Group manufactures its products using raw materials of natural origin, such as clays, feldspars, sands and inorganic pigments. To guarantee transparency of information, the Company publishes an HPD (Health Product Declaration), a self-declaration on the chemical composition of the product, which allows users to assess the degree and type of hazard associated with individual components of construction products. The HPD is recognised within the LEED credits system. • Marazzi Group fabrique ses produits à partir de matières premières d'origine naturelle, comme des argiles, des feldspaths, des sables et des pigments inorganiques. Pour garantir la transparence des informations, l'entreprise publie une FDES (Fiche de déclaration sanitaire du produit) : il s'agit d'une autodéclaration sur la composition chimique du produit qui permet à l'utilisateur de vérifier le degré et le type de danger associés aux différents composants des produits de construction. La FDES figure dans les crédits LEED. • Marazzi Group setzt für die Herstellung ihrer Produkte Rohstoffe natürlichen Ursprungs wie Ton, Feldspat, Sand und anorganische Pigmente ein. Zur Gewährleistung transparenter Informationen veröffentlicht das Unternehmen die HPD-Deklaration (Health Product Declaration), eine Eigenerklärung zur chemischen Zusammensetzung des Produkts, wodurch der Verbraucher das Ausmaß und die Art der gesundheitlichen Auswirkungen im Zusammenhang mit den Inhaltsstoffen der Bauprodukte prüfen kann. Die HPD trägt zur Erlangung der LEED-Punkte bei. • Marazzi Group realiza sus productos utilizando materias primas de origen natural, tales como arcillas, feldespatos, arenas y pigmentos inorgánicos. Para garantizar la transparencia de la información, la empresa publica una HPD (Health Product Declaration): una autodeclaración acerca de la composición química del producto mediante la cual el usuario puede comprobar el nivel y el tipo de peligro relacionados con cada componente de los productos de construcción. La HPD está reconocida en el ámbito de los créditos LEED. • Marazzi Group выпускает свою продукцию из сырья натурального происхождения, такого как глина, полевые шпаты, песок и неорганические пигменты. Для гарантии прозрачности информации компания публикует декларацию безопасности продукции HPD (Health Product Declaration), корпоративное заявление о химическом составе продукции, которое позволяет пользователю проверить степень и тип опасности, связанной с отдельными компонентами строительных материалов. Декларация HPD признается в рамках кредитов LEED.

### pouvant atteindre des concentrations toxiques

• pas de produits chimiques nocifs pour les travailleurs de la production et de la construction

Le programme « declare label » contribue à l'obtention de crédits LEED

### Deklarationsetikett (Declare Label)

Declare ist ein freiwilliges Eigenerklärungsprogramm, das darauf abzielt, die Baustoffbranche durch Transparenz bei der Angabe der Inhaltsstoffe zu gesundheits- und umweltfreundlicheren Produkten zu bewegen. Die mit Eigenerklärung versehenen Produkte der Marazzi Group sind als „Red-List-Free“ eingestuft, d.h. sie enthalten keine Inhaltsstoffe, die in der roten Liste der Living Building Challenge enthalten sind: • keine Chemikalien, die schädlich für die Umwelt sind • keine bioakkumulierbaren Chemikalien in der Lebensmittelkette, die giftige Konzentrationen erreichen können • keine Chemikalien mit schädlichen Auswirkungen für Arbeitnehmer in der Produktion und im Baugewerbe Das Programm „ declare label „ trägt zum Erreichen von LEED-Credits bei

### Etiqueta Declare

«Declare» es un programa voluntario de autodeclaración cuyo objetivo es orientar la industria de los materiales de construcción hacia productos más sanos y ecológicos, por medio de la comunicación transparente de los ingredientes. Los productos autodeclarados por Marazzi Group se clasifican como «Red List Free», es decir, que no contienen ingredientes presentes en la lista roja o «Red List» del programa de certificación de construcción sostenible «Living Building Challenge»: • sin sustancias químicas que contaminan el medioambiente • sin sustancias químicas bioacumulables a lo largo de la cadena alimentaria que puedan alcanzar concentraciones tóxicas • sin sustancias químicas nocivas para los trabajadores de la producción y la construcción

El programa " declare label " contribuye a la obtención de créditos LEED

### Этикетка Declare

Declare - это программа добровольной сертификации, целью которой является подталкивание промышленности строительных материалов к выпуску более здоровой и экологичной продукции путем прозрачного указания всех ингредиентов. Продукция, на которую Marazzi Group составляет декларацию, классифицирована как "Red List Free", то есть, в ней отсутствуют ингредиенты, перечисленные в «красном списке» программы Living Building Challenge: • полное отсутствие загрязняющих природу химических веществ • полное отсутствие химических веществ, которые имеют тенденцию к биоаккумуляции по пищевой цепочке и могут достичь токсичной концентрации • полное отсутствие химических веществ, наносящих вред здоровью людей во время производства и использования строительных материалов Позволяет получить баллы по системе LEED

## NSF American Standard for Food equipment "Solid Surfacing for Food Zone"

Il programma di certificazione NSF Food Equipment ha 22 diversi standard che stabiliscono i requisiti minimi di protezione e igiene alimentare riguardo ai materiali, la progettazione, la fabbricazione, la costruzione e le prestazioni delle attrezzature per la manipolazione e il trattamento degli alimenti. I materiali per superfici solide vengono esaminati in base alla "NSF / ANSI 51: Materiali per attrezzature alimentari", che specifica i requisiti relativi alla salute pubblica per i materiali utilizzati nella costruzione di attrezzature alimentari commerciali. Maggiori informazioni sono disponibili sul sito: <http://info.nsf.org/Certified/Food/>

The NSF Food Equipment certification programme has 22 different standards that set minimum food hygiene and protection requirements for the materials, design, manufacturing, construction and performance of equipment for handling and processing food. The materials for solid surfaces are examined based on the "NSF/ANSI 51: Food Equipment Materials" standard, which specifies the public health requirements for materials used in the construction of commercial food equipment. More information is available on the website: <http://info.nsf.org/Certified/Food/>

Le programme de certification et d'enregistrement d'équipement alimentaire NSF Food Equipment comporte 22 normes définissant les exigences minimales de protection et d'hygiène alimentaire concernant les matériaux, la conception, la fabrication, la construction et la performance de l'équipement pour la manipulation et pour le traitement des aliments. Les matériaux pour surfaces solides sont examinés selon la norme « NSF / ANSI 51 : Matériaux pour équipement alimentaire », qui précise les exigences relatives à la santé publique pour les matériaux utilisés dans la construction d'équipements alimentaires commerciaux. Pour plus d'informations, veuillez visiter le site : <http://info.nsf.org/Certified/Food/>

Das NSF Commercial Food Equipment Zertifizierungsprogramm hat 22 verschiedene Standards vorgesehen, die die Mindestanforderungen an Lebensmittelsicherheit und -hygiene in Bezug auf die Werkstoffe, Planung, Fertigung, Konstruktion und die Leistungen von Anlagen für die Lebensmittelhandhabung und -verarbeitung festlegen. Die Werkstoffe für feste Oberflächen werden auf Basis des Standards "NSF / ANSI 51: Werkstoffe für Anlagen der Lebensmittelindustrie" geprüft, der die Anforderungen an die öffentliche Gesundheit für die zur Konstruktion von Anlagen der Lebensmittelindustrie verwendeten Werkstoffe spezifiziert. Weiterführende Informationen auf der Website: <http://info.nsf.org/Certified/Food/>

El programa de certificación NSF Food Equipment tiene veintidós estándares que establecen los requisitos mínimos de protección e higiene alimentaria con respecto a los materiales, el diseño, la fabricación, la construcción y las prestaciones de los equipos para la manipulación y el tratamiento de los alimentos. Los materiales para superficies sólidas se examinan con arreglo a la "NSF / ANSI 51: Materiales de equipos alimentarios", que especifica los requisitos relativos a la salud pública en referencia a los materiales utilizados en la construcción de equipos alimentarios comerciales. Se halla a disposición información más detallada en el sitio web: <http://info.nsf.org/Certified/Food/>

Программа сертификации NSF Food Equipment включает в себя 22 стандарта, которые устанавливают минимальные требования к пищевой безопасности

igiene in том, что касается материалов, проектирования, производства, изготовления и характеристик оборудования, предназначенного для обращения и обработки продуктов питания. Материалы твердых поверхностей исследуются в соответствии со стандартом "NSF / ANSI 51: Материалы оборудования для пищевой промышленности", который устанавливает требования, касающиеся обеспечения безопасности для здоровья людей материалов, используемых в изготовлении коммерческого оборудования для пищевой промышленности. Более подробная информация доступна на сайте: <http://info.nsf.org/Certified/Food/>

# Imballaggio

– Packaging • Emballage • Verpackung • Embalaje • Упаковка

Consigliamo sempre per ogni cassa di imballare una sola tipologia di formato. Se necessario, è possibile anche imballare differenti tipologie di formati, purché siano modulari e assicurandosi di collocare alla base quelli di maggiori dimensioni e di evitare il loro movimento interno. È opportuno spedire le casse in condizioni di pieno carico e avendo l'accortezza di bloccarle tramite gli appositi sistemi di protezione. Nel caso in cui le lastre ordinate siano superiori a 18 unità, si può utilizzare la cassa leggera Picking in combinazione alle casse e ai cavalletti standard.

### Cassa per lastre 120x120

**Cassa in legno** (2 Pz/scatola)  
dimensioni cm 123 x 143 x 59

- Mq lastra 2,88
- Kg Scatola 44
- Lastre per cassa 40
- Mq per cassa 57,60
- Kg cassa piena 880,06

### Cassa per lastre 120x240

**Cassa in legno** (Pz sfusi)  
dimensioni cm 136 x 266 x 41h

- Mq lastra 2,88
- Kg lastra 46,08
- Lastre per cassa 20
- Mq per cassa 57,60
- Kg cassa piena 1021

### Cassa per lastre 120x278

**Cassa in legno** (Pz sfusi)  
dimensioni cm 140 x 291 x 41h

- Mq lastra 3,34
- Kg lastra 50,04
- Lastre per cassa 18
- Mq per cassa 60,05
- Kg cassa piena 1048

### Cassa per lastre 160x320

**Cassa in legno** (Pz sfusi)  
dimensioni cm 175 x 345 x 41h

- Mq lastra 5,12
- Kg lastra 76,80
- Lastre per cassa 14
- Mq per cassa 71,68
- Kg cassa piena 1247

#### **Cassa Leggera** (da 1 a 5 Pz sfusi)

dimensioni cm 140 x 291 x 29h  
**Lastre 120x278 - 6 mm**  
- Per ordini >18 pezzi: combinazione cassa  
standard + cassa leggera Picking

We always recommend that only one size is packed in each crate. If necessary, it is also possible to pack different sizes, as long as they are modular and the larger sizes are placed at the base and prevented from moving around inside. Crates should be shipped filled to capacity and they should be sealed using appropriate protection systems. If more than 18 slabs are ordered, the Picking light crate can be used in combination with standard crates and A-frames.

### Crate for slabs of 120x120

**Wooden crate** (2 Pz/crate)  
dimensions 123 x 143 x 59h

- Slab area 2.88 m<sup>2</sup>
- Crate 44 kg
- Slabs per crate 40
- M<sup>2</sup> per crate 57.60
- Weight of full crate 880.06 kg

### Crate for slabs of 120x240

**Wooden crate** (Loose pcs)  
dimensions 139 x 266 x 41h

- Slab area 2.88 m<sup>2</sup>
- Slab weight 46.08 kg
- Slabs per crate 20
- M<sup>2</sup> per crate 57.60
- Weight of full crate 1021 kg

### Crate for slabs of 120x278

**Wooden crate** (Loose pcs)  
dimensions 140 x 291 x 41h cm

- Slab area 3,34 m<sup>2</sup>
- Slab weight 50,04 kg
- Slabs per crate 18
- M<sup>2</sup> per crate 60.048
- Weight of full crate 1048 kg

### Crate for slabs of 160x320

**Wooden crate** (Loose pcs)  
dimensions 175 x 345 x 41h cm

- Slab area 5.12 m<sup>2</sup>
- Slab weight 76.80 kg
- Slabs per crate 14
- M<sup>2</sup> per crate 71.68
- Weight of full crate 1247 kg

#### **Light Crate** (from 1 to 5 Loose pcs)

dimensions 140 x 291 x 29h cm  
**Slabs 120x278**  
- For orders > 18 pcs: combination of  
standard crate + Picking light crate.

Nous recommandons toujours d'emballer un seul type de format par caisse. Au besoin, différents formats peuvent être emballés ensemble, à condition qu'ils soient modulaires et que les plus grands soient posés dans le bas pour éviter leur mouvement à l'intérieur. Il est préférable d'expédier les caisses totalement chargées, en veillant à bloquer les produits avec des systèmes de protection appropriés. Pour des commandes de plus de 18 dalles, la caisse légère Picking peut être utilisée en combinaison avec les caisses standard et les chevalets standard.

### Caisse pour dalles de 120 x 120

**Caisse en bois** (2 Pièces / caisse)  
dimensions 123 x 143 x h59 cm

- Dalle 2,88 m<sup>2</sup>
- Caisse 44 kg
- Dalles par caisse 40
- m<sup>2</sup> par caisse 57,60
- Caisse pleine 880,06 kg

### Caisse pour dalles de 120 x 240

**Caisse en bois** (Pièces en vrac)  
dimensions 139 x 266 x h41 cm

- Dalle 2,88 m<sup>2</sup>
- Dalle 46,08 kg
- Dalles par caisse 20
- m<sup>2</sup> par caisse 57,60
- Caisse pleine 1 021 kg

### Caisse pour dalles de 120x278

**Caisse en bois** (Pièces en vrac)  
dimensions 140 x 291 x h41 cm

- Dalle 3,34 m<sup>2</sup>
- Dalle 50,04 kg
- Dalles par caisse 18
- m<sup>2</sup> par caisse 60,048
- Caisse pleine 1048 kg

### Caisse pour dalles de 160 x 320

**Caisse en bois** (Pièces en vrac)  
dimensions 175 x 345 x h41 cm

- Dalle 5,12 m<sup>2</sup>
- Dalle 76,80 kg
- Dalles par caisse 14
- m<sup>2</sup> par caisse 71,68
- Caisse pleine 1247 kg

#### **Caisse Légère** (de 1 à 5 pièces en vrac)

dimensions 140 x 291 x 29h cm  
**Dalles 120x278 - 6 mm**  
- Pour commandes >18 pièces:  
combinaison de standard emballage +  
caisse légère Picking

Wir empfehlen immer, in jeder Kiste nur ein Format zu verpacken. Bei Bedarf können auch unterschiedliche Formate verpackt werden, vorausgesetzt, dass sie modular sind und die größten zuunterst eingeschichtet werden. Sie sollten sich innerhalb der Verpackung nicht bewegen können. Es wird empfohlen, die Kisten vollbeladen zu versenden und sie mit geeigneten Schutzsystemen zu sichern. Werden mehr als 18 Platten bestellt, kann die Kiste Picking in Kombination mit Standardkisten und -transportgestellen verwendet werden.

### Kiste für Platten 120x120

**HolzKiste** (2 Pz /Kiste )  
Abmessungen 123 x 143 x H59 cm

- Plattenfläche 2,88 m<sup>2</sup>
- Plattenkiste 44 kg
- Platten pro Kiste 40
- Fläche pro Kiste 57,60 m<sup>2</sup>
- Vollst. beladene Kiste 880,06 kg

### Kiste für Platten 120x240

**HolzKiste** (Losgut)  
Abmessungen 139 x 266 x H41 cm

- Plattenfläche 2,88 m<sup>2</sup>
- Plattengewicht 46,08 kg
- Platten pro Kiste 20
- Fläche pro Kiste 57,60 m<sup>2</sup>
- Vollst. beladene Kiste 1.021 kg

### Kiste für Platten 120x278

**HolzKiste** (Losgut)  
Abmessungen 140 x 291 x H41 cm

- Plattenfläche 3,34 m<sup>2</sup>
- Plattengewicht 50,04 kg
- Platten pro Kiste 18
- Fläche pro Kiste 60,048 m<sup>2</sup>
- Vollst. beladene Kiste 1048 kg

### Kiste für Platten 160x320

**HolzKiste** (Losgut)  
Abmessungen 175 x 345 x H41 cm

- Plattenfläche 5,12 m<sup>2</sup>
- Plattengewicht 76,80 kg
- Platten pro Kiste 14
- Fläche pro Kiste 71,68 m<sup>2</sup>
- Vollst. beladene Kiste 1.247 kg

**licht Kiste** (von 1 bis 5 Losgut)  
dimensions 140 x 291 x 29h cm  
**Slabs 120x278 - 6 mm**  
-Für Bestellungen > 18 platten: Kombination  
mit standardkiste + Picking licht Kiste

Aconsejamos empaquetar siempre un único tipo de formato en cada caja. Si es necesario, también se pueden embalar diferentes tipos de formatos, siempre y cuando sean modulares y los de mayor tamaño se dispongan en el fondo de la caja y se evite su movimiento dentro de la misma. Resulta oportuno enviar las cajas completamente llenas y procurando fijarlas mediante sistemas de protección adecuados. Si se han encargado más de 18 placas, se puede utilizar la caja Picking en combinación con las cajas y caballetes estándar.

### Caja para placas de 120 x 120 cm

**Caja de madera** (2 Piezas / caja)  
medidas de 123 x 143 x 59 h cm

- placa 2,88 m<sup>2</sup>
- caja 44 kg
- 40 placas en cada caja grande
- 57,60 m<sup>2</sup> por caja grande
- Caja grande llena 880,06 kg

### Caja para placas de 120 x 240 cm

**Caja de madera** (Piezas sueltas)  
medidas de 139 x 266 x 41 h cm

- placa 2,88 m<sup>2</sup>
- placa 46,08 kg
- 20 placas en cada caja grande
- 57,60 m<sup>2</sup> por caja grande
- Caja grande llena 1021 kg

### Caja para placas de 120 x 278

**Caja de madera** (Piezas sueltas)  
medidas de 140 x 291 x 41 h cm

- Placa 3,34 m<sup>2</sup>
- Placa 50,04 kg
- 18 placas en cada caja grande
- 60,048 m<sup>2</sup> por caja grande
- Caja grande llena 1048 kg

### Caja para placas de 160 x 320 cm

**Caja de madera** (Piezas sueltas)  
Abmessungen 175 x 345 x H41 cm

- placa 5,12 m<sup>2</sup>
- placa 76,80 kg
- 14 placas en cada caja grande
- 71,68 m<sup>2</sup> por caja grande
- Caja grande llena 1247 kg

**Caia Ligera** (de 1 a 5 Piezas sueltas)  
medidas 140 x 291 x 29h cm  
**Placas 120x278 - 6 mm**  
- Por pedidos > 18 piezas: combinación  
con estándar caja + caia ligera Picking.

Рекомендуем упаковывать в один ящик лишь один тип формата. В случае необходимости можно также упаковывать разные типы форматов, но при условии, что они являются модульными, форматы больших размеров располагаются внизу и предотвращено смещение материала внутри упаковки. Рекомендуется отправлять полностью загруженные ящики, обращая внимание на необходимость их фиксации при помощи соответствующих защитных систем. Загружено более 18 тарелок, вы можете использовать ящик для комплектации в комбинации со стандартными коробками и кабелями.

### Ящик для плит 120 x 120

**Деревянный ящик** (2 Pz / Ящик)  
размеры 123 x 143 x В. 59 см

- Площадь плиты: 2,88 кв.м.
- Вес ящике: 44 кг
- Плит в ящике: 40 шт.
- Кв.м. в ящике: 57,60
- Вес полного ящика: 880,06 кг

### Ящик для плит 120 x 240

**Деревянный ящик**  
(Изделия поштучно)  
размеры 139 x 266 x В. 41 см

- Площадь плиты: 2,88 кв.м.
- Вес плиты: 46,08 кг
- Плит в ящике: 20 шт.
- Кв.м. в ящике: 57,60
- Вес полного ящика: 1021 кг

### Ящик для плит 120 x 278

**Деревянный ящик**  
(Изделия поштучно)  
размеры 140 x 291 x В. 41 см

- Площадь плиты: 3,34 кв.м.
- Вес плиты: 50,04 кг
- Плит в ящике: 18 шт.
- Кв.м. в ящике: 60,048
- Вес полного ящика: 1048 кг

### Ящик для плит 160 x 320

**Деревянный ящик**  
(Изделия поштучно)  
размеры 175 x 345 x В. 41 см

- Площадь плиты: 5,12 кв.м.
- Вес плиты: 76,80 кг
- Плит в ящике: 14 шт.
- Кв.м. в ящике: 71,68
- Вес полного ящика: 1247 кг

**Кайя Лигера** (от 1 до 5 Изделия поштучно)  
размеры 140 x 291 x В.29 см  
**Плит 120x278 - 6 мм**  
- Для заказов >18 штук: комбинация  
стандартного футляра + футляра с  
подсветкой.

# Imballaggio

- Plattengewicht 81,92 kg
- Platten pro Transportgestell 40
- Fläche pro Transportgestell 204,80 m<sup>2</sup>
- Vollst. beladenes Transportgestell 3.497 kg

Consigliamo sempre per ogni cavalletto di imballare una sola tipologia di formato. Se necessario, è possibile anche imballare differenti tipologie di formati, purché siano modulari e assicurandosi di collocare alla base quelli di maggiori dimensioni e di evitare il loro movimento interno. È opportuno spedire i cavalletti in condizioni di pieno carico. Nel caso di trasporto delle lastre Marazzi via container, è vivamente raccomandato l'utilizzo del cavalletto. Nel caso in cui vengano ordinate da 1 a 5 lastre 120x278 cm di spessore 6 mm si consiglia di utilizzare la cassa leggera Picking, invece del cavalletto standard. Nel caso in cui le lastre ordinate siano superiori a 40 unità, si può utilizzare la cassa leggera Picking in combinazione ai cavalletti standard.

**A-Frame** (Loose pcs)  
dimensions 75 x 250 x 160h cm  
**Slabs 120x240**

- Slab area 2.88 m<sup>2</sup>
- Slab weight 76,80 kg
- Slabs per A-frame 48
- M<sup>2</sup> per A-frame 138.24
- Weight of full A-frame 2292 kg

**A-Frame** (Loose pcs)  
dimensions 75 x 290 x 160h cm

**Caia Ligera** (de 1 a 5 Piezas sueltas)  
medidas 140 x 291 x 29h cm  
**Placas 120x278 - 6 mm**  
- Por pedidos > 40 piezas:  
combinación con caballete estándar + caia ligera Picking.

**Caballete** (Piezas sueltas)  
medidas 75 x 330 x 200 h cm  
**Placas 160 x 320 cm - 6 mm**

- placa 5,12 m<sup>2</sup>
- placa 81,92 kg
- 40 placas por caballete
- 204,80 m<sup>2</sup> por caballete
- Caballete lleno 3497 kg

We always recommend that only one size is packed in each A-frame. If necessary, it is also possible to pack different sizes, as long as they are modular and the larger sizes are placed at the base and prevented from moving around inside. A-frames should be shipped filled to capacity. We strongly recommend that an A-frame is used when Marazzi slabs are transported via container. If you order from 1 to 5 slabs of 120x278 cm in 6 mm thickness, you are advised to use the Picking light crate, instead of the standard A-frame. If more than 40 slabs are ordered, the Picking light crate can be used in combination with standard A-frames.

- Площадь плиты: 5,12 кв.м.
- Вес плиты: 81,92 кг
- Плит на подставке: 40 шт.
- Кв.м. на подставке: 204,80
- Вес полной подставки: 3497 кг.

Nous recommandons toujours d'emballer un seul type de format par chevalet. Au besoin, différents formats peuvent être emballés ensemble, à condition qu'ils soient modulaires et que les plus grands soient posés dans le bas pour éviter leur mouvement à l'intérieur. Il est préférable d'expédier les chevalets totalement chargés. Si les dalles Marazzi sont transportées par conteneur, il est vivement recommandé d'utiliser le chevalet. En cas de commande de 1 à 5 dalles de 120x278 cm en épaisseur 6 mm, il est conseillé d'utiliser la caisse légère Picking, plutôt que le chevalet de transport standard. Pour des commandes de plus de 40 dalles, la caisse légère Picking peut être utilisée en combinaison avec les chevalets standard.

Рекомендуем упаковывать на одной подставке лишь один тип формата. В случае необходимости можно также упаковывать разные типы форматов, но при условии, что они являются модульными, форматы больших размеров располагаются внизу и предотвращено смещение материала внутри упаковки. Рекомендуется отправлять полностью заполненные подставки. В случае перевозки плит Marazzi в контейнерах, настоятельно рекомендуется использовать подставки. Если у вас от 1 до 5 тарелок размером 120 x 278 см и толщиной 6 мм, рекомендуется использовать или стандартной подставки. загружено более 40 тарелок, вы можете использовать ящик для комплектации в комбинации со стандартными кабелями.

## INFORMAZIONI GENERALI

# Consigli di Posa e Manutenzione

– Advice for laying and maintenance • Conseils pour la pose et l'entretien • Verlegungs - und Pflegehinweise • Consejos de colocación y mantenimiento • Рекомендации по укладке и уходу

#### Posa in opera

Prima di iniziare le operazioni di posa di una qualsiasi superficie si raccomanda di accertarsi che la partita di materiale sia adeguata e sufficiente per quantità, tono e calibro, a quella necessaria. Si dovranno poi seguire tutte le norme e le precauzioni che sono alla base di una corretta esecuzione del lavoro (preparazione del sottofondo, composizione della malta o dei collanti, rispetto dei tempi di essicazione, posizionamento dei giunti di dilatazione, battitura, ecc…)

#### Posa con adesivi

La posa deve essere effettuata da personale qualificato con l'ausilio di attrezzi adeguati. La superficie su cui si effettua la posa (massetto) deve essere perfettamente piana. Valore massimo consigliato non superiore a 3mm. per un dislivello determinato sotto un regole di 2m. La superficie su cui si effettua la posa deve essere ben stagionata, priva di polvere e di fessurazioni visibili. Durante l'operazione di posa è vivamente consigliato l'utilizzo di un'adeguata illuminazione. La scelta dell'adesivo è condizionata dalla tipologia delle piastrelle (gruppo di appartenenza e formato), dal tipo di superficie da rivestire e dalla sua destinazione d'uso. E' opportuno verificare la posa del materiale prima che il collante sia secco, per facilitare eventuali correzioni.

#### Posa con malta fresca

La posa a malta cementizia fresca o "strato spesso" è sconsigliata per formati aventi lato > 30 cm e con supporti non assorbenti.

#### Realizzazione dei giunti

I giunti sono elementi molto importanti per il mantenimento di una buona superficie piastrellata e si consiglia di avvalersi della collaborazione e/o consulenza di un posatore professionista. Si declina ogni responsabilità per la posa senza fuga; si considera posa a "giunto minimo" quella con fuga a 2 mm.

I giunti devono essere posizionati:

- su raccordi strutturali (giunti strutturali)

- tra suolo e parete (giunti perimetrali)

- tra una piastrella e l'altra (giunti di posa o fuga)

- tra piastrelle ed altri materiali (es. accostamento ceramica / linoleum / legno)

Stuccatura superficie posata

Prima di realizzare le fughe è consigliabile attendere fino a completa asciugatura del collante e assicurarsi che i giunti di posa siano vuoti e liberi da ogni traccia di collante e/o polveri. Stuccare piccole superfici per volta (4-5 mq). Questo è da tenere in particolare considerazione per prodotti strutturati, anticivolo e levigati. Eliminare l'eccesso di fugante dalla superficie con movimenti diagonali quando il prodotto è ancora umido e togliere tutti i residui, in particolar modo per le superfici da esterno. Pulire accuratamente con una spugna bagnata in acqua limpida e pulita e ripassare con straccio umido su tutta la superficie fughe comprese. Per fughe in netto contrasto cromatico con le piastrelle posate è consigliabile testare il fugante su un' area circoscritta e nascosta. Per gli stucchi epossidici si raccomanda la pulizia con spugna e abbondante acqua. La velocità di reazione e indurimento di questi prodotti rende impossibile la rimozione dei residui successivamente all'indurimento. Il giorno dopo la stuccatura effettuare una pulizia completa con detergente alcalino. Si consiglia di consultare i produttori di materiale fugante per verificare la scelta corretta della fuga rispetto al tipo di piastrella.

#### Pulizia e manutenzione dopo la posa

Un cantiere si può considerare completamente finito quando è sgombro da qualunque utensile/materiale derivante dalle lavorazioni. Per ridurre i rischi di danneggiamento della superficie piastrellata, è necessario proteggerla ed evitare il più possibile la presenza di materiali abrasivi (polveri o residui da lavorazioni successive).

#### Pulizia iniziale

Il lavaggio dopo la posa è un una fase di fondamentale importanza per tutti gli interventi successivi e per una corretta manutenzione. Un accurato lavaggio iniziale permette ai pavimenti di restare belli e protetti a lungo e si esegue normalmente una sola volta prima dell'utilizzo del pavimento. Si raccomanda di effettuare la pulizia iniziale dopo 4-5 giorni e non più tardi di 10, dalla posa e stuccatura della superficie. La superficie fugata e pulita può presentare un film di residui cementizi che non sono asportabili con sola acqua per cui si rende necessario l'utilizzo di un prodotto a base acida, opportunamente diluito (diluizione da 1:10 a 1:4 in acqua fredda), in base a quanto dichiarato dal produttore. La prima operazione da eseguire è quella di bagnare la superficie piastrellata ed in particolare le fughe (di norma non resistenti agli acidi). Spargere la soluzione acida preparata e lasciare agire per un breve tempo (2 min). Non lasciare asciugare il prodotto applicato. Procedere alla rimozione della soluzione aiutandosi con una macchina monospazzola (disco non abrasivo), aspiraliquidi, altri mezzi e/o manualmente e alla fine risciacquare abbondantemente. E' importante sottolineare che la pulizia eseguita con macchine (particolarmente consigliata per prodotti strutturati e per grandi superfici), va sempre completata manualmente nei punti difficilmente raggiungibili, soprattutto negli angoli, lungo le pareti dei locali e in ogni zona in cui la monospazzola non può operare. E' sempre consigliabile testare la resistenza del prodotto agli acidi su un pezzo non posato o su una piccola porzione nascosta della superficie piastrellata; in particolare per prodotti lappati o levigati. L'uso di prodotti di pulizia contenenti acido fluoridrico (HF) e suoi derivati sono da evitare.

#### Pulizia ordinaria

Gli interventi di pulizia ordinaria delle superfici hanno lo scopo di rimuovere lo sporco, cancellare i segni e ripristinare l'aspetto originale. Le piastrelle in gres porcellanato smaltato non necessitano di trattamenti di protezione e una corretta e sistematica pulizia è sufficiente a mantenere inalterata la superficie. Un'accurata pulizia deve essere fatta con un normale lavaggio con acqua calda, straccio / spugna morbida ed eventualmente con l'utilizzo di detersivi neutri. Per locali con grandi superfici possono essere utilizzate macchine industriali lavasciuga con completamento manuale dove necessario.

#### Raccomandazioni:

- evitare di strofinare le superfici con strumenti abrasivi, come pagliette in metallo o spazzole dure, che potrebbero lasciare graffi e segni indelebili;

- rimuovere eventuali residui grassi o oleosi con detersivi contenenti solventi organici o con detersivi alcalini (pH>9) e fare seguire un accurato risciacquo;

- evitare l'utilizzo di saponi in quanto tendono a lasciare uno strato viscido, in particolare se utilizzati in abbinamento ad acque dure;

- non utilizzare prodotti contenenti cere o brillantanti;

- evitare l'uso di detersivi abrasivi su superfici lucide e/o levigate; possono essere utilizzati su materiali matt., previa verifica su una piccola porzione piastrellata. In generale l'uso di qualunque detergente non neutro, deve essere preliminarmente testato su una piastrella non posata o su una porzione nascosta della pavimentazione.

#### Consigli di posa per listelli e raccordi in metallo

Consigliato per la posa a rivestimento di interni, si suggerisce la posa con colle poliuretatiche ed epossidiche. In caso di utilizzo di colle cementizie, si raccomanda l'accortezza di pulire immediatamente l'eccesso di colla sulla parte in vista con acqua ed una spugna morbida. È sconsigliato l'uso del listello in zone salmastre a forte concentrazione di atmosfere saline perchè soggetto a formazione di ruggine. Consigliamo anche di non utilizzare i listelli in condizioni di immersione continuativa.

#### Consigli di posa a pavimento per formati rettangolari

Per i formati rettangolari, oltre alla posa ortogonale, si consiglia la posa a correre, regolare o irregolare, con una differenza tra pezzo e pezzo di:

- max 1/5 per formati: 19x150 ● 25x150 ● 37,5x150 ● 72x145

- max 1/4 per formati: 15x90 ● 45x90 ● 15x120 ● 20x120 ● 30x120 ● 60x120 ● 58x116 ● 29x116

- max 1/3 per formati: 7,5x60 ● 10x60 ● 14,5x58 ● 15x60 ● 30x60 ● 37,5x75 ● 29x58 ● 20x40.

Per approfondimenti e video tutorial consultare la sezione posa del sito [www.marazzi.it](#)

#### Laying

Before laying on any surface, make sure that the material is appropriate and sufficient in terms of quantity, shade and work-size to suit the laying needs. All regulations and precautions concerning the correct execution of the works must be followed (preparing the bed, grout or adhesive composition, respect for drying times, position of the expansion joints, beating, etc…)

#### Laying with adhesives

Laying must be done by qualified staff using appropriate equipment. The surface to be laid (screed) must be perfectly level. Maximum recommended value no more than 3mm for an uneven surface measured with a 2m ruler. The surface to be laid must be well seasoned, dust-free and with no visible cracks. During laying the use of appropriate lighting is strongly recommended. The choice of adhesive depends on the type of tile (type and size), the type of surface laid on and the type of foreseen use. Check that the tiles are laid correctly before the adhesive dries in order to facilitate any required corrections.

#### Laying with fresh mortar

Laying with fresh cement-based mortar or "thick layers" is not recommended for sizes more than 30 cm long and with non-absorbent supports

#### Joints

Joints are very important elements for maintaining a good tiled surface, it is recommended to make use of the collaboration and/or advice of a professional layer. The company declines all responsibility for laying without joints; minimum joint laying has a gap of 2 mm.

The joints must be positioned:

on structural joints;

between the floor and the wall (perimeter joints);

between one tile and another (laying joints);

#### between the tiles and other materials (e.g. combinations of ceramics/linoleum /wood).

#### Grouting laid surfaces

Before grouting wait for the adhesive to dry completely and make sure that the laying joints are empty and free of all traces of adhesive and/or dust. Grout small areas at a time (4-5 m2). This is particularly important for structured products, non-slip and polished surfaces. Remove excess grout from the tiles using diagonal movements when the product is still damp and remove all residues, particularly for external surfaces. Clean carefully using a sponge dampened in clean, limpid water and go over the whole surface, including the gaps, with a damp cloth. For grouting which has a strong colour contrast to the laid tiles, test the grout on a small, hidden area. When using epoxy grouts, clean with a sponge and plenty of water. The reaction and hardening times of these products make it impossible to remove any residues once they have hardened. The day after grouting, completely clean the surface with an alkaline detergent. Consult the grout manufacturers to verify the correct choice of grout for the type of tile.

#### Cleaning and maintenance after laying

Worksites are deemed to be completely finished once they have been cleared of all tools and materials used during the operations. To reduce the risk of damaging tiled surfaces, protect them and avoid the presence of abrasive materials (dust and residues from operations carried out after laying) as far as possible.

#### Initial cleaning

Washing after laying is of fundamental importance to all operations carried out afterwards and to assure correct maintenance. Careful initial cleaning keeps floors beautiful and protected longer and is done once only before using the floor. Initial cleaning should be carried out 4-5 days after laying, and in any case no longer than 10 days after laying and grouting. The grouted and cleaned surface may have a concrete film which cannot be removed using water alone, and therefore an acid-based product, suitably diluted (from 1:10 to 1:4 in cold water) should be used, following the manufacturer's instructions. The first operation is to wet the tiled surface and particularly the gaps (grout is not usually acid-resistant). Spread the prepared acid solution and leave for a short time (2 minutes). Do not allow the applied product to dry. Remove the solution using a brushing machine (with a non-abrasive disk), wet vac or other means and/ or manually, then rinse well. It should be remembered that machine cleaning (which is particularly recommended for textured products and large surfaces) must always be completed by hand in tight corners, along walls and any spaces that the brushing machine cannot easily reach. It is always advisable to test the resistance of the product to acids on an unlaid tile or a small hidden surface; particularly for lapped or polished products. It is not recommended to use cleaning products containing hydrofluoric acid (HF) or its derivatives.

#### Ordinary cleaning

Ordinary cleaning removes dirt and marks and restores the surface to its original appearance. Porcelain stoneware tiles do not require protective treatment, and a thorough, systematic clean is sufficient to maintain the surface. Careful cleaning must be done by washing normally using hot water, a cloth or soft sponge and, if required, neutral detergents. For large areas, industrial washing machines can be used, with completion by hand where required.

#### Recommendations:

Do not rub the surfaces using abrasive tools, such as metallic sponges or hard brushes, which could scratch them or leave indelible marks;

Grease and oil residues can be removed using detergents using organic or alkaline solvents (pH>9) followed by careful rinsing;

Avoid the use of soap as this tends to leave a slimy layer, particularly when used with hard water;

#### Do not use products containing wax or shining agents;

Avoid the use of abrasive detergents on shiny and/or polished surfaces; they may be used on matt materials, checking first on a small hidden tiled area. Generally speaking, when using any non-neutral detergent, check first on an unlaid tile or a small hidden portion of the floor.

#### Installation Advice For Metal Connection Pieces And Strips

Recommended for interior coverings, laid using polyurethane and epoxy adhesives. If using cement-based adhesives, clean off the excess glue immediately from the visible areas with a soft sponge. Listel tiles and inserts should not be used in brackish areas with a strong concentration of saline atmospheres, because they are subject to rust formation. We also recommend avoiding the use of the listel tiles in conditions where they are continually immersed in water.

#### Recommendations For Laying Rectangular Tiles As A Floor Covering

Apart from laying aligned in both directions, rectangular sizes should be laid in regular or irregular rows, or staggered rows with a distance between joints of:

max 1/5 of a tile for sizes: 19x150 ● 25x150 ● 37,5x150 ● 72x145

max 1/4 of a tile for sizes: 15x90 ● 45x90 ● 15x120 ● 20x120 ● 30x120 ● 60x120 ● 58x116 ● 29x116

max 1/3 of a tile for sizes: 7,5x60 ● 10x60 ● 14,5x58 ● 15x60 ● 30x60 ● 37,5x75 -

## CONSIGLI DI POSA E MANUTENZIONE

#### 29x58 ● 20x40.

For further details and installation tutorial video, visit the installation section of the [www.marazzi.it website](#)

#### Pose

Avant de commencer les opérations de pose d'une surface quelle qu'elle soit, il est recommandé de veiller à ce que le matériau soit adapté et de quantité suffisante, que le ton et le calibre correspondent aux besoins. Il faudra ensuite se conformer à toutes les normes et prendre toutes les précautions qui sont à la base d'une bonne exécution du travail (préparation de la sous-couche, composition du mortier ou des colles, temps de séchage, mise en place des joints de dilatation, battage, etc…)

#### Pose avec des adhésifs

La pose doit être effectuée par un personnel qualifié qui se servira d'outils appropriés.La surface sur laquelle la pose est effectuée (chape) doit être parfaitement plane. Valeur maxium conseillée : max 3 mm pour une dénivelation au-dessous d'une règle de 2m. La surface sur laquelle le matériau est posé doit être à parfaite maturation, sans poussière ni fissurations visibles.

Au cours de la pose, un bon éclairage est vivement conseillé. L'adhésif sera choisi en fonction de la typologie des carreaux (catégorie et format), du type de surface à revêtir et du domaine d'application auquel les carreaux sont destinés. Il convient de vérifier la manière dont le matériau est posé avant que l'adhésif ne soit sec, afin de pouvoir effectuer plus facilement des corrections si besoin est.

#### Pose avec mortier frais

La pose avec du mortier à base de ciment frais ou par "couche épaisse" est déconseillée pour des formats ayant un côté >30 cm et avec des supports non absorbants.

#### Réalisation des joints

Les joints sont des éléments très importants pour qu'une surface carrelée se maintienne bien. C'est une phase pour laquelle il est conseillé de demander la collaboration et/ou les conseils d'un carreleur professionnel. La responsabilité du fabricant ne pourra être mise en cause en cas de pose sans jointoiments. On appelle "pose à joint minimum" une pose avec un joint de 2 mm. Les joints doivent être positionnés :

- sur des raccords structurels (joints structurels)

- entre sol et mur (joints périmétraux)

- entre deux carreaux (joints de pose ou jointoiment)

- entre des carreaux et d'autres matériaux (ex. juxtaposition céramique/lino/bois)

#### Jointoiment des surfaces posées

Avant de procéder au jointoiment, il est conseillé d'attendre que l'adhésif soit bien sec et de s'assurer que les joints de pose sont vides et libres de toute trace d'adhésif et/ou de poussières.

Jointoyer le carrelage en procédant par petites surfaces (4-5 m²). Ce conseil doit surtout être suivi pour des produits structurés, antidérapants et polis. Éliminer le surplus de coulis de remplissage des joints de la surface en effectuant des mouvements en diagonale quand le produit est encore humide et enlever toutes les traces excédentaires, surtout pour les surfaces posées à l'extérieur. Nettoyer soigneusement avec une éponge imbibée d'eau claire et propre et repasser avec un chiffon humide sur toute la surface, joints compris. En présence de joints nettement contrastants avec la couleur des carreaux posés, il est conseillé de tester le coulis de remplissage des joints sur une petite surface dissimulée. Pour les joints époxy, il est recommandé de nettoyer à grande eau avec une éponge. La vitesse de réaction et de durcissement de ces produits empêche l'élimination des excédents après qu'ils ont durci. Le lendemain du jointoiment, effectuer un nettoyage complet avec un nettoyant alcalin. Il est conseillé de consulter les fabricants de coulis de remplissage des joints pour vérifier si le choix effectué est correct par rapport au type de carreau.

#### Nettoyage et entretien après la pose

Un chantier peut être considéré comme entièrement fini quand il est débarrassé de tous les outils et de tout le matériel ayant servi à sa réalisation. Pour réduire les risques d'endommager la surface carrelée, il est nécessaire de la protéger et d'éviter le plus possible la présence de matières abrasives (poussières ou résidus laissés par les travaux effectués successivement).

#### Nettoyage initial

Le lavage après la pose est une opération d'une extrême importance pour toutes les opérations qui s'ensuivront et pour pouvoir effectuer un entretien correct au quotidien.

Bien nettoyer le carrelage au départ permet aux sols de garder longtemps leur beauté et d'être protégés à long terme. Généralement, ce nettoyage est effectué une seule fois avant d'utiliser le sol. Il est recommandé d'effectuer le nettoyage initial entre 4 et 5 jours (pas plus de 10) après la pose et le jointoiment. La surface jointoyée et nettoyée peut présenter un film d'excédents cimentaires qui ne peut pas être éliminé à l'eau. Il est donc nécessaire d'utiliser un produit à base acide, correctement dilué (dilution de 1:10 à 1:4 dans l'eau froide), en fonction des

## INFORMAZIONI GENERALI

"Zementmörtel" ist ein Baustoff für die Verlegung von Fliesen, Platten, Terrazzo, Treppenstufen, etc.

conseils d'utilisation donnés par le fabricant. La première opération à exécuter est de mouiller la surface carrelée et en particulier les joints (qui généralement ne résistent pas aux acides). Répandre la solution acide préparée et laisser agir environ 2 minutes. Ne pas laisser sécher le produit appliqué. Procéder à l'élimination de la solution avec une laveuse monobrosse (disque non abrasif), aspirateurs de liquides, autres appareils et/ou à la main. Rincer à grande eau à la fin. Souignons que le nettoyage effectué avec des appareils (particulièrement conseillé pour des produits structurés et pour de grandes surfaces), doit toujours être parachevé par une intervention manuelle aux endroits difficiles à atteindre, c'est-à-dire dans les coins, le long des murs et partout où la monobrosse ne peut pas arriver. Il est toujours conseillé de vérifier la résistance du produit aux acides en les testant sur un carreau non posé ou sur un endroit peu en vue d'un carreau de la surface déjà posée, surtout pour les produits rodés ou polis. L'utilisation de nettoyeurs contenant de l'acide fluorhydrique (HF) et de ses dérivés doit être évitée.

**Entretien courant**

Les opérations d'entretien courant des surfaces ont pour but d'éliminer la saleté, d'effacer les traces et de rendre au carrelage son aspect premier. Les carreaux en grès cérame émaillé n'ont pas besoin d'être traités pour être protégés. Un nettoyage correct et systématique suffit à préserver la beauté de leur surface. Un nettoyage soigné doit être fait par un lavage normal avec de l'eau chaude, une serpillière/éponge douce et éventuellement avec un nettoyeur neutre. Pour les locaux recouverts de grandes surfaces, une machine industrielle lavante-séchante peut être utilisée. Finir par un lavage à la main là où cela s'avère nécessaire.

**Recommandations:**

- éviter de frotter les surfaces avec des instruments abrasifs tels que les pailles de fer ou les brosses dures, qui pourraient laisser des rayures et des traces indélébiles ;
- éliminer toute trace de graisse ou d'huile éventuellement présente au moyen de nettoyeurs contenant des solvants organiques, ou avec des nettoyeurs alcalins (pH>9) et terminer en rinçant soigneusement ;
- éviter d'utiliser des savons car ils ont tendance à laisser un film visqueux, surtout s'ils sont utilisés avec des eaux dures ;

- ne pas utiliser de produits contenant des cires ou des brillanteurs ;

- éviter d'utiliser des nettoyeurs décapants sur des surfaces lustrées et/ou polies ; ils peuvent être utilisés sur des matériaux mats, après les avoir testés sur un petit coin carrelé. En général, l'utilisation de tout nettoyeur non neutre doit être testée au préalable sur un carreau non posé ou sur une portion peu en vue du sol.

**Conseils de pose pour listels et raccords en métal**

Conseillé pour une pose en intérieur, il est préconisé d'employer des colles polyuréthaniques et époxy. En cas d'utilisation d'adhésifs à base de ciment, il est recommandé de bien nettoyer tout de suite l'excès de colle sur la partie en vue avec une éponge douce imbibée d'eau. L'utilisation du listel/cabochon est déconseillée dans les endroits saumâtres à forte concentration d'atmosphères salines car il est sujet à la formation de rouille. En outre, nous conseillons de ne pas utiliser les listels dans des endroits immergés en permanence.

**Conseils de pose sur sols pour les formats rectangulaires**

Pour les formats rectangulaires, outre une pose orthogonale, il est conseillé de procéder à une pose à l'anglaise régulière ou irrégulière, avec un décalage entre les pièces de :

max 1/5 pour les formats : 19x150 • 25x150 • 37,5x150 • 72x145

max 1/4 pour les formats : 15x90 • 45x90 • 15x120 • 20x120 • 30x120 • 60x120 • 58x116 • 29x116

max 1/3 pour les formats : 7,5x60 • 10x60 • 14,5x58 • 15x60 • 30x60 • 37,5x75 • 29x5 • 20x40

Pour obtenir plus d'informations et pour visualiser les tutoriels, consulter la section Pose sur le site www.marazzi.it

"Ciment de mortier" est un produit utilisé pour la construction et la réparation de murs, de briques, etc.

**Bauseitige Verlegung**

Stellen Sie, bevor Sie mit der Verlegung der Fliesen beginnen, sicher, dass die Materialpartie im Hinblick auf Menge, Farbton und Größenklasse die Anforderungen erfüllt und ausreicht. Es müssen außerdem alle Normen und Vorsichtsmaßnahmen eingehalten werden, die die Grundlage für eine korrekte Ausführung der Arbeiten darstellen (Vorbereitung des Untergrunds, Zusammensetzung des Mörtels oder der Kleber, Trocknungszeiten, Lage der Dehnungsfugen, Anklopfen usw....)

**Verlegung mit Kleber**

Die Verlegung muss durch qualifiziertes Personal mit geeigneten Werkzeugen durchgeführt werden. Die Fläche, auf der die Verlegung erfolgt (Estrich) muss perfekt eben sein. Empfohlener maximaler Wert der Abweichung nicht über 3 mm beim Anlegen eines 2m-langen Richtscheits. Die Fläche, auf der die Verlegung erfolgen soll, muss vollständig trocken und frei von Staub und sichtbaren Rissen sein. Während der Verlegung wird dringend empfohlen, eine ausreichende Beleuchtung zu gewährleisten. Die Wahl des Klebers hängt von der Art der Fliesen (Gruppe und Größe), von der Art der Oberfläche, auf der verlegt werden soll und vom Bestimmungszweck ab. Die Verlegung der Fliesen sollte überprüft werden, bevor der Kleber trocken ist, um Korrekturen zu ermöglichen.

"Zementmörtel" ist ein Baustoff für die Verlegung von Fliesen, Platten, Terrazzo, Treppenstufen, etc.

**Verlegung mit frischem Mörtel**

Die Verlegung mit frischem Zementmörtel oder „Dickbettverlegung“ wird für Formate empfohlen, deren Seitenmaße größer als 30 cm sind und die auf nicht absorbierenden Untergründen verlegt werden sollen.

**Die Verfugung**

Die Fugen sind für den Erhalt einer guten Fliesenoberfläche sehr wichtig und wir empfehlen, dafür die Arbeit bzw. Beratung eines Fachmanns in Anspruch zu nehmen. Wir übernehmen keine Haftung für eine fugenlose Verlegung, unter einer Verlegung mit sehr schmalen Fugen versteht man die Verlegung von 2 mm breiten Fugen. Die Fugen müssen positioniert werden:

- an strukturellen Anschlüssen (Strukturfugen)

- zwischen Boden und Wand (Randfugen)

- zwischen einer Fliese und der anderen (Verlegefugen oder Fugen)

-zwischen Fliesen und anderen Materialien (z.B. Kombination von Keramik/ Linoleum/Holz)

**Verfugen verlegter Oberflächen**

Bevor die Fugen ausgeführt werden, wird empfohlen, zu warten, bis der Kleber komplett trocken ist. Stellen Sie sicher, dass die Verlegefugen leer und frei von jeglichen Spuren von Klebstoff und/oder Staub sind. Verfugen Sie jeweils kleine Flächen (4 - 5 m²). Dies gilt vor allem für strukturierte, rutschfeste und polierte Fliesen. Entfernen Sie die überschüssige Fugenmasse mit diagonalen Bewegungen von der Oberfläche aus, wenn das Produkt noch feucht ist und entfernen Sie, vor allem in Außenbereichen, alle Rückstände. Gründlich mit einem Schwamm, der in reinem und klarem Wasser befeuchtet wurde, reinigen und mit einem feuchten Tuch über die gesamte Fläche einschließlich der Fugen nachwischen. Für Fugen, die im eindeutigen Farbkontrast zu den verlegten Fliesen stehen, sollten Sie die Fugenmasse an einer begrenzten, verdeckten Fläche vorher testen. Für Epoxyd-Fugenmörtel wird die Reinigung mit einem Schwamm und sauberem Wasser empfohlen. Die schnelle Reaktion und das schnelle Härten dieser Produkte macht die Beseitigung von Rückständen nach dem Aushärten unmöglich. Am Tag nach der Verfugung ist eine gründliche Reinigung mit alkalischen Reinigungsmitteln erforderlich. Für die jeweilige Wahl der Fuge für die jeweilige Fliese wenden Sie sich bitte an den Hersteller des Fugenmittels.

**Reinigung und Pflege nach der Verlegung**

Eine Baustelle ist erst vollständig beendet, wenn sie frei von jedem Arbeitsmaterial ist. Um die Gefahr der Beschädigung der Fliesenoberfläche zu senken, ist es notwendig, sie zu schützen und so weit wie möglich die Anwesenheit von abrasiven Materialien (Pulver oder Rückstände der weiteren Verarbeitung) zu vermeiden.

**Grundreinigung**

Die Grundreinigung nach der Verlegung ist wichtig, um die spätere Reinigung und Pflege zu ermöglichen. Eine sorgfältige Grundreinigung sorgt dafür, dass die Böden lange schön und geschützt bleiben. Sie wird normalerweise nur einmal vor der Benutzung des Bodens ausgeführt. Es wird empfohlen, die Erstreinigung nach 4-5 Tagen, spätestens aber nach 10 Tagen ab dem Verlegen und Verfugen der Oberfläche durchzuführen. Die verfugte und gereinigte Oberfläche kann einen Zementschleier aufweisen, der aber leicht nur mit Wasser entfernt werden kann. Dafür ist ein Reinigungsmittel auf Säurebasis erforderlich, das je nach den Anweisungen des Herstellers entsprechend verdünnt (Verdünnung von 1:10 bis 1:4 mit kaltem Wasser). Zuerst muss die gefieste Fläche mit Wasser gespült werden, dies gilt vor allem für die Fugen (die normalerweise nicht säurebeständig sind). Verteilen Sie die vorbereitete säurehaltige Lösung auf der Oberfläche und lassen Sie diese kurz einwirken (2 Minuten). Lassen Sie das aufgebrachte Mittel nicht eintrocknen. Entfernen Sie dann die Lösung mit einer Einbürstemaschine (nichtscheuernde Scheibe), einem Flüssigkeitssauger oder einem anderen Gerät, und/oder spülen Sie mit reichlich klarem Wasser nach. Es muss darauf hingewiesen werden, dass die maschinelle Reinigung einer Oberfläche (die besonders für strukturierte und große Oberflächen empfohlen wird) an den schwierig zu erreichenden Stellen stets eine manuelle Nachreinigung erforderlich macht, vor allem in den Ecken, entlang der Wände und in allen Bereichen, die von der Einbürstemaschine nicht erreicht werden. Es ist immer ratsam, die Haltbarkeit des Produktes gegen Säuren auf einer noch nicht verlegten Fliese oder in einem versteckten Bereich der bereits verfierten Oberfläche zu testen, dies gilt insbesondere für geläppte oder polierte Fliesen. Die Verwendung von Reinigungsmitteln mit Flußsäure (HF) und seinen Derivate ist zu vermeiden.

**Gewöhnliche Reinigung und Pflege**

Die gewöhnliche Reinigung der Oberflächen dient der Entfernung von Schmutz, Spuren und Abdrücken. Sie hat das Ziel, das ursprüngliche Aussehen wieder herzustellen. Glasierte Feinsteinzeugfliesen benötigen keine Schutzbehandlung und die korrekte und systematische Reinigung ist ausreichend, um die Oberfläche dauerhaft schön zu halten. Eine gründliche Reinigung sollte mit warmem Wasser, einem Lappen oder weichen Schwamm und eventuell mit neutralen Reinigungsmitteln erfolgen. Für Räume mit großen Flächen können industrielle Reinigungsmaschinen verwendet werden, ggf. mit manueller Nachreinigung. Empfehlungen:

- vermeiden Sie es, die Oberflächen mit Schleifmitteln, wie Scheuerschwämmen oder harten Bürsten zu reinigen, das kann zu Kratzern und Spuren führen, die

"Zementmörtel" ist ein Baustoff für die Verlegung von Fliesen, Platten, Terrazzo, Treppenstufen, etc.

sich nicht mehr entfernen lassen.

- entfernen Sie eventuell verbleibende Fett- oder Ölrückstände mit Reinigungsmitteln, die organische Lösemittel enthalten, oder alkalischen Reinigungsmitteln (pH> 9) und spülen Sie dann gründlich nach.

- Vermeiden Sie Seifen, da sie dazu neigen, eine schmierige Schicht zu hinterlassen, besonders wenn sie in Verbindung mit hartem Wasser verwendet werden;

- Verwenden Sie keine Produkte mit Wachs oder Glanzzusätzen.

- Vermeiden Sie Scheuermittel auf polierten oder glänzenden Oberflächen. Sie können auf jedoch matten Materialien verwendet werden, nachdem ein Test auf einem kleinen bereits verlegten Bereich erfolgt ist. Im Allgemeinen muss jedes nicht neutrale Reinigungsmittel zuerst auf einer nicht verlegten Fliese oder in einem verdeckten bereits verlegten Bereich getestet werden.

**Velegehinweise Für Listelli Und Leisten Aus Metall**

Für die Verkleidung von Innenbereichen und bei Verwendung von Polyurethan- und Epoxyd-Klebern empfohlen. Im Falle einer Verwendung von Zementklebern empfehlen wir, den überstehenden Kleber auf den sichtbaren Bereichen sofort mit Wasser und einem weichen Schwamm zu entfernen. Die Verwendung der Leiste/des Einlegers in Brackwassergebieten mit einer hohen Salzkonzentration in der Luft ist nicht empfehlenswert weil sich Rost bilden kann. Wir empfehlen die Leisten auch nicht in Bereichen zu verwenden, die ständig unter Wasser liegen.

**Hinweise Zur Verlegung Von Rechteckformaten Als Bodenbelag**

Für die Rechteckformate wird, neben der rechtwinkligen Verlegung, die fortlaufende Verlegung im regelmäßigen oder unregelmäßigen Verband mit dem folgenden Versatz empfohlen:

Kantenverhältnis max. 5:1 für die Formate: 19x150 • 25x150 • 37,5x150 • 72x145
Kantenverhältnis max. 4:1 für die Formate: 15x90 • 45x90 • 15x120 • 20x120 • 30x120 • 60x120 • 58x116 • 29x116

Kantenverhältnis max. 3:1 für die Formate: 7,5x60 • 10x60 • 14,5x58 • 15x60 • 30x60 • 37,5x75 • 29x58 • 20x40

Für ausführliche Informationen und Tutorialvideos siehe Bereich Verlegung auf www.marazzi.it

"Zementmörtel" ist ein Baustoff für die Verlegung von Fliesen, Platten, Terrazzo, Treppenstufen, etc.

**Colocación**

Antes de iniciar las operaciones de colocación de cualquier superficie, se recomienda asegurarse de que la cantidad del lote de material sea suficiente y de que el tono y el calibre sean adecuados. Deberán seguirse luego todas las normas y precauciones para una correcta ejecución del trabajo (preparación de la base, composición del mortero o de los adhesivos, respeto de los tiempos de secado, posición de las juntas de dilatación, golpeado, etc...).

**Colocación con adhesivos**

La colocación ha de ser efectuada por personal cualificado con la ayuda de herramientas adecuadas. La superficie sobre la que se efectúe la colocación (placa) ha de ser totalmente plana. Valor máximo aconsejado no superior a 3 mm para un desnivel determinado bajo una regla de 2 m. La superficie sobre la que se efectúe la colocación deberá estar bien seca, sin polvo ni fisuraciones visibles. Es importante utilizar una iluminación adecuada durante la operación de colocación. La elección del adhesivo dependerá del tipo de baldosa (grupo de pertenencia y formato), del tipo de superficie a recubrir y del uso previsto. Conviene comprobar la colocación del material antes de que el adhesivo esté seco, con el fin de facilitar posibles correcciones.

**Colocación con mortero fresco**

La colocación con mortero de cemento fresco o "capa gruesa" está aconsejada para formatos con lado > 30 cm y con soportes no absorbentes.

"Zementmörtel" ist ein Baustoff für die Verlegung von Fliesen, Platten, Terrazzo, Treppenstufen, etc.

**Realización de las juntas**

Las juntas son elementos muy importantes para el mantenimiento de una buena superficie embaldosada; se aconseja servirse de la colaboración y/o del asesoramiento de un soldador profesional. Se declina toda responsabilidad por la colocación sin juntas; se considera colocación de "junta mínima" la efectuada con una junta de 2 mm.

Las juntas deberán estar posicionadas:

- en uniones estructurales (juntas estructurales)
- entre el suelo y la pared (juntas perimetrales)
- entre una baldosa y otra (juntas de colocación o juntas)
- entre baldosas y otros materiales (por ej. combinación de cerámica / linóleo / madera)

**Rejuntado de la superficie embaldosada**

Antes de realizar las juntas, es aconsejable esperar a que el adhesivo esté completamente seco y asegurarse de que las juntas de colocación estén vacías

## CONSIGLI DI POSA E MANUTENZIONE

"Zementmörtel" ist ein Baustoff für die Verlegung von Fliesen, Platten, Terrazzo, Treppenstufen, etc.

y libres de todo rastro de adhesivo y/o polvo. Efectuar el rejuntado de pequeñas superficies cada vez (4-5 m2). Ello deberá tenerse en cuenta sobre todo para productos estructurados, antideslizantes y pulidos. Eliminar de la superficie el material de rejuntado en exceso efectuando movimientos diagonales cuando el producto todavía está húmedo y quitar todos los residuos, especialmente para las superficies de exterior. Limpiar cuidadosamente con una esponja mojada en agua limpia y repasar con un paño húmedo por toda la superficie, incluidas las juntas. Para juntas cuyo color contraste fuertemente con el de las baldosas colocadas, se aconseja probar el material de rejuntado en una zona limitada y escondida. Para los rellenos de juntas epoxi, se recomienda limpiar con una esponja y agua abundante. La velocidad de reacción y endurecimiento de estos productos impide poder quitar los residuos después del endurecimiento. Efectuar una limpieza completa con detergente alcalino al día siguiente de haber realizado el rejuntado. Se aconseja consultar a los fabricantes del material de rejuntado para comprobar si elección de la junta es correcta para el tipo de baldosa.

"Zementmörtel" ist ein Baustoff für die Verlegung von Fliesen, Platten, Terrazzo, Treppenstufen, etc.

**Limpieza y mantenimiento después de la colocación**

Una obra puede considerarse completamente acabada cuando está libre de todas las herramientas y de todos los materiales derivados de los trabajos llevados a cabo. Para impedir que se dañe la superficie embaldosada, es necesario protegerla y evitar lo más posible la presencia de materiales abrasivos (polvo o residuos de trabajos sucesivos).

"Zementmörtel" ist ein Baustoff für die Verlegung von Fliesen, Platten, Terrazzo, Treppenstufen, etc.

**Limpieza inicial**

La limpieza después de la colocación es una fase de fundamental importancia para todas las intervenciones sucesivas y para un correcto mantenimiento. Una cuidadosa limpieza inicial permitirá que los pavimentos permanezcan bonitos y protegidos durante largo tiempo; suele efectuarse una sola vez antes de la utilización del pavimento. Se recomienda efectuar la limpieza inicial después de 4-5 días, y no más tarde de 10, de la colocación y del rejuntado de la superficie. La superficie con las juntas y limpia puede presentar una película de residuo de cemento que no es posible quitar sólo con agua, siendo necesaria la utilización de un producto de base ácida, oportunamente diluido (dilución de 1:10 a 1:4 en agua fría), según lo declarado por el fabricante. La primera operación a efectuar es mojar la superficie embaldosada y en particular las juntas (normalmente no resistentes a los ácidos). Esparcir la solución ácida preparada y dejar actuar durante breve tiempo (2 min.). No dejar secar el producto aplicado.Remover la solución con la ayuda de una máquina monocepillo (con disco no abrasivo), un aspirador de líquidos, otros medios y/o de forma manual y aclarar con agua abundante al final. Es importante subrayar que la limpieza efectuada con máquinas (especialmente aconsejada para productos estructurados y para grandes superficies) ha de completarse siempre de forma manual en aquellos puntos difíciles de alcanzar, sobre todo en los rincones, en las paredes de los locales y en todas aquellas zonas en las que la máquina monocepillo no puede operar. Es aconsejable siempre probar la resistencia del producto a los ácidos en una baldosa sin colocar o sobre una pequeña porción escondida de la superficie embaldosada, sobre todo para productos lapeados o pulidos. Evitar el uso de productos de limpieza que contengan ácido fluorhídrico (HF) y sus derivados.

"Zementmörtel" ist ein Baustoff für die Verlegung von Fliesen, Platten, Terrazzo, Treppenstufen, etc.

**Limpieza ordinaria**

Las operaciones de limpieza ordinaria de las superficies tienen la finalidad de eliminar la suciedad, borrar las señales y restablecer el aspecto original. Las baldosas de gres porcelánico esmaltado no necesitan tratamientos de protección; una correcta y sistemática limpieza es suficiente para mantener inalterada la superficie. Para una cuidadosa limpieza deberá efectuarse un fregado normal con agua caliente, paño/esponja suave y, si es necesario, con la utilización de detergentes neutros. En los locales con grandes superficies podrán utilizarse máquinas industriales fregadoras-secadoras, completando la limpieza de manera manual donde sea necesario.

"Zementmörtel" ist ein Baustoff für die Verlegung von Fliesen, Platten, Terrazzo, Treppenstufen, etc.

**Recomendaciones:**

- no restregar las superficies con instrumentos abrasivos, como estropajos de metal o cepillos duros, que pudieran dejar  arañazos y señales indelebles;

- quitar los posibles residuos oleosos o de grasas con detergentes que contengan disolventes orgánicos o con detergentes alcalinos (pH>9) y efectuar un cuidadoso aclarado;

- evitar la utilización de jabones, pues tienden a dejar una capa viscosa, sobre todo si se utilizan con aguas duras;

- no utilizar productos que contengan ceras o agentes de abrillantado;

- evitar el uso de detergentes abrasivos sobre superficies brillantes y/o pulidas; pueden utilizarse sobre materiales mates, pero controlando previamente sobre una pequeña porción embaldosada. El uso de cualquier detergente no neutro deberá ser probado previamente sobre una baldosa sin colocar o sobre una porción escondida del pavimento.

**Sugerencias Para La Colocación De Plaquetas Y Segmentos De Unión Metálicos**

Está aconsejado para la colocación de revestimientos de interiores, recomendándose la colocación con adhesivos de poliuretano y epoxi. En caso de utilización de cemento-cola, se recomienda limpiar inmediatamente el exceso de adhesivo de la parte visible utilizando agua y una esponja blanda. Se desaconseja el uso del listelo/taco decorativo en zonas salobres con una fuerte concentración de atmósferas salinas, al estar sujeto a la formación de corrosión por picaduras. Se aconseja también no utilizar los listelos en condiciones de inmersión continua.

## INFORMAZIONI GENERALI

<b>Consejos Para La Pavingtación Con Formatos Rectangulares</b>
En lo que concierne a los formatos rectangulares, además de la colocación ortogonal, se aconseja el solado corrido regular o irregular con un escalonamiento recomendado entre pieza y pieza de: como máximo 1/5 en los formatos de: 19x150 • 25x150 • 37,5x150 • 72x145 como máximo 1/4 en los formatos de: 15x90 • 45x90 • 15x120 • 20x120 • 30x120 • 60x120 • 58x116 • 29x116
como máximo 1/3 en los formatos de: 7,5x60 • 10x60 • 14,5x58 • 15x60 • 30x60 • 37,5x75 • 29x58 • 20x40
Para ampliar información y observar el vídeo tutorial, acceder al apartado de colocación del sitio web <a href="http://www.marazzi.it">www.marazzi.it</a>

<b>Consejos Para La Pavingtación Con Formatos Rectangulares</b>
En lo que concierne a los formatos rectangulares, además de la colocación ortogonal, se aconseja el solado corrido regular o irregular con un escalonamiento recomendado entre pieza y pieza de: como máximo 1/5 en los formatos de: 19x150 • 25x150 • 37,5x150 • 72x145 como máximo 1/4 en los formatos de: 15x90 • 45x90 • 15x120 • 20x120 • 30x120 • 60x120 • 58x116 • 29x116

<b>Укладка</b>
Перед началом работ по укладке на любой поверхности рекомендуем убедиться в том, что имеющийся материал соответствует требованиям по количеству, тону и калибру. Далее следует соблюдать все правила и меры предосторожности, которые лежат в основе правильного выполнения работ (подготовка подстилающего слоя, состав раствора или клея, соблюдение сроков высыхания, расположение расширительных швов, трамбовка и т.д.)

<b>Укладка с применением клеящих составов</b>
Укладка должна производиться квалифицированным персоналом с помощью соответствующих инструментов. Поверхность, на которую производится укладка (цементная стяжка), должна быть абсолютно ровной. Максимально допустимый перепад уровня не должен превышать 3 мм при измерении линейкой длиной 2 м. Поверхность, на которую производится укладка, должна быть хорошо выдержанной, очищенной от пыли и без видимых трещин. Во время выполнения укладки настоятельно рекомендуем использовать соответствующее освещение. Выбор клеящего состава зависит от типа плитки (группа принадлежности и формат), типа покрываемой поверхности и ее назначения. Для устранения возможных дефектов следует проверять укладку материала, прежде чем клейщий состав высохнет.

<b>Укладка с применением свежего цементного раствора</b>
Для форматов со стороной более 30 см не рекомендуется укладка с применением свежего цементного раствора или на «толстый слой» при неабсорбирующей подстилающей основе.

<b>Выполнение швов</b>
Швы являются важнейшим элементом для поддержания поверхности, облицованной плиткой, в хорошем состоянии, именно поэтому мы рекомендуем привлекать к сотрудничеству и/или консультации профессионального укладчика. Отклоняется любая ответственность в случае укладки без швов; минимальным швом считается зазор 2 мм.

<b>Швы должны присутствовать:</b>
- на конструктивных соединениях (конструктивные швы)
- между полом и стеной (периметральные швы)
- между плитками ( укладочные швы)
- между плитками и другими материалами (например, сочленение керамики/линолеума/ дерева)

<b>Затирка швов на уложенной поверхности</b>
Перед началом затирки швов рекомендуется выждать до полного высыхания клея и убедиться в том, что укладочные швы чистые и не содержат остатков клея и/или пыли. Швы следует заделывать по частям небольшими поверхностями (4-5 кв.м). Это особенно важно учитывать при укладке структурной, нескользящей и полированной плитки. Удалите с поверхности избыток затирочного материала диагональными движениями, пока затирка влажная, и уберите все излишки, особенно с наружных поверхностей. Аккуратно промойте губкой, смоченной в чистой прозрачной воде, и протрите всю поверхность, включая швы, влажной тряпкой. Для швов, контрастных по цвету с уложенной плиткой, рекомендуестя протестировать затирку на ограниченном скрытом участке поверхности. Для эпоксидных затирок рекомендуется очистка с помощью обильно смоченной водой губки. Скорость реакции и затвердение этих продуктов делает невозможным их удаление после затвердения. На следующий день после затирки швов следует выполнить полную уборку с применением щелочного моющего средства. Рекомендуется проконсультироваться у производителей затирочного материала, чтобы убедиться в правильном его выборе относительно типа плитки.

<b>Уборка и уход после укладки</b>
Строительство можно считать законченным, когда его площадка полностью расчищена от любого материала/инструментария, использованных во время работ. Для снижения рисков повреждения поверхности, покрытой плиткой, необходимо предохранять ее и не допускать присутствия каких-

либо абразивных материалов (пыль или остатки затирочных материалов).
----------------------------------------------------------------------

<b>Начальная Уборка</b>
Промывание после укладки имеет исключительно важное значение для всех последующих действий и для правильного ухода за поверхностью. Тщательная начальная промывка обеспечивает полам хороший внешний вид и длительную защищенность, обычно она выполняется однократно перед началом эксплуатации полов. Начальную промывку рекомендуется выполнять по истечении 4-5 дней и не позднее 10 дней после затирки швов. На очищенной поверхности с заделанными швами может появиться пленка из цементного осадка, которая не удаляется только водой; в этом случае необходимо применение моющего средства с кислотной основой, правильно разведенного в воде (разбавление в холодной воде в пропорции от 1:10 до 1:4) в соответствии с указаниями производителя. Первое, что необходимо выполнить, это смыть водой покрытую плиткой поверхность и, особенно, швы (как правило, нестойкие к воздействию кислот). Затем нанесите приготовленный кислотный раствор и оставьте действовать на короткое время (2 мин.). Не допускайте высыхания нанесенного продукта. Далее приступайте к удалению раствора с помощью поломоечной машины (с неабразивным диском), водным пылесосом, другими средствами и/или вручную и в конце следует обильное промывание. Важно подчеркнуть, что очистка, выполненная с помощью машин (особенно рекомендуемая для структурной продукции и больших поверхностей), должна обязательно завершаться ручной уборкой труднодоступных мест, особенно, в углах, вдоль стен внутри помещения и во всех местах, куда щетка не может добраться). Рекомендуется всегда протестировать устойчивость материала к воздействию кислот на неуложенной плитке или на маленьком скрытом участке, покрытом плиткой; это особенно важно для полуполированной и полированной плитки. Следует избегать применения моющих средств, содержащих плавиковую кислоту (HF) и ее производные.

<b>Регулярная уборка</b>
Регулярная уборка поверхности производится для удаления грязи, следов и для восстановления изначального внешнего вида. Плитка из глазурованного керамогранита не нуждается в защитной обработке, для поддержания поверхности в неизменном виде достаточно правильно и систематически производить ее уборку. Тщательная уборка должна производиться путем обычного промывания теплой водой, тряпкой/ мягкой губкой, при необходимости, с применением нейтральных моющих средств. Для помещений с большими поверхностями можно использовать промышленные поломоечные машины, дополняя, где необходимо, ручной промывкой. Рекомендации:

- не допускать натирания поверхностей абразивными материалами, как например, губки из металлической стружки или жесткие щетки, которые могут оставить царапины и несмываемые следы;
- удалить возможные жирные или масляные пятна с помощью моющих средств, содержащих органические растворители, или с помощью щелочных моющих средств (pH>9), после чего тщательно прополоскать.
- не применять мыло, так как после него образуется липкая пленка, особенно если используется жесткая вода;

- не применять продукты, содержащие воск или придающие блеск вещества;
- не применять абразивные моющие средства на блестящих и/или полированных поверхностях; они могут использоваться на матовых материалах, однако, предварительно их следует протестировать на маленьком участке плиточной поверхности. В целом, использование любого не нейтрального моющего средства, должно быть предварительно опробовано на неуложенной плитке или на скрытом участке пола.

<b>Рекомендации По Укладке Бордюра И Соединительных Элементов Из Металла</b>
------------------------------------------------------------------------------

Рекомендуется для облицовки стен в помещениях; укладка выполняется на полиуретановый и эпоксидный клей. В случае применения клея на цементной основе следует немедленно удалять его избытки с видимых участков с помощью мягкой смоченной в воде губкой. Не рекомендуется применение бордюра/ уголка в солесодержащих средах с большой концентрацией соли в атмосфере, поскольку он подвержен образованию ржавчины. Также рекомендуем не использовать бордюры/ступени в условиях постоянного погружения в воду.
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<b>Рекомендации По Напольной Укладке Прямоугольных Форматов</b>
Помимо ортогональной укладки, для прямоугольных форматов рекомендуется укладка с равномерным или неравномерным разгоном между двумя соседними элементами, равным: макс. 1/5 для форматов: 19x150 • 25x150 • 37,5x150 • 72x145 макс. 1/4 для форматов: 15x90 • 45x90 • 15x120 • 20x120 • 30x120 • 60x120 - 58x116 • 29x116
макс. 1/3 для форматов: 7,5x60 • 10x60 • 14,5x58 • 15x60 • 30x60 • 37,5x75 • 29x58 • 20x40

Более подробную информацию и обучающие видеоматериалы можно найти в разделе укладки на сайте [www.marazzi.it](http://www.marazzi.it)

Per le pavimentazioni esterne non protette, Marazzi Group consiglia di creare una pendenza ≥ 1.5% sulla superficie calpestabile allo scopo di limitare il formarsi di ristagni d’acqua localizzati. Nel caso in cui questi ristagni permangano sulla superficie delle piastrelle nonostante una posa a regola d’arte, è necessario intervenire meccanicamente con l'utilizzo di scope o aspira-liquidi.
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Prima della posa, si raccomanda una attenta valutazione da parte del progettista relativamente a: destinazione d’uso (pubblica o privata), intensità e tipologia di traffico, presenza di acqua, carichi statici e dinamici attesi, condizioni climatiche (frequenza ed intensità del vento in particolare). In caso di posa sopraelevata, in particolare in ambienti pubblici, per aumentare la resistenza allo sfondamento in conformità alla norma EN 12825 è consigliata l’applicazione di lamiera zincata sul retro delle lastre.
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Per approfondimenti e video tutorial consultare la sezione posa del sito <a href="http://www.marazzi.it">www.marazzi.it</a>
-----------------------------------------------------------------------------------------------------------------------------

For unprotected outdoor pavings, Marazzi Group recommends the creation of a gradient of ≥ 1.5% on the finished surface, to prevent the formation of patches of standing water. In the event that standing water persists on the surface of the tiles in spite of correct installation, it must be removed mechanically with the aid of brooms or wet-and-dry vacuum cleaners.
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Before installation, architects are urged to make a careful assessment of the intended use (public or private), type and intensity of traffic, any water present, expected static and dynamic loads, and weather conditions (especially wind strength and frequency). In case of raised pavings, especially in public places, application of galvanised plate to the underside of slabs to increase load bearing capacity in accordance with the EN 12825 standard is recommended.
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

For further details and installation tutorial video, visit the installation section of the <a href="http://www.marazzi.it">www.marazzi.it</a> website
-------------------------------------------------------------------------------------------------------------------------------------------------------

Pour des sols extérieurs non protégés, Marazzi Group conseille de créer une inclinaison ≥ 1,5 <span> </span> % sur la surface de piétinement en vue de limiter la stagnation localisée de l’eau. Si, malgré une pose dans les règles de l’art, cette stagnation devait persister à la surface des carreaux, une intervention mécanique, au moyen de balais et d’aspirateurs de liquides, est alors nécessaire.
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Avant la mise en oeuvre, il est recommandé à l’architecte d’effectuer une analyse minutieuse des éléments suivants <span> </span> : domaine d’application (public ou résidentiel), intensité/type de trafic, présence d’eau, charges statiques et dynamiques attendues, conditions climatiques (notamment fréquence et intensité du vent). En cas de pose en plancher surélevé, notamment dans des espaces publics, conformément à la norme EN 12825, il est recommandé d’appliquer une tôle galvanisée au dos des dalles afin augmenter la résistance à la charge de rupture.
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Pour obtenir plus d’informations et pour visualiser les tutoriels, consulter la section Pose sur le site <a href="http://www.marazzi.it">www.marazzi.it</a>
-------------------------------------------------------------------------------------------------------------------------------------------------------------

Zur Unterbindung von punktueller Stauwasserbildung bei Belägen in ungeschützten Außenbereichen, empfiehlt die Marazzi Group die Ausbildung eines Gefälles ≥ 1,5% auf der Trittfäche. Sollte trotz fachgerechter Verlegung Stauwasser auf der Fliesenoberfläche zurückbleiben, ist dessen mechanische Entfernung mit Hilfe eines Besens oder Nasssaugers erforderlich.
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

## CONSIGLI DI POSA E MANUTENZIONE

Vor der Verlegung sollte der Planer folgende Faktoren sorgfältig zu prüfen: Anwendungsbereich (öffentlich oder privat), Verkehrsaufkommen und -typologie, Vorhandensein von Wasser, voraussichtliche statische und dynamische Lasten sowie Klimabedingungen (insbesondere Häufigkeit von Windlasten und Windstärke). Vor allem bei der Verlegung von Doppelböden in öffentlichen Bereichen wird die Anbringung von verzinktem Blech an der Plattenrückseite empfohlen, um die Bruchlast gemäß EN 12825 zu erhöhen.
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Für ausführliche Informationen und Tutorialvideos siehe Bereich Verlegung auf <a href="http://www.marazzi.it">www.marazzi.it</a>
----------------------------------------------------------------------------------------------------------------------------------

En el caso de pavimentaciones exteriores no protegidas, Marazzi Group recomienda crear una pendiente ≥ 1,5% en la superficie transitable para limitar la formación de depósitos localizados de agua estancada. En caso de que estos depósitos de agua permanezcan en la superficie del azulejo, aun cuando la colocación se haya realizado correctamente, será necesario intervenir mecánicamente empleando un cepillo o un aspirador de líquidos.
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Antes de la colocación se recomienda que el proyectista valore detenidamente: el uso que se le va a dar (público o privado), la intensidad y el tipo de tráfico, la presencia de agua, las cargas estáticas y dinámicas esperadas, las condiciones climáticas (en especial tener en cuenta la frecuencia y la intensidad del viento). En caso de colocación sobreelevada, en particular en ámbitos públicos, para aumentar la resistencia a la rotura de conformidad con la norma EN 12825 se aconseja la aplicación de chapa galvanizada en la parte de atrás de las placas.
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Para ampliar información y observar el vídeo tutorial, acceder al apartado de colocación del sitio web <a href="http://www.marazzi.it">www.marazzi.it</a>
-----------------------------------------------------------------------------------------------------------------------------------------------------------

Для наружных незащищенных полов Marazzi Group рекомендует создавать уклон ≥ 1,5% на пешеходной поверхности для снижения образования локальных застоев воды. В случае, если застои воды образуются на плитке несмотря на правильную укладку, необходимо прибегать к использованию механических средств, таких как щетки или же аппараты для сбора жидкостей.
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Перед укладкой проектировщику рекомендуется тщательно изучить следующие аспекты: назначение (общественное или частное), интенсивность и тип движения, наличие воды, предполагаемые статические и динамические нагрузки, климатические условия (в частности, периодичность и сила ветра). В случае укладки фальшполов, в частности на общественных объектах, рекомендуется установить оцинкованную металлическую пластину на тыльную сторону плит для повышения прочности на разрушение в соответствии со стандартом EN 12825.
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Более подробную информацию и обучающие видеоматериалы можно найти в разделе укладки на сайте <a href="http://www.marazzi.it">www.marazzi.it</a>

# Consigli di Posa e Manutenzione Lastre Decorate a Freddo - Silky

– Advice for Installation and Maintenance Cold-decorated slabs - Silky • Conseils de pose et entretien Dalles décorées à froid - Silky • Tipps zur Verlegung und Pflege Kaltdekorierte Platten - Silky • Consejos para la colocación y el mantenimiento Placas decoradas en frío - Silky • Рекомендации по укладке и уходу Плиты с холодным декором - Silky

Se stai cercando informazioni in altre lingue, vai su [Google Traduzione](#).

Queste lastre sono prodotte con una nuova tecnologia che permette di realizzare superfici estremamente curate dal punto di vista grafico e decorativo, caratterizzando ogni singolo esemplare con piccoli dettagli estetici e cromatici assolutamente unici, tra cui anche eventuali piccole imperfezioni, replicando di fatto i risultati normalmente raggiunti con le tradizionali metodologie artigianali. A differenza di quanto avviene per la gran parte degli altri prodotti in gres porcellanato, la cottura dei materiali non avviene ad elevate temperature riducendo la resistenza all'abrasione rispetto ai normali standard del gres porcellanato. Per le qualità tecniche del tutto particolari, le lastre necessitano dei seguenti fondamentali accorgimenti.

**Stoccaggio**
Il materiale deve essere stoccato all'interno o comunque al riparo da agenti atmosferici, coprendo il materiale con cappucci protettivi.

**Movimentazione**
Il materiale non deve subire sollecitazioni meccaniche quali il contatto con materiali abrasivi e lo strofinamento con altre lastre o con il piano di lavoro. Su questo materiale non bisogna appoggiare utensili o altro materiale che potrebbe danneggiare il prodotto. Si consiglia l'utilizzo di telai a ventosa previa verifica della perfetta pulizia delle ventose stesse e dell'assenza di eventuali resti (polvere, corpuscoli) che possono segnare la superficie.

**Destinazione**
Le lastre possono essere usate solo ed esclusivamente per rivestire le pareti negli ambienti indoor, sconsigliandone l'utilizzo invece per il rivestimento di schienali cucine, docce, caminetti ed in generale in tutte le situazioni dove il materiale sarebbe lungamente sottoposto a fonti di calore o acqua ed umidità.

**Posa in Opera**
Durante lo spostamento, occorre prestare la massima attenzione affinché le lastre non entrino in contatto con materiali abrasivi, altre lastre, piani di lavoro o altri strumenti che potrebbero danneggiarle.

**Taglio delle lastre**
È fondamentale verificare che il piano di appoggio sia perfettamente stabile, planare e soprattutto pulito e privo di ogni asperità. Le lastre devono essere tagliate utilizzando una taglierina in gres per l'incisione, da realizzarsi sul posteriore della lastra (lato non decorato). Durante l'intero taglio, la lama deve sempre aderire alle lastre. Anche fori e scassi devono essere eseguiti incidendo la superficie decorata della lastra. È consigliato utilizzare lame nuove o comunque in ottimo stato.

**Posa**
È opportuno utilizzare moderni livellanti a vite dotati di guarnizione protettiva che deve essere assolutamente pulita per rispettare la superficie decorata; evitare quindi l'uso di distanziatori livellanti tradizionali.

**Stuccatura della Sperficie Posata**
Prima della stuccatura si consiglia di usare scotch di carta per proteggere la superficie delle lastre. Per la stuccatura si raccomanda di usare sempre e solo sigillanti cementizi e spatole in materiale plastico. Al termine dell'operazione occorre pulire subito i residui, prima dell'indurimento dello stucco, utilizzando acqua calda e una spugna non abrasiva, in modo da non danneggiare la superficie delle lastre. Non utilizzare prodotti a base di siliconi acetici per la sigillatura di infissi o altri elementi in adiacenza a queste lastre.

**Pulizia e Manutenzione Dopo la Posa**
Per la prima pulizia delle lastre si raccomanda di impiegare acqua o detersgenti neutri, usando una spugna morbida o uno straccio in microfibra, e mai solventi e spugne abrasive che potrebbero danneggiare la superficie delle lastre.

**Pulizia Ordinaria**
Per la pulizia ordinaria si raccomanda di impiegare acqua o detersgenti neutri, usando una spugna morbida o un panno in microfibra. L'eventuale uso di prodotti anticalcare a base acida e consentito, purché si abbia l'accortezza di risciacquare subito la superficie delle lastre con acqua dopo la loro applicazione. Si raccomanda infine di non utilizzare mai solventi a base alcolica, o di altro genere, ne spugne abrasive, in modo da non danneggiare la superficie delle lastre.

These slabs are produced via a new technology enabling the creation of surfaces with extremely fine decoration and patterning, in which every single piece has absolutely unique small graphic and colour details, also including minor flaws which replicate the outcomes usually produced by traditional hand-crafting methods. Unlike most other porcelain stoneware products, these materials are not fired at high temperatures, which reduces their abrasion resistance compared to normal porcelain stoneware standards. Due to their very distinctive technical characteristics, the following recommendations must always be complied with when using these slabs.

**Storage**
Material must be stored indoors or at least protected from the weather, covered with protective hoods.

**Handling**
Material must not be subjected to mechanical stresses such as contact with abrasive materials or rubbing against other slabs or the work surface. Do not place tools or any other item which might damage the product on this material. The use of suction cup frames is recommended, first checking that the suction cups are perfectly clean and free of any residues (dust, small particles) which may scratch the surface.

**Intended Uses**
Slabs may only be used for covering indoor walls. Better avoiding installation in showers, kitchen backsplash, any other wet or humid area. This material is not recommended for covering fireplaces and in general for any applications where it might be exposed to heat for lengthy periods of time.

**Installation**
When handling, take great care to ensure that the slabs do not come into contact with abrasive materials, other slabs, worktops or tools which could damage them.

**Cutting Slabs**
It is essential to check that the supporting surface is perfectly clean and flat, and above all absolutely not rough. Slabs must be cut by scoring them with a cutter for stoneware; they must be cut from the back side (not decorated side). The blade must adhere to the slab throughout the cut.

**Routine cleaning**
For routine cleaning, use water or neutral cleaners with a soft sponge or microfibre cloth. Acid anti-limescale products may be used provided the surfaces of the slabs are rinsed with water immediately after their application. Finally, never use alcohol-based or other solvents, or abrasive sponges, as they may damage the surfaces of the slabs.

**Installation**
Modern screw levellers with protective gasket (which must be absolutely clean to protect the decorated surface) should be used; traditional levelling spacers are not recommended.

**Grouting the Installed Surface**
Before grouting, the surfaces of slabs should be protected with masking tape. When grouting, only use cement-based sealants and plastic trowels. When done, clean residues away before the grout sets, using hot water and a non-abrasive sponge to avoid damaging the surfaces of the slabs. Do not use products based on acetic silicones for sealing frames or other elements adjacent to these sheets.

**Post-InstallationCleaning and Care**
The slabs should be cleaned the first time using water or neutral cleaners, with a soft sponge or microfibre cloth. Never use solvents or abrasive sponges, which might damage the surfaces of the slabs.

**Routine Cleaning**
For routine cleaning, use water or neutral cleaners with a soft sponge or microfibre cloth. Acid anti-limescale products may be used provided the surfaces of the slabs are rinsed with water immediately after their application. Finally, never use alcohol-based or other solvents, or abrasive sponges, as they may damage the surfaces of the slabs.

Ces dalles reposent sur une technologie de production flambant neuve, en mesure de créer des surfaces extrêmement soignées au niveau graphique et décoratif. Chaque exemplaire se différencie par de petits détails esthétiques et par des couleurs absolument uniques, y compris par d'éventuelles petites imperfections, reproduisant dès lors les résultats habituellement obtenus avec les traditionnelles méthodes artisanales. Contrairement à la plupart des autres produits en grès cérame, les matériaux ne sont pas cuits à des températures élevées et possèdent donc une résistance à l'abrasion moindre par rapport aux standards habituels du grès cérame. En raison de leurs qualités techniques très particulières, l'usage des dalles exige le respect strict des dispositions suivantes.

**Stockage**
Le matériel doit être stocké à l'intérieur ou, quoi qu'il en soit, à l'abri des intempéries, en le recouvrant d'une protection.

**Manutention**
Le matériel ne doit pas être exposé à des contraintes mécaniques, comme le contact avec des matériaux abrasifs et le frottement avec d'autres dalles ou avec le plan de travail. Ne pas poser sur ce matériel des outils ou autres

objets susceptibles d'endommager le produit. Il est recommandé d'utiliser des araignées à ventouses dont il est indispensable de vérifier la parfaite propreté et l'absence d'éventuels résidus (poussières, petites particules) susceptibles d'endommager la surface.

**Application**
Les dalles peuvent uniquement et exclusivement être utilisées pour recouvrir des murs dans des environnements intérieurs. Ne les utiliser pas pour recouvrir les fonds de cuisine, les douches, les cheminées et en général dans toutes les situations où le matériau serait soumis pendant une longue période à des sources de chaleur ou d'eau et d'humidité.

**Pose**
Déplacer les dalles avec une très grande précaution pour éviter qu'elles n'entrent en contact avec des matériaux abrasifs, d'autres dalles, des plans de travail ou d'autres instruments susceptibles de les endommager.

**Découpe des Dalles**
Il est indispensable de vérifier que la surface d'appui est parfaitement stable, plane et surtout propre et exempte de toute aspérité. Les dalles doivent être découpées à l'aide d'un coupe-grès pour la gravure, à réaliser au dos de la dalle (face non décorée). Durant toute la coupe, la lame doit toujours coller aux tôles. Des trous et des évidements doivent également être réalisés en découpant la surface arrière (non décoré) de la dalle. Il est recommandé d'utiliser des lames neuves ou en excellent état.

**Pose**
Il est préférable d'utiliser des croisillons à vis modernes avec joint de protection qui doit être absolument propre pour ne pas abîmer la surface décorée. Éviter l'emploi de croisillons nivelants classiques.

**Ramplissage des Joints Sur la Surface Posée**
Avant le remplissage des joints, il est recommandé de protéger la surface des dalles avec un ruban papier adhésif. Pour les joints, il est conseillé d'utiliser seulement et uniquement des mortiers-collés à base de ciment et des spatules en plastique. Éliminer immédiatement les résidus au terme de l'opération, avant que le mortier ne durcisse, avec eau chaude et éponge non abrasive, de sorte à ne pas abîmer la surface des dalles. Ne pas utiliser de produits à base de silicones acétiques.

**Nettoyage ed Entretien Après la Pose**
Pour le premier nettoyage des dalles, il est recommandé d'utiliser de l'eau ou des détergents neutres avec une éponge douce ou un chiffon en microfibre. Il est interdit d'utiliser des solvants et des éponges abrasives susceptibles d'abîmer la surface des dalles.

**Nettoyage Ordinaire**
Pour le nettoyage ordinaire, il est recommandé d'utiliser de l'eau ou des détergents neutres avec une éponge douce ou un chiffon en microfibre. L'usage d'anticalcaires à base acide est autorisé dans la mesure où la surface des dalles est immédiatement rincée à l'eau après leur application. Il est conseillé de ne jamais utiliser de solvants à base d'alcool ou autres, ni d'éponges abrasives, pour ne pas abîmer la surface des dalles.

Die Platten werden mit einer neuen Technologie hergestellt, die eine präzise Ausarbeitung der Oberflächen in Hinsicht auf Design und Dekor ermöglicht, so dass jedes Exemplar absolut einzigartige optische und farbliche Details, darunter auch eventuell feine Unregelmäßigkeiten, aufweist, wie sie normalerweise im traditionellen handwerklichen Verfahren entstehen. Im Unterschied zu den meisten Produkten aus Feinsteinzeug werden diese Platten nicht bei extrem hohen Temperaturen gebrannt, so sie eine gegenüber den normalen Standardwerten von Feinsteinzeug geringere Abriebfestigkeit aufweisen. Aufgrund ihrer besonderen technischen Merkmale gilt es daher, einige grundsätzliche Dinge zu beachten.

**Lagerung**
Das Material muss in geschlossenen Räumen gelagert oder anderweitig durch Abdecken mit Schutzhauben vor Witterungseinflüssen geschützt werden.

**Handling**
Das Material darf keinen mechanischen Belastungen, wie z. B. Kontakt mit abrasiven Materialien und Reibung an anderen Platten oder der Arbeitsfläche, ausgesetzt werden. Werkzeuge oder andere Materialien, die das Produkt beschädigen könnten, dürfen nicht auf diesem Material abgelegt werden. Wir empfehlen die Verwendung von Saugnapfrahmen, wobei vorab sicherzustellen ist, dass die Saugnäpfe selbst vollkommen sauber sind und keine Rückstände (Staub, kleine Partikel) aufweisen, die die Oberfläche verkratzen könnten.

**Anwendungsbereich**
Die Platten dürfen nur für Wandverkleidungen im Innenbereich verwendet werden. Diese Platten sollen nicht für die Verkleidung von Küchenrückwänden, Duschen, Kaminen und allgemein in allen Situationen, in denen das Material über einen längeren Zeitraum Wärme- oder Wasser- und Feuchtigkeitsquellen angewendet werden.

**Verlegung**
Beim Handling ist sorgsamst darauf zu achten, dass die Platten nicht mit abrasiven Materialien, anderen Platten, Arbeitsplatten oder Werkzeugen in Berührung kommen, die sie beschädigen könnten.

**Zuschneiden der Platten**
Es ist unbedingt darauf zu achten, dass die Auflagefläche perfekt stabil, eben und vor allem sauber und frei von Unebenheiten ist. Die Platten sind auf der nicht dekorierten Seite unter Verwendung einer Tischkreissäge für Feinsteinzeug zu schneiden. Während des gesamten Schneidvorgangs muss das Sägeblatt stets an die Platte angestellt sein. Auch Löcher und Ausschnitte müssen auf der nicht dekorierten Oberfläche der Platte ausgeführt werden. Werkzeugen sollen im perfekten Zustand sein.

**Verlegung**
Es ist ratsam, moderne, mit einer Schutzdichtung versehene Schraubnivellierer zu verwenden, die absolut sauber sein müssen, um die dekorierte Oberfläche zu schonen; herkömmliche Abstandshalter sollten daher nicht verwendet werden.

**Verfugen der Verlegten Oberfläche**
Es ist ratsam, moderne, mit einer Schutzdichtung versehene Schraubnivellierer zu verwenden, die absolut sauber sein müssen, um die dekorierte Oberfläche zu schonen; herkömmliche Abstandshalter sollten daher nicht verwendet werden.

**Erstreinigung und Grundreinigung**
Für die Erstreinigung der Platten werden Wasser oder ein neutrales Reinigungsmittel sowie ein weicher Schwamm oder ein Microfasertuch empfohlen. Lösemittel und Scheuerschwämme könnten die Oberfläche der Platten beschädigen und dürfen daher nicht verwendet werden.

**Unterhaltsreinigung**
Für die Unterhaltsreinigung der Platten werden Wasser oder ein neutrales Reinigungsmittel sowie ein weicher Schwamm oder ein Microfasertuch empfohlen. Der etwaige Einsatz von Kalkreinigern auf Säurebasis ist gestattet, sofern die Plattenoberfläche unverzüglich nach der Anwendung mit klarem Wasser gespült wird. Lösemittel auf Alkohobasis oder anderweitiger Art sowie Scheuerschwämme dürfen niemals verwendet werden, da sie die Plattenoberfläche beschädigen können.

Estas placas se fabrican con una nueva tecnología que permite crear superficies extraordinariamente cuidadas desde el punto de vista gráfico y decorativo, dotando a cada una de las piezas de pequeños detalles estéticos y cromáticos absolutamente únicos, incluso con mínimas imperfecciones para replicar los resultados obtenidos normalmente con los tradicionales métodos de producción artesanal. A diferencia de lo que ocurre con la mayoría de los demás productos de gres porcelánico, la cocción de los materiales no se lleva a cabo a elevadas temperaturas, lo que reduce la resistencia a la abrasión en comparación el estándar habitual ofrecido por el gres porcelánico. Dadas sus peculiares cualidades técnicas, las placas requieren que nos atengamos escrupulosamente a las siguientes precauciones.

**Almacenamiento**
El material debe almacenarse en interiores o, en cualquier caso, protegido contra los agentes atmosféricos por medio de cubiertas protectoras.

**Desplazamiento**
El material no debe someterse a solicitudes mecánicas tales como el contacto con materiales abrasivos o el roce con otras placas o con la mesa de trabajo. No se debe apoyar herramientas u otros elementos sobre este material, ya que pueden dañarlo. Se aconseja utilizar bastidores con ventosas, tras comprobar que dichas ventosas estén perfectamente limpias y no presenten residuos de polvo, partículas, etc. que puedan dejar marcas en la superficie.

**Uso Previsto**
Las placas se pueden utilizar única y exclusivamente para revestir paredes de espacios interiores. respaldos de cocina, duchas, chimeneas y en general en todas aquellas situaciones donde el material estaría expuesto a fuentes de calor o agua y humedad durante mucho tiempo.

**Colocación**
Durante su traslado, hay que prestar la máxima atención para evitar que las placas entren en contacto con materiales abrasivos, otras placas, superficies de trabajo ni con herramientas que puedan estropearlas.

**Corte de Las Placas**
Es fundamental comprobar que la superficie de apoyo sea perfectamente estable, plana y, sobre todo, que esté limpia y sin ningún tipo de aspereza. Para cortar las placas debe utilizarse una cortadora para gres, y el corte non se puede realizarse en el lado decorado (cortar la parte trasera). Durante toda la operación de corte, la cuchilla debe permanecer constantemente en contacto con las placas. Los orificios y huecos también deberán realizarse cortando la superficie non decorada (parte trasera) de las placas.

La riproduzione dei colori è approssimativa. Le tabelle con i dati riferiti ai contenuti per scatole ed ai pesi degli imballi sono aggiornate al momento della stampa del catalogo, pertanto i dati elencati possono subire variazioni.

Colour reproduction approximate. The tables with the data referred to the content per box and to the packing weight are updated at the catalogue printing time; therefore the listed data can be altered.

Reproduction couleurs approximative. Les tableaux avec les données concernant les contenus par colis et les poids des emballage sont mis à jour au moment où le catalogue est imprimé, c'est pourquoi ces données peuvent subir des variations.

Farbwiedergabe unverbindlich. Die in den Tabellen enthaltenen Daten in Bezug auf den Inhalt pro Karton und das Gewicht der jeweiligen Verpackung werden am Ausgabedatum des Katalogs richtig gestellt. Jeweilige Veränderungen entsprechender Daten sind somit vorbehalten.

Reproducción de los colores aproximada. Las tablas con los datos del contenido por caja y el peso de los embalajes, están puestas al día en la fecha de impresión del catálogo, por tanto los datos indicados pueden sufrir variaciones.

Воспроизведение цветов ориентировочное. Таблицы с данными, относящимися к содержанию коробок и весу упаковок, действительны на момент издания каталога, следовательно, они могут претерпеть изменения.
